Economic Transformation In Central Europe A Progreb Report:

Economic transformation in Central Europe Richard Portes, 1994 Economic Reforms and Capital Markets in Central Europe Ken Morita, 2017-11-30 Is the economic reform of Central Europe influenced by or an influence upon capital markets Where does globalization fit in Ken Morita's pioneering work investigates the relationship between the systemic transition of Central European economies and capital markets in particular the commodity futures markets and speculation Global Long-term Economic Growth and the Economic Transformation of Poland and Eastern Europe Stanisław Gomułka, 2023 One of the characteristic facts concerning the catching up countries is the exceptionally large variation in their per capita annual rate of growth from about zero to about 10% The papers published in this monograph show that this rate is strongly dependent on the rate of investment the quality of the labour force and the quality of institutions The rate of investment is in turn dependent on the rate of domestic savings In Poland domestic savings are shown to have been and continue to be very low by international standards The trend rate of growth of about 3.7% has been about 2 pp higher than that of the most developed economies mainly thanks to the development of modern market institutions and a new private sector and partly thanks to foreign direct investments and a significant inflow of finance from the European Union EU The data also show that by far the least successful transformation in Eastern Europe has taken place in Ukraine Author's Introduction Our discussion is limited to the Technology Frontier Area TFA of the world The central question is how the area's innovation rate changes over time in the course of centuries The analysis indicates that the pattern of change of the innovation rate over time may be eventually hat shaped This Hate Shape Relationship is an empirical law that is given a theoretical interpretation It is in part a prediction based on the author's model of innovation and growth Its acceleration and steady growth segments correspond well to the past reality Its slowdown part is the central thesis of the book Transition, Cohesion and Regional Policy in Central and Eastern Europe Ruth Downes, 2019-07-17 This title was first published in 2000 One of the most comprehensive overviews of regional development and policy emergence in the Central and East European countries to date this book focuses on economic and social cohesion bringing together a wide range of empirical research and discussion material

Lessons from the Economic Transition Salvatore Zecchini, 2013-12-01 An attentive reader embarking on this book might wonder what the economic transition to which the title refers might be In this century almost all countries have gone through periods of economic transition but which period of economic history can claim to embody the notion or to represent the era of the transition Definitely no country or group of countries has experienced anything comparable to the economic upheavals that the fall of communism has brought about in a large portion of the world in just three years 1989 to 1991 No other transition to date has prompted more interest and more studies among economists academics and policy makers than has the transformation of centrally planned economies into market based systems It is this transformation that has come to define the transition Early in the transformation process in November 1990 with the support of the Centre for Co operation

with the Economies in Transition CCET I launched a conference to examine the challenges faced by these countries About six years have gone by and a new economic landscape has emerged in that part of the world The difficulties in transforming these economies have exceeded all expectations and economic performances have varied considerably across countries The time has come therefore to make a first evaluation of progress and problems with a view to extracting useful policy lessons to guide policy makers in successfully completing the transition in the near future

The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker, 2006-01-01 Frank Bönker has done a masterful job This is probably the best book available on this important subject and its significance is not limited to studies of postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy John L Campbell Slavic Review

East-Central European Economies in Transition, 1994 Distributed to some depository libraries in microfiche

Transition, Regional Development And Globalization: China And Central Europe Ken Morita, Yun Chen, 2010-02-10 Since the end of the Cold War developing a better framework to correctly recognize which direction globalization and the transition will take us has been necessary The transition economies of China and Central Europe in particular hold significant implications for East Asian integration and EU enlargement respectively This book examines the processes of transition regional development and globalization focusing on China and Central Europe and seeks to identify a new and stable international framework with improved outcomes for all Divided into three parts the book first analyzes several key economic issues concerning transition in China and Central Europe it then examines these issues from the viewpoint of international relations finally it considers potential future directions for China Japan US and EU It therefore constitutes an important contribution to our understanding of the ongoing process of globalization and ways to improve Sino Japanese EU American Central European economic relations

