Social Rights and the Constitutional Moment Koldo Casla,Magdalena Sepúlveda,Vicente Silva,Valentina

Contreras,2022-06-02 Chile's constitutional moment began as a popular demand in late 2019. This collection seizes the opportunity of this unique moment to unpack the context, difficulties, opportunities and merits to enhance the status of environmental and social rights, health, housing, education and social security in a country's constitution. Learning from Chilean and international experiences from the Global South and North and drawing on the analysis of both academics and practitioners, the book provides rigorous answers to the fundamental questions raised by the construction of a new constitutional bill of rights that embraces climate and social justice. With an international and comparative perspective, chapters look at issues such as political economy, the judicial enforceability of social rights, implications of the privatisation of public services and the importance of active participation of most vulnerable groups in a constitutional drafting process. Ahead of the referendum on a new constitution for Chile in the second half of 2022, this collection is timely and relevant and will have direct impact on how best to legislate effectively for social rights in Chile and beyond. **Comparative**

Constitutional Law in Africa Rosalind Dixon, Tom Ginsburg, Adem Abebe, 2022-12-06. This timely book is a crucial resource on the rich diversity of African constitutional law, making a significant contribution to the increasingly important field of comparative constitutional law from a historically understudied region. Offering an examination of substantive topics from multiple jurisdictions, it emphasises issues of local importance while also providing varied perspectives on common challenges across the continent. **Regional Human Rights Systems**

Christina M. Cerna, 2016-12-05. Over the past sixty years, the regional human rights systems have surpassed the UN human rights bodies in affording protection to the victims of human rights violations. Most of these systems have courts that are empowered to issue legally binding judgments and reparations for violations of human rights, which states have been unwilling to accord the UN system. The essays selected for this volume examine the structure and functioning of the principal regional human rights systems in the world today: 1. the Inter American Commission and Court of Human Rights; 2. the European Court of Human Rights; 3. the African Commission and Court of Human and Peoples Rights; and 4. the ASEAN Intergovernmental Human Rights Commission. These systems guarantee primarily civil and political rights. Central to all four systems is the necessity of a democratic form of government to guarantee these rights, although not all governments parties to these regional treaties are democracies. These articles trace the history of these systems, in particular the expansion of their membership to include almost all independent countries in the region and their evolution towards recognition of a right to democracy. **Equality and Non-discrimination**

in South Africa Shadrack Gutto, 2001. This study explores and critiques law and law making in the nascent constitutional democracy in the new South Africa, with a focus on the complex roles of the executive, parliament, political parties, the media and civil society. The capacity and potential in the judiciary and the legal profession in promoting and protecting values and rights of equality and non discrimination is examined. Substantive equality and non discrimination law in theory and in practice is considered critically from a broad historical and social context that highlights areas of race, gender, disability

harassment and hate speech socio economic rights and legal services International human rights law and comparative law aspects are skillfully interwoven in this pioneering scholarly work **Human Rights as War by Other Means** Jennifer Curtis,2014-07-28 Combining firsthand ethnographic reportage with historical research Human Rights as War by Other Means traces the use of rights discourse in Northern Ireland s politics from the local civil rights campaigns of the 1960s to present day activism for truth recovery and LGBT equality **Security Rights in Intellectual Property** Eva-Maria Kieninger,2020-06-11 This book discusses the main legal and economic challenges to the creation and enforcement of security rights in intellectual property and explores possible avenues of reform such as more specific rules for security in IP rights and better coordination between intellectual property law and secured transactions law In the context of business financing intellectual property rights are still only reluctantly used as collateral and on a small scale If they are used at all it is mostly done in the form of a floating charge or some other all asset security right The only sector in which security rights in intellectual property play a major role at least in some jurisdictions is the financing of movies On the other hand it is virtually undisputed that security rights in intellectual property could be economically valuable or even crucial for small and medium sized enterprises especially for start ups which are often very innovative and creative but have limited access to corporate financing and must rely on capital markets securitization capital market Therefore they need to secure bank loans yet lack their own traditional collateral such as land **Making Sense of Human Rights** James W. Nickel,1987 This fully revised and extended edition of James Nickel s classic study explains and defends the contemporary conception of human rights Combining philosophical legal and political approaches Nickel explains international human rights law and addresses questions of justification and feasibility New revised edition of James Nickel s classic study Explains and defends the conception of human rights found in the Universal Declaration of Human Rights 1948 and subsequent treaties in a clear and lively style Covers fundamental freedoms due process rights social rights and minority rights Updated throughout to include developments in law politics and theory since the publication of the first edition New features for this edition include an extensive bibliography and a chapter on human rights and terrorism **Economic Rights** Shareen Hertel,Lanse Minkler,2007-08-20 This book assesses economic rights defined as the right to a decent standard of living the right to work and the right to basic income support for people who cannot work It explains how economic rights evolved historically how they are measured and how they can be implemented internationally The book includes chapters by leading scholars in economics law and political science Unlike many other books on the subject this one includes a substantial introduction and is tightly organized around three themes concepts measurement and policy implementation of economic rights
