Strategies for Managing Global Environmental Risks German Advisory Council on Global Change, 2013-03-13 Global risk potentials and their interplay with economic social and ecological processes of change have emerged as a challenge to the international community By presenting this report the Council hopes to contribute constructively to an effective efficient and objective management of the risks of global change The approach taken by the Council is first to classify globally relevant risks and then to assign to these classes of risk both established and innovative risk assessment strategies and risk management tools On this basis management priorities can be set The Council further recommends a number of cross cutting strategies for international policies These include worldwide alignment of liability law creation of environmental liability funds establishment of a United Nations Risk Assessment Panel and implementation of strategies aimed at reducing vulnerability to risk

The Cognitive Psychology of Climate Change Patrik Sörqvist, John E. Marsh, 2019-09-19 Climate change is one of society s great challenges The scientific community agrees that human activity is to a large degree responsible for these changes and efforts to promote more sustainable behaviors and lifestyles often backfire People travel for longer distances when driving a vehicle that uses a sustainable energy source they purchase organic food as a means to be environmentally friendly without necessarily reducing other means of consumption and those who deliberately change their behavior to be more environmentally friendly in one area often start behaving environmentally irresponsibly in another Environmentally harmful behavior and decision making often have their roots in cognitive biases and cognitive inabilities to properly understand climate change issues to understand the effects of one s own behavior on the environment and other means by which thinking and reasoning about climate change issues are biased
