Bandung, Global History, and International Law

Luis Eslava, Michael Fakhri, Vasuki Nesiah, 2017-11-30 In 1955 a conference was held in Bandung Indonesia that was attended by representatives from twenty nine nations Against the backdrop of crumbling European empires Asian and African leaders forged new alliances and established anti imperial principles for a new world order The conference came to capture popular imaginations across the Global South and as counterpoint to the dominant world order it became both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements diplomatic efforts institutional experiments and heterodox visions of the history and future of the world In this book leading international scholars explore what the spirit of Bandung has meant to people across the world over the past decades and what it means today It analyzes Bandung s complicated and pivotal impact on global history international law and most of all justice struggles after the end of formal colonialism

Climate Change and International History Ruth A.

Morgan, 2024-01-25 A 2024 CHOICE OUTSTANDING ACADEMIC TITLE Exploring how climate change has configured the international arena since the 1950s this book reveals the ways that climate change emerged and evolved as an international problem and how states scientists and non governmental organizations have engaged in diplomatic efforts to address it Developing amidst the Cold War decolonization and a growing transnational environmental consciousness it asks how this wider historical context has shaped international responses to the greatest threat to humankind to date Thinking beyond the science of climate change to the way it is received and responded to Ruth Morgan shows how climate science has been mobilised in the political sphere paying particular attention to the North South dynamics of climate diplomacy The privileging of climate science and the mobilisation of climate scepticism are explored to consider how they have undermined efforts to remedy this planetary problem Studying climate change and international history in tandem this book explains the origins of the debates around this environmental emergency the response of political leaders attempting to address the threat and the barriers to creating an international regime to resolve the climate crisis

The Global History of Organic Farming Gregory A. Barton, 2018-02-02 Organic farming is a major global movement that is changing land use and consumer habits around the world This book tells the untold story of how the organic farming movement nearly faltered after an initial flurry of scientific interest and popular support Drawing on newly unearthed archives Barton argues that organic farming first gained popularity in an imperial milieu before shifting to the left of the political spectrum after decolonization and served as a crucial middle stage of environmentalism Modern organic protocols developed in British India under the guidance of Sir Albert Howard before spreading throughout parts of the British Empire Europe and the USA through the advocacy of his many followers and his second wife Louise Organic farming advocates before and during World War II challenged the industrialization of agriculture and its reliance on chemical fertilizers They came tantalizingly close to

influencing government policy The decolonization of the British Empire the success of industrial agriculture and the purging of holistic ideas from medicine side lined organic farming advocates who were viewed increasingly as cranks and kooks Organic farming advocates continued to spread their anti chemical farming message through a small community that deeply influenced Rachel Carson s ideas in *Silent Spring* a book that helped to legitimize anti chemical concerns The organic farming movement re entered the scientific mainstream in the 1980s only with the reluctant backing of government policy It has continued to grow in popularity ever since and explains why organic farming continues to inspire those who seek to align agriculture and health

The Industrial Revolution in World History Peter N Stearns,2018-04-17 The industrial revolution was the single most important development in human history over the past three centuries and it continues to shape the contemporary world With new methods and organizations for producing goods industrialization altered where people live how they play and even how they define political issues By exploring the ways the industrial revolution reshaped world history this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact In the fourth edition noted historian Peter N Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West including the study of India the Middle East and China In addition an expanded conclusion contains an examination of the changing contexts of industrialization The *Industrial Revolution in World History* is essential for students of world history and economics as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times
