**Economic Development in a Globalized Environment** Henry Y. Wan Jr., 2011-06-28 Is the East Asian growth record replicable today This book answers yes It places the common East Asian theme in the theoretic context of product cycles globalization and convergence and the historical perspective of the German Miracle after World War II also the more recent Irish growth it identifies the effective policies for sustained rapid growth by structured comparisons among different economies it evaluates the strengths and weaknesses of the alternative policy packages of Korea Taiwan Hong Kong and Singapore in the light of such recent events like global trend for liberalization and the Crises of 1997 and 2001 Economic Development in a Globalized Environment also scrutinizes the major debates in development economics using documented cases and analytic reasoning for support Polycrisis and Economic Development in the Global South Hebatallah

Adam, Ravinder Rena, 2024-11-08 Global polycrisis refers to the simultaneous occurrence of multiple interconnected crises It is marked by the convergence and interaction of combined events such as geopolitical tensions economic instability environmental degradation public health emergencies and social disturbance In this context this book explores the challenges and opportunities encountered by the Global South amid political instability climate change humanitarian crises technological advancements and regional cooperation The book adopts a multidisciplinary framework integrating theoretical studies with empirical cases from various southern regions in Africa Asia and Latin America This approach helps to foster an in depth understanding of the complex challenges associated with development in these regions The book emphasizes the perspectives and experiences of Global South countries providing a platform for their voices to be heard This allows readers to gain a more nuanced understanding of the unique contexts perspectives and successful experiences of countries in Africa Asia and Latin America Furthermore it investigates issues such as governance security migration development and emergent technologies illuminates the role of regional organizations in fostering regional integration peace and stability and ultimately provides a comprehensive and refined analysis of the Global South that challenges prevalent stereotypes and offers new perspectives on the world's complex realities today It includes case studies that enhance the practical relevance of the book offering real world examples that illustrate the theoretical concepts and highlightings successful approaches to addressing development challenges The book will appeal to scholars researchers and students interested in comprehending and addressing the challenges encountered by the Global South in a time of global polycrisis **The Global Environment,**

**Natural Resources, and Economic Growth** Alfred Greiner, Will Semmler, 2008-07-25 Recently the public attention has turned toward the intricate interrelation between economic growth and global warming This book focuses on this nexus but broadens the framework to study the issue Growth is seen as global growth which affects the global environment and climate change Global growth in particular high economic growth rates imply a fast depletion of renewable and non renewable resources Thus this book deals with the impact of the environment and the effect of the exhaustive use of natural resources

on economic growth and welfare of market economies as well as the reverse linkage It is arranged in three parts Part I of the book discusses the environment and growth There Greiner and Semmler incorporate the role of environmental pollution into modern endogenous growth models and use recently developed dynamic methods and techniques to derive appropriate abatement activities that policymakers can institute Part II looks at global climate change using these same growth models Here too the authors provide direct and transparent policy implications More specifically the authors favour tax measures such as a carbon tax over emission trading as instruments of mitigation policies Part III evaluates the use and overuse of renewable and non renewable resources in the context of a variety of dynamic models They in particular consider the cases when resources interact as an ecological system and analyze issues of ownership of resources as well as policy measures to avoid the overuse of resources In addition not only intertemporal resource allocation but also the eminent issues relating to intertemporal inequities as well as policy measures to overcome them are discussed in each part of the book *Economics and the Global Environment* Charles S. Pearson, 2000-10-09 Economics and the Global Environment is a path breaking comprehensive analysis of how economic and environmental systems mesh in the international context The book investigates if and how environmental resources such as global climate genetic diversity and transboundary pollution can be managed in an international system of sovereign states without a Global Environment Protection Agency It also considers traditional international economics theory and policy and explores how they can be expanded to accommodate environmental values Until recently trade theory and trade policy neglected pollution and environmental degradation This situation has changed dramatically and the controversial and corrosive issues of trade and the environment are here given careful analysis These topics are enriched by a concise presentation of the principles of environmental economics and a thoughtful treatment of sustainable development The book will appeal to students and practitioners of trade and development as well as the environmental community

