**Constructing the International Economy** Rawi Abdelal, Mark Blyth, Craig Parsons, 2011-03-15 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere Constructing the International Economy sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents interests Constructing the International Economy portrays the diversity of models and approaches that exist among constructivists writing on the international political economy The authors outline and relate several different arguments for why scholars might attend to social construction inviting the widest possible array of scholars to engage with such approaches They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm

**How European Citizens Understand the Economy** Dorian Alt,2023-06-02 This book argues that the European public sphere functions to help citizens understand complex economic issues and discuss them meaningfully across borders Through original research conducted on citizens perceptions of European economic issues it explores a mechanism that allows people to make sense of such complex issues national anchoring and shows that the way issues are politicized today in a national public sphere will shape citizens understandings of novel issues tomorrow The book demonstrates that debates in the European public sphere spread knowledge to the population just as national debates do thus allowing transnational deliberation to function in the EU and potentially advance a European identity The book thus draws optimistic conclusions with regard to EU legitimacy with the European public sphere functioning rather well and problems of complexity and compatibility seeming less pronounced than often expected in public opinion research and European studies This book will be of key interest to scholars and students of public opinion European studies political attitudes austerity politics and more broadly to political science sociology and social psychology

Roy,Arthur T. Denzau,Thomas D. Willett,2006-12-13 Critics of globalization often portray neoliberalism as an extremist laissez faire political economic philosophy that rejects government any sort of government intervention in the domestic economy Like most over used terms it is more complicated than this introductory sentence suggests This volume seeks to move beyond these caricature depictions and definitions as well as the emotional rhetoric that has unfortunately dominated both the scholastic and political debate on neoliberalism and global market oriented reform This book emphasizes that there are in fact a variety of neoliberalisms that share a common emphasis on the role of the market Beyond this however its usages and applications appear much more varied according to the cultural economic political and social context in which it is used A host of eminent contributors including Douglass C North Arthur T Denzau Thomas D Willett Mark Blyth Colin Hay Craig Parsons and others provide a rigorous assessment of the significance of neoliberal ideas on economic policy Through their detailed international case studies the contributors to this book show how varied its impact has in fact been and the result is a book that will stimulate further debate in this most controversial of subject matters Ravi K Roy is a Research Scholar at the Claremont Institute for Economic Policy Studies Arthur T Denzau is Professor of Economics at Claremont

**Shaping Nations and Markets** Vinícius Guilherme Rodrigues Vieira,2023-09-15 Shaping Nations and Markets employs a mixed methods approach to contend that economic ideas organization of domestic interests and their economic power asymmetries of information and political institutions do not sufficiently explain the formation of national interests in processes of trade liberalization The author proposes that something is missing identity capital which also empowers economic sectors that share either liberalizing or protectionist interests Identity capital is an economic sector s contribution to the stability of a national identity narrative it correlates with the degree to which the workforce of any sector represents the dominant conception of national identity Identity capital creates political power asymmetries among those sectors and impacts the formation of populist movements in both developed and developing states This book offers a theoretical framework to unpack national identity trade liberalization nationalist populism domestic politics and globalization The author argues that the key for identifying whether liberalizing or protectionist coalitions prevail in trade negotiations is identity capital He offers a comparison of the three largest contemporary federal multicultural democracies Brazil India and the United States from the Doha Development Round of the World Trade Organization WTO in 2001 to the rise of populism in these countries in recent years This book will be of great interest to graduate students and scholars of international relations international studies political science comparative politics and economic sociology
