## 3. Executive Summary

The project proponent SMEA aims to improve access to clean water and sanitation among the residence of Tana North Sub-county and its environs by rehabilitating existing dams, and building water cisterns in designated points near villages. This is a noble course that when completed successfully, will alleviate perennial water problem in the region and improve sanitation among the community members for sustainable development. However, Kenya government, through NEMA recognizes that such projects may have certain negative impacts to the community and environment in general. This is why NEMA demands that an EIA is conducted before such projects are implemented. From this background, the project proponents commissioned an EIA, which studied whether the proposed projects poses any adverse environmental effect. The results indicate that the projects may pose various challenges to the environment and community at large. The assessment recommends mitigation measures to the identified adverse environmental effects. The recommendations were drawn in accordance with the provisions of Environmental Impact Assessment and Audit regulations 2003 and EMCA 1999. The EIA report is therefore a guide to the project implementers and manager.

The overall objective is to provide a better life for the people of Tana North District. The environmental aspect of the project is based on the organisation's desire to promote the overall natural resource management, putting more

from the Council on Environmental Quality on the federal level down to city planning departments on the local level