**Economic Development: Global & Regional Studies** Halil İbrahim Aydın, Magdalena Ziolo, Aniela Bălăcescu, 2017-04-14 The phenomenon of globalization can be described as a gradual increase in the process and dependency level that combines people society and countries from different economic social and political aspects of the world Development which is a multidimensional concept such as globalization is a concept that includes human values as well as economic social cultural demographic and political dimensions With the globalization process a turn to use knowledge as a factor of production has been passed and investing in people who use knowledge in production has become important Investment in human capital leads to the importance of development concept The relationship of the development process with the different fields pioneered the preparation of scientific works in the context of globalization and regional studies In this book Economic Development Global and Regional Studies there are academicians who work in different universities of Turkey and the World and work in the field of development The scientific ethics and responsibility of the works in the book belong to the authors writers who own the department of course and we believe that the necessary sensitivity is shown in

this issue This book in your hand is made up of 15 chapters and development in each chapter is analyzed from different angles We believe that the detailed content will contribute to economic development literature We would like to thank all the authors whose paper published on this book Our hope is to provide some ideas which can inspire academicians and students not only to understand different problems that the world is facing but some solution as well Globalization, Environmental Law, and Sustainable Development in the Global South Kirk W. Junker, Paolo Davide Farah, 2021-11-29 This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South Comprising contributions from lawyers from the Global South or who have experience in the Global South this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization Some of those problems include redistribution of environmental burden on the public through over reliance on the state in emerging economies and the transition to public private partnerships as well as extreme uncontrolled economic expansion Building on Part I Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners

**Navigating Global Environmental Sustainability** Bret L. Billet,2023-08-22 The Great Recession provided an opportunity to reconsider how to simultaneously enhance the well being of individuals corporations countries and the global environment A half century of vital environmental data demands examining several questions pertaining to the impact of a recession on sustainable environmental consumption Does a recession provide an occasion for productive dialogue that might reconcile the ostensible incompatibility of economic and ecological rationales Does it constitute an artificial turning point whereby appropriate incentives may induce productive change Are post recession environmental consumption patterns indicative of government encouragement and corporate willingness to pursue transformative environmental technologies Alternatively are the patterns illustrative of countries transferring their environmental consumption to other countries via international trade Bret L Billet argues that the simultaneous investigation of both the Ecological Modernization theory and the Ecological

Unequal Exchange theory strengthens the present quantitative analysis enhancing understanding of the recession well being sustainable environment nexus Each ecological theory is rooted in the politicized evolution of traditional theories of economic development The introduction of an Aristotelean conception of development as well being an exceptionally large number of cases and the analysis of multiple country subsets results in a more robust inquiry as to the impact of the Great Recession on the global sustainable environment

**Global Environmental Politics** Johannes Urpelainen,2022-07-29 Emerging economies have fundamentally transformed global environmental politics Led by China and India they increasingly make or break international negotiations which now require agreement among a large number of governments with widely varied preferences Emerging economies which still suffer from widespread poverty and frequently struggle with policy implementation often feel that Western led initiatives neglect their needs What does the global environmental policy landscape look like in the age of a rising Global South This book explains why emerging economies have come to dominate global environmental politics and examines the implications for future international cooperation Johannes Urpelainen shows that emerging economies continue to prioritize economic growth and often have limited institutional capacity to contain the environmental destruction that it causes However he argues despite barriers to cooperation innovative bargaining and institutional design offer a way forward Bottom up agreements that respect national sovereignty and invest in capacity building hold more promise than traditional top down treaties with binding commitments The book features detailed discussions of attempts to address hazardous chemicals loss of biodiversity and climate change a comparative analysis of China and India and case studies of nine other emerging economies around the world Global Environmental Politics is an essential forward looking overview of today s most pressing international issue
