Environmental Problem Solving Martha C. Monroe, Lisa V. Bardwell, Margaret T. Tudor, 1994 This monograph is a resource for educators who wish to explore environmental problem solving It consists of five parts Chapter 1 presents a psychological perspective on problem solving and its implications for teaching problem solving skills in an interdisciplinary arena Chapter 2 presents four approaches to developing environmental problem solving abilities developed by several environmental education practitioners and researchers in North America and Australia The editors commentary ties these models to the themes raised in Chapter 1 Chapter 3 is a discussion of some of the common strands in the experiences of environmental education practitioners Members of the North American Association for Environmental Education contributed to this analysis which also parallels the themes raised in the first chapter Chapter 4 provides classroom activities that teachers could use to supplement their exploration of local environmental issues The Appendix contains descriptions of the programs used to compile Chapter 3 JRH

One Legacy of Paul F. Brandwein Deborah C. Fort, 2010-02-16 Once again our nation has a powerful need for a revolution devoted to creating scientists As we face the challenges of climate change global competitiveness biodiversity loss energy needs and dwindling food supplies we find ourselves in a period where both scientific literacy and the pool of next generation scientists are dwindling To solve these complex issues and maintain our own national security we have to rebuild a national ethos based on sound science education for all from which a new generation of scientists will emerge The challenge is how to create this transformation Those shaping national policy today in 2009 need look no further than what worked a half century ago In 1957 Sputnik circled and sent a clarion call for America to become the world's most technologically advanced nation In 1958 Congress passed the National Defense Education Act which focused the national will and called for scholars and teachers to successfully educate our youth in science math and engineering It was during this time period that Paul F Brandwein emerged as a national science education leader to lay the foundation for the changes needed in American education to create the future scientists essential to the nation's well being

Higher Education and the Challenge of Sustainability Peter Blaze Corcoran, Arjen E.J. Wals, 2007-05-08 Sustainability challenges universities around the world to rethink their missions and to restructure their courses research programs and life on campus Graduates are increasingly exposed to notions of sustainability which are emotionally politically ethically and scientifically charged They must be able to deal with conflicting norms and values uncertain outcomes and futures and a changing knowledge base At the same time they will need to be able to contextualize knowledge in an increasingly globalized society This book provides a variety of valuable theoretical and practical resources for students teachers researchers and administrators who seek to integrate sustainability in higher education Sustainability is not only explored as both an outcome and a process of learning but as a catalyst for educational change and institutional innovation The book raises the various problematics related to this inchoate field and provides an intellectual history and critical assessment of the prospects for

institutionalizing sustainability in higher education **New Ground** Karen S. Sullenger, R. Steven Turner, 2015-05-07

Between 2004 and 2009 university educators practicing scientists museum and science centre personnel historians and K 12 teachers in Canada's eastern Atlantic provinces came together as a research community to investigate informal learning in science technology and mathematics The interdisciplinary collaboration known as CRYSTAL Atlantique was sponsored by Canada's National Science and Engineering Research Council In this volume the CRYSTAL participants look back on their collective experience and describe research projects that pushed the boundaries of informal teaching and learning Those projects include encounters between students and practicing scientists in university laboratories and field studies summer camps for science engagement after school science clubs for teachers and students innovative software for computer assisted learning environmental problem solving in a comparative international context online communities devoted to solving mathematical problems and explorations of ethnomathematics among Canadian aboriginal peoples The editors and contributors stress the need for research on informal learning to be informed continuously by a notion of science as culture and they analyze the forms of resistance that studies of informal learning frequently encounter Above all they urge a more central place for informal science learning in the larger agenda of educational research today *Recursos Documentales Para la Ambientación de la Formación Profesional en Turismo* Jaume Sureda, 1998 Proporciona las referencias de los principales documentos que puedan ser tiles para un formador de sector turístico interesado en ambientar su práctica profesional **Free-Choice Learning and the Environment** John H.
