The Foundations of Civil War Francisco J. Romero Salvado, 2016-04-29 This book analyzes the decay of Liberal politics in Spain as the regional version of the general crisis that engulfed most of Europe between 1916 and 1923 Romero enriches the important wider debate about this watershed period of European history when in the face of unprecedented mass social protest and political mobilization incumbent governing elites struggled to find a valid formula of social containment in the dawning of mass politics which also saw the spread of the radical new doctrines of Bolshevism and Fascism Above all this book examines Spain's crisis of modernization a process marked by complex social and political realignments through which the nature of civil society was profoundly altered It resulted in an unprecedented spiral of violence and a polarization that firstly led to an authoritarian formula of social control in 1923 and ultimately to the outbreak of civil war in 1936 **The**

Historical Turning Points in Spanish Economic Growth and Development, 1808-2008 Concha Betrán, Maria A. Pons, 2020-06-27 This book analyses the main historical turning points in the Spanish economy and the related challenges it faced It focuses on six turning points that changed the direction of the Spanish economy and identifies the economic social or political origin of these watersheds It also compares the Spanish trajectory with the international one exploring the macroeconomic context in which these turning points happened as well as the external and internal constraints on domestic political choices for a small country like Spain The book focuses on how Spain faced up to each turning point the reforms that were implemented the differences between the Spanish response and that of other countries the results of the policies enacted and what problems were not tackled This is an interesting and unique perspective as most of the turning points in economic history are generally studied from the viewpoint of core countries such as the UK US or Germany The ultimate objective is to learn useful lessons from Spanish economic history in order to better face future turning points **Between**

Empire and Globalization Albert Carreras,Xavier Tafunell,2021-02-22 This book provides a rigorously chronological journey through the economic history of modern Spain always with an eye opened to what happens in the international economy and a focus on economic policy making and institutional change It shows the central theme of the Spanish economy from the late 18th century to the early 21st century is the painful transformation from being a major imperial power to a small nation and later a member of the European Community and a player in a globalized economy It looks in detail at two major issues economic growth and convergence or divergence to the Western European pattern and the permanent tension between the two when assessing historical experience since the industrial revolution This book proposes new visions of the economic past of Spain and provides comparisons over time and space which will be of interest to academics and students of economic history European economic history and more specifically Spanish economic history *Economic Conditions in Spain* Alexander Adams,1930 **The Mesta** Julius Klein,1920 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book The below data was compiled from various identification fields in the bibliographic record of this title This data is provided as an additional tool in helping to ensure edition identification The Mesta A Study In Spanish Economic History 1273 1836 Volume 21 Of Harvard Economic Studies David A Wells Prize Essays Harvard University The Mesta A Study In Spanish Economic History 1273 1836 Julius Klein Harvard University Press 1920 Economics Kenaf Livestock breeders Mesta Sheep Spain *Economic Development, Female Wages and Missing Female Births in Spain, 1900-1930* Rebeca Echávarri-Aguinaga,Francisco J. Beltrán Tapia,2022 Focusing on the years between 1900 and 1930 a period characterised by significant structural transformations and rapid economic growth this article shows that Spain exhibited abnormally high sex ratios at birth SRB at least until the 1920s Apart from ruling out the possibility that female under registration and different mortality environments solely explain the results reported here the analysis of regional information indicates that SRB were higher in those provinces whose economic structure was dominated by agriculture and manufacturing relative to the service sector In addition during the First World War period which arguably subjected the Spanish economy to an exogenous demand shock increased wages resulted in decreases in SRB in those province years that reported male and female wages Importantly the protective role of female wages was twice as large as that of males Likewise in those provinces that published male but not female wages increases in male wages had the opposite effect and increased the SRB thus further supporting the link between relative labour returns and female neglect around birth As expected the relationship between wages and SRB vanished during the 20s along with the bias in SRB These results stress that gender

discrimination around birth does not necessarily vanishes with economic growth unless this process is not accompanied by expanding labour opportunities for women
