twelve countries and represents broad ranging comparative research The book grows out of a collaborative study of public opinion about social justice Though conceived prior to the revolutions that swept Central and Eastern Europe in 1989 the ISJP did not put its survey into the field until the summer of 1991 in a new climate of open international exchange in social research Employing common methods of data collection and within the limits of translation identical survey instruments the ISJP investigated public opinion in seven newly emerging post Communist countries and five of the world's most influential capitalist democracies with special sensitivity to divergencies in the newly united Germany Among the themes addressed by the volume's distinguished contributors are the views and beliefs of citizens in the post Communist states on the transition to market economies and parliamentary democracy the role of ideology in legitimating inequality the structural determination of beliefs about justice the processes that shape individual level evaluations and the major implications of public opinion and mass participation in the democratic process

Maslove, 1995-12-15 Major economic and social developments that will determine the context for tax reforms in the 1990s are the subject of this volume They include the globalization of markets free trade arrangements changing technology and production processes macro economic policies and conditions in Canada and population growth and changes in demographic structure