Transforming Post-Communist Political Economies National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Task Force on Economies in Transition, 1998-03-02 This ground breaking new volume focuses on the interaction between political social and economic change in Central and Eastern Europe and the New Independent States It includes a wide selection of analytic papers thought provoking essays by leading scholars in diverse fields and an agenda for future research It integrates work on the micro and macro levels of the economy and provides a broad overview of the transition process This volume broadens the current intellectual and policy debate concerning the historic transition now taking place from a narrow concern with purely economic factors to the dynamics of political and social change It questions the assumption that the post communist economies are all following the same path and that they will inevitably develop into replicas of economies in the advanced industrial West It challenges accepted thinking and promotes the utilization of new methods and perspectives

Institutions, Human Development and Economic Growth in Transition Economies P. Tridico, 2011-07-19 This book analyses the development path of transition economies in European

Countries and former Soviet Republics that have experienced the transformation from planned economies to market economies since the fall of the Berlin wall in 1989 It examines economic growth institutional change and human development performance

Governing the New Europe Jack Ernest Shalom Hayward,Edward Page,1995 *Governing the New Europe* provides a comprehensive and scholarly account of the changing political map of Europe as it emerges from the Cold War Exploring the variations of liberal democracy and market economy among the European states as well as current trends in these directions the contributors to this volume all leading authorities in European politics consider whether a common political model has begun to emerge out of historic European diversity Beginning with a discussion of the political economic and cultural development of Europe from a historical perspective the focus of the book shifts to an examination of the changing forms of European democracy and the move from public ownership and planning to privatization and deregulated competition Further essays analyze the challenge to national party systems and electoral performance from emerging social movements and organized interest groups Political and bureaucratic structures are also examined as is the new European constitutionalism reflected in the increasingly significant role of the judiciary Lastly attention is turned to several major themes in European politics the changing foundations of foreign and security policy the function of industrial champion firms and the retreat from the welfare state Primarily comparative in its scope *Governing the New Europe* does devote particular attention to specific major states as well as to the importance of the European Union to the political life of member and non member countries Neither exaggerating the common features of the patterns that have emerged in contemporary Europe nor capitulating to the complexity of enduring differences and instabilities between states *Governing the New Europe* will become one of the standard texts in its field Contributors Jack Hayward Jolyon Howorth Herbert Kitschelt Marie Lavigne Tom Mackie Michael Mezey Edward C Page Richard Parry Richard Rose Anthony Smith Alec Stone

Fighting Europe's Unemployment in the 1990s Herbert Giersch,2012-12-06 Following the five books listed above on an earlier page the Egon Sohmen Foundation herewith submits its sixth volume Once again it is a collection of academic papers that were discussed at a symposium sponsored by the Foundation and subsequently revised Readers not familiar with the Foundation may be interested to know that it was established in 1987 by Helmut Sohmen of Hong Kong in memory of his late brother Egon Sohmen 1930 1977 Egon Soh men was an international economist highly respected in North America and in Europe notably for his work on flexible exchange rates and on the economics of allocation and competition Born in Linz Austria and educated as an economist in Vienna Tiibingen and Cambridge Mass Egon Sohmen held teaching posts in several places M I T Yale Frankfurt Saarbriicken Minnesota and Heidelberg As an active participant in numerous international conferences and workshops he truly belonged to the international research community of his time and age cohort His lasting reputation greatly helped me to convene the active participants of this symposium

The Market Meets Its Match Alice Hoffenberg Amsden,Jacek Kochanowicz,Lance Taylor,1998 Under free market shock therapy many economies of former socialist

countries of Eastern Europe have declined Why has there been so much stagnation inflation and de industrialization and what can be done to produce a turnaround This book addresses these questions in revealing detail

Enterprise and Social Benefits After Communism Martin Rein,Barry L. Friedman,Andreas Wörgötter,1997-07-17 This 1997 book examines the evolution of firm initiated social benefits in Central East European Countries and the former Soviet Union

The Bulgarian Economy Derek C Jones,Jeffrey Miller,2019-01-22 First published in 1997 this volume examines how Bulgaria has been an early starter but a slow and often erratic mover in the path of stabilization and systemic transition This book provides a most useful account of the development to date and of the costs associated with Bulgarian strategy or lack of empirical analysis and theoretical reflections especially in comparison with other transition economies It will be of great interest to any scholar official or businessman involved not only with Bulgaria but more generally with post communist countries

