May, 2020-08-09 *Earth Matters on Stage* Ecology and Environment in American Theater tells the story of how American theater has shaped popular understandings of the environment throughout the twentieth century as it argues for theater's potential power in the age of climate change Using cultural and environmental history seven chapters interrogate key moments in American theater and American environmentalism over the course of the twentieth century in the United States It focuses in particular on how drama has represented environmental injustice and how inequality has become part of the American environmental landscape As the first book length ecocritical study of American theater *Earth Matters* examines both familiar dramas and lesser known grassroots plays in an effort to show that theater can be a powerful force for social change from frontier drama of the late nineteenth century to the eco theater movement This book argues that theater has always and already been part of the history of environmental ideas and action in the United States *Earth Matters* also maps the rise of an ecocritical thought and eco theater practice what the author calls ecodramaturgy showing how theater has informed environmental perceptions and policies Through key plays and productions it identifies strategies for artists who want their work to contribute to cultural transformation in the face of climate change *The History and Theory of Environmental Scenography* Arnold Aronson, 1981 **Environmental Simulation** Kenneth H. Environment of Compassion Cia Sautter,2025-05-09 The Environment of Compassion explores questions of what it means to be in relationship to nature if and how it is a religious experience and how understanding humans as part of nature alters theology The book offers a performance perspective that looks at ritual dance and theatre as a means of presenting discussion of sacred values in the public realm The premise is that performance may serve as an effective means for developing human sacred values that recognize the more than human world as it increases intersubjective awareness to address issues of social and environmental justice The author investigates religion and theatre as a means of better understanding how eco consciousness requires an aesthetic of the sacred Rather than separate religion culture and nature the book presents an aesthetic looking at the relationship between them It considers how an embodied theatrical story might develop an inclusive community of compassion Weaving the chapters together is an account of The Garden A Refuge an eco centered play based on the biblical book of Job Ecotheology aesthetics and embodiment theories are examined throughout with scholarship and examples drawn largely from the Jewish tradition The book is relevant to scholars of religion and theology particularly those with an interest in the environment as well as theatre dance and performance studies

Taking as a starting point a design for a mobile theater made at the Architectural Association of London between 1970 and 1971 by Spanish architect Javier Navarro de Zuñiga born 1942 this book traces the architectural counterculture of that time and the relations with the alternative performing arts. Architect Javier Navarro de Zuñiga 1942 graduated in 1968 at Madrid School of Architecture. During the academic year 1970-1971 he travelled from Madrid to London thanks to a grant of the British Council to complete his postgraduate training at the Architectural Association. There he designed a building called Mobile Theater. It was a theatrical device composed of several 8 x 2.5 meters trucks carefully designed which contained all the building elements needed to shape a space for the performing arts or other collective uses. The assembly time estimated for four workers was six and a half hours. This project was internationally shown and published between 1971 and 1975 but was never built. This book intends to release this project largely ignored by canonical historiography and to culturally place it in time and space: the agitated city of London in 1971. After the convulsions of May 1968 architectural counterculture reappeared on very different fronts from the disciplinary rally to the guerilla positions. This architectural design accounts for these events since it had a temporal development that goes beyond its mere conception as an artifact. The long and frustrated process for construction 1969 to 1976 calls for a particular intra history which this book will tell.

The Environment on Stage Julie Hudson, 2019-08-08. *The Environment on Stage: Scenery or Shapeshifter* investigates a pertinent voice of theatrical performance within the production and reception of ecotheatre. Theatre ecologies unavoidably enmeshed in the environment describe the system of sometimes perverse feedback loops running through theatrical events, productions, performances and installations. This volume applies an ecoaware spectatorial lens to explore live theatre as a living ecosystem in a literal sense. The vibrant chemistry between production and reception and the spiralling ideas and emotions this generates in some conditions are unavoidably driven by flows of matter and energy thus by the natural environment even when human perspectives seem to dominate. *The Environment on Stage* is an intentionally eclectic mix of observation, close reading and qualitative research undertaken with the aim of exploring ecocritical ideas embedded in ecotheatre from a range of perspectives. Individual chapters identify productions, performances and installations in which the environment is palpably present on stage as it is in natural disasters such as floods, storms, famine, conflict and climate change. These themes and others are explored in the context of site specificity, subversive spectators, frugal modes of narrative, the shifting stuff of theatre productions and imaginative substitutions. Ecotheatre is nothing less than vibrant matter that lets the environment speak for itself.
