Environmental Vision:

U.S. Army Environmental Strategy Into the 21st Century United States. Department of the Army, 1992

Environmental Skill Mark Coeckelbergh, 2015-02-20 Today it is widely recognized that we face urgent and serious environmental problems and we know much about them yet we do very little What explains this lack of motivation and change Why is it so hard to change our lives This book addresses this question by means of a philosophical inquiry into the conditions of possibility for environmental change It discusses how we can become more motivated to do environmental good and what kind of knowledge we need for this and explores the relations between motivation knowledge and modernity After reviewing a broad range of possible philosophical and psychological responses to environmental apathy and inertia the author argues for moving away from a modern focus on either detached reason and control Stoicism and Enlightenment reason or the natural the sentiments and the authentic Romanticism both of which make possible disengaging and alienating modes of relating to our environment Instead he develops the notion of environmental skill a concept that bridges the gap between knowledge and action re interprets environmental virtue and suggests an environmental ethics centered on experience know how and skillful engagement with our environment The author then explores the implications of this ethics for our lives it changes the way we think about and deal with health food animals energy climate change politics and technology

Integrated Environmental Planning James K. Lein, 2008-04-15 This up to date and comprehensive reference presents the fundamentals of environmental planning incorporating theory practice and case studies The book includes balanced coverage and real world examples to illustrate the concepts Political ethical and societal considerations are all addressed Presents the fundamentals of environmental planning and methodological material for analysis Real world examples are provided to illustrate concepts Political ethical and societal considerations are addressed Coverage is balanced between theoretical and practical

ECO-FEMINISM NATURE-WOMEN SOLIDARITY Gülhan KARADAĞ AĞKURT, With the industrialization and capitalist exploitation system affecting nearly every part of the world the image of Mother Earth once closely connected with nature and revered by ancient civilizations has almost disappeared Women once the wise stewards of the earth have become the first victims of nature s destruction now owning only about 1% of the land under patriarchy For women working in small family run businesses based on subsistence economies and dependent on the land the protection of the land has become synonymous with the preservation of the life

they are a part of However ecofeminists continue to be inspired by the privileged position women once held in ancient civilizations and are working to restore the destroyed nature acting as if they are its protectors Although the environmental threat which has become a global issue is often equated with the pollution of the material environment unless it is seen as a result of spiritual pollution and insatiable greed which approaches natural heritage from a materialistic and profit driven perspective real solutions will not go beyond a utopia **Computerworld** ,1993-07-26 For more than 40 years

Sustainable Energy-Water-Environment Nexus in Deserts Essam Heggy, Veronica Bermudez, Marc Vermeersch, 2022-04-25 This book addresses challenges and opportunities in the Energy Water Environment EWE nexus with a particular focus on research and technology development requirements in harsh desert climates Its chapters include selected contributions presented during the 1st international conference on sustainable Energy Water Environment nexus in desert climates ICSEWEN 19 held at the Qatar Environment and Energy Research Institute QEERI in Doha Qatar in December 2019 This volume is comprised of three main chapters each describing important case studies and progress on water energy and environmental questions A fourth chapter on policies and community outreach on these three areas is also included This compilation aims to bridge the gap between research and industry to address the socioeconomic impacts of the nexus imbalance as perceived by scientists industrial partners and policymakers The content of this book is of particular importance to graduate students researchers and decision makers interested in understanding water energy and environmental challenges in arid areas Researchers in environmental and civil engineering chemistry hydrology and environmental science can also find unique in situ observations of the current nexus imbalance in deserts climate to validate their investigations It is also an invaluable guide for industry professionals working in water energy environment and food sectors to understand the rapidly evolving landscape of the

EWE nexus in arid areas The analyses observations and lessons learned summarized herein are applicable to other arid areas outside North Africa and the Arabian Peninsula as well such as central Australia the southwest of the United States and deserts in central Asia Metaphors for Change Penny Allen,Christophe Bonazzi,David Gee,2017-09-29 How can we get from where we are to where we want to be Metaphors for Change attempts to answer this question and provide a roadmap for sustainability by bringing together the thoughts of a unique collection of leading change agents from business government and academia Environmental questions have previously been dealt with metaphorically by catastrophism or manicheism zero growth Malthusianism Deep Ecology man is the enemy less is more These metaphors have had limited impact because they have failed to connect with the mainstream of cultural political and business ideas This book examines a number of new metaphors and related partnerships tools and action which appear to have greater possibilities for the world in which we now live The editors argue that Metaphors for Change can deliver to the public and to decision makers new perceptions structured knowledge that can help interpret the past and the present and help us forge the future The wider the gap between the now and the necessary the stronger the bridging perceptions have to be in order to break through barriers of fear and conservatism Some of the concepts considered are sustainable development the polluter pays principle the precautionary principle eco efficiency eco effectiveness life cycle assessment design for the environment eco services dematerialization industrial symbiosis industrial ecology and zero emissions There are of course other useful metaphors on the horizon some of them included in this book Including key contributions from the ground breaking conferences ECO 97 and ECO 99 along with other specially commissioned and reprinted pieces Metaphors for Change provides a treasure chest of new ideas innovations and action Accessible and forward thinking it will prove indispensable both as a student learning tool and as a panoramic overview of the sustainability metaphors key thinkers believe we should be putting into practice

Ecocriticism in Malayalam G. Madhusoodanan,2022-02-06 The global trend in the scholarly field of ecocriticism or broadly environmental humanities is shifting towards localized sub areas This shift has been instrumental in canonizing local subaltern postcolonial and unheard voices in ecocriticism Such ecocriticism has gained relevant significance in the disciplines of humanities and social sciences and boldly displays diverse ecocultural perspectives on communities societies languages and literatures all of these being distinctly different from each other Weaving a unique ecocritical narrative from the rich literary and cultural texts belonging to Kerala this volume presents several ecocritical perspectives written by award winning writers in Malayalam *Ahead of the Curve* K. Green,P. Groenewegen,P.S. Hofman,2012-12-06 The debate on sustainable production often ends in discussions on the feasibility of far reaching changes in relation to the competitiveness of companies Industry itself and policy makers tend to back away from engaging in profound processes of industrial transformation Examples of companies who have voluntarily moved beyond what is seen as reasonable and feasible can overcome this deadlock This book collects a fine sample of companies who have taken up their responsibility in this respect

To quote the editors of this book They are cases that might provide other firms and policy makers with ideas for innovative environmental responses that are outside the slowly rising trend of improvement that we are currently observing in short the cases are of firms and ideas that are ahead of the curve The editors and many of the authors of this volume are members of the Greening of Industry Network and have been debating with one another for years Founded in 1991 the Greening of Industry Network comprises over 1500 individuals representing academia business public interest labor and government from more than 50 countries Participants work together to build policies and strategies toward creating a sustainable future through many vehicles coordinating research efforts publications planning and participating in workshops public forums and conferences To provide benefit to broader society the Network stimulates public dialogue and brings together academic researchers from many disciplines with other stakeholders who traditionally do not work together in coalitions
