Economic Policies And Unemployment Dynamics In Europe:

Economic Policies and Unemployment Dynamics in Europe Mr.Dennis J. Snower,S. G. B. Henry,1997-01-28 This book edited by S G B Henry and Dennis J Snower examines the high unemployment that has plagued five European countries France Germany Italy Spain and the United Kingdom for more than a decade Its methodology focuses on the mechanisms that prevent employers and employees from adjusting promptly to changing market opportunities Chief among these mechanisms are outdated economic structures the power of labor unions rising nonwage labor costs and the disparity between unemployed workers and available jobs Although cross country differences indicate that there is no common cause for joblessness in Europe the book discusses a unique characteristic of the European labor market that unemployment not only rises during recessions but does not fall when economic weaknesses are overcome **Britain's Economic**

Performance Tony Buxton,Paul Chapman,Paul G Chapman,Paul Temple,2005-08-08 This new and substantially revised edition of Britain s Economic Performance provides a unique assessment of the current state of the supply side of the economy Written by a team of highly experienced policy oriented applied economists this volume will be a valuable source of reference analysis and guidance for students and policy makers **IMF Staff papers** International Monetary Fund.

Research Dept.,1997-01-01 This paper argues that an important group of labor market policies are complementary in the sense that the effect of each policy is greater when implemented in conjunction with the other policies than in isolation This may explain why the diverse piecemeal labor market reforms in many European countries in recent years have had so little success in reducing unemployment What is required instead is deeper labor market reforms across a broader range of complementary policies and institutions To be politically feasible these reforms must be combined with measures to address distributional issues **Social Costs and Public Action in Modern Capitalism** Wolfram Elsner,Pietro Frigato,Paolo

Ramazzotti,2007-01-24 Taking a theoretical conceptual and empirical approach and using real life case studies Social Costs and Public Action in Modern Capitalism examines current analyses of the global capitalist market economy **The Labour Market Impact of the EU Enlargement** Floro Ernesto Caroleo,Francesco Pastore,2010-03-18 Floro Ernesto Caroleo and Francesco Pastore This book was conceived to collect selected essays presented at the session on The Labour Market Impact of the European Union Enlargements A New Regional Geography of Europe of the XXII Conference of the Italian Association of Labour Economics AIEL The session aimed to stimulate the debate on the continuity fracture of regional patterns of development and employment in old and new European Union EU regions In particular we asked whether and how different the causes of emergence and the evolution of regional imbalances in the new EU members of Central and Eastern Europe CEE are compared to those in the old EU members Several contributions in this book suggest that a factor common to all backward regions often neglected in the literature is to be found in their higher than average degree of structural change or more precisely in the hardship they experience in coping with the process of structural change typical of all advanced

economies In the new EU members of CEE structural change is still a consequence of the continuing process of transition from central planning to a market economy but also of what Fabrizio et al 2009 call the second transition namely that related to the run up to and entry in the EU

French Public Finances Mr.Karl Friedrich Habermeier,Fabrice Lenseigne,1998-02-01

Over the coming decades demographic developments will lead to a significant increase in public outlays on pensions and health care relative to national income This study extends earlier work by considering the adverse effects of taxation on the determinants of economic growth in particular investment productivity growth and labor force participation Available empirical evidence suggests that these adverse effects could well be sizable and that conventional estimates of the adverse effects of population aging probably severely underestimate their impact on the public finances and economic performance The paper uses stochastic simulations to examine the robustness of the results to changes in parameter values It also provides quantitative simulations of various reform options including mainly an increase in the effective retirement age and flanking labor market measures

Inequality in the Workplace Jiyeoun Song, 2014-02-25 The past several decades have seen widespread reform of labor markets across advanced industrial countries but most of the existing research on job security wage bargaining and social protection is based on the experience of the United States and Western Europe In *Inequality in the Workplace* Jiyeoun Song focuses on South Korea and Japan which have advanced labor market reform and confronted the rapid rise of a split in labor markets between protected regular workers and underprotected and underpaid nonregular workers The two countries have implemented very different strategies in response to the pressure to increase labor market flexibility during economic downturns Japanese policy makers Song finds have relaxed the rules and regulations governing employment and working conditions for part time temporary and fixed term contract employees while retaining extensive protections for full time permanent workers In Korea by contrast politicians have weakened employment protections for all categories of workers In her comprehensive survey of the politics of labor market reform in East Asia Song argues that institutional features of the labor market shape the national trajectory of reform More specifically she shows how the institutional characteristics of the employment protection system and industrial relations including the size and strength of labor unions determine the choice between liberalization for the nonregular workforce and liberalization for all as well as the degree of labor market inequality in the process of reform