Germany since Unification K. Larres,2001-02-13 A decade after the fall of the Berlin Wall the collapse of the GDR and the end of the Cold War Germany has begun to cope with the political economic social and nationalistic challenges unification has posed to its institutions and way of life in both the western and eastern part of the once divided nation The books eleven authors all experts in their field analyse the way united Germany has tackled the many unforeseen problems and highlighted the gradually emerging short and long term patterns in Germany s slow adjustment to the new realities The country has not only become more populous and territorially bigger but also burdened with much underestimated problems particularly economic and social ones The emergence of a new economic political and perhaps military superstate as feared by many in 1990 has not materialised Instead Germany today is only just coping with the domestic and external challenges of unification The economic and social integration of the former East Germany into the Federal Republic has still not been completed and may take yet another ten to fifteen years The book is a timely and well researched effort by a team of outstanding experts to evaluate Germany s performance to date It gives the reader ample and well analysed information to comprehend the many challenges facing Germany and its European neighbours in the post Cold War world

Economies in Transition Wing Thye Woo,Stephen Parker,Jeffrey Sachs,1997 In 1994 the Asia Foundation s Center for Asian Pacific Affairs began a two year project to compare the transitions of selected East European and Asian economies from centrally planned communist systems to market economies The goal was to shed light on the transition process through an understanding of the underlying economic and institutional dynamics This volume is the culmination of that project The volume is divided into three parts In the first part an overview the editors review the authors findings and highlight major themes The second part looks closely at the transition process in seven Asian and East European economies China Vietnam Mongolia Russia Poland Hungary and the Czech Republic The third part contains six comparative studies that explore key elements of the transition process The papers incorporate feedback obtained from meetings with cabinet members and high government officials conferences and seminars in Prague Ho Chi Minh City Hanoi Beijing Ulan Bator and Washington D C

Transition, Recession and Labour Supply Paolo Verme, 2020-11-25 This title was first published in 2001 Exploring the relationship between the recession and labour supply in Kazakhstan during the 1990s this volume develops an innovative new model of the transitional process in the context of the CIS It departs from conventional economic models explaining the process of transition transferring the focus of attention from labour demand to labour supply with a view to clarifying how the transitional recession has affected households and in turn how these changes modified the supply of labour Paolo Verme examines how the dynamic of the reallocation of labour between state and private enterprises has been drastically altered by the growth of self employment and also takes a much needed look at the contribution of other factors offering an original explanation of this most important economic phenomenon

The Institutional Economics of the International Economy John Adams, Anthony Scaperlanda, 2012-12-06 This book is the outgrowth of the editors conviction that there is a need for a current and comprehensive examination of international economic issues within the framework of institutional economics The volume covers the most important international topics that institutional economists historically have addressed We hope that our initiative and necessarily limited choice of subjects will encourage additional applications of institutional economic theory to the international economy For other economists the analyses contained in the volume s dozen chapters afford an opportunity to become more aware of the theoretical work and policy recommendations of institutional economists It may be surprising that to an extent evolutionary and neoclassical thinking converge and even sometimes overlap on the matter of trends and problems of the international economy A case in point is the increased attention both schools devote to the role of technology in shaping patterns of world trade and specialization In the past few decades global shifts in comparative advantages the widespread adoption of more flexible exchange rate systems and the remarkable shifts in institutional arrangements and policy regimes in the former Soviet Union and East Asia have compelled a reassessment of conventional static trade theories based on neoclassical assumptions Links among trade international investment and the diffusion of economic growth are being more closely scrutinized and better understood This volume is an effort to expand and stimulate this discourse on the economics of international relations including global economic development

European Spirit, Adaption to Market Economy and National Identity in Poland and Ukraine Matthias Reichhard, 2008-09 When at the turn of the 1980 the face of the political world was largely remodelled with the vanishment of classical East and West blocs the economical wasteland created by the failed socialist planned economic system constituted a fascinating research pasture for economists of all disciplines especially macroeconomists and specialists for economic politics At universities new faculties for transformation studies were created Authors like Rodrick

elucidated the reasons for the acute period of the COMECON alliance in form of the Soviet trade shock de Melo van den Mortel also discussed reasons for discrepancy of initial conditions. Aghion however most authors refer to the five dimensions of national culture presented by Hofstede which in the authors opinion oversimplify the complex and difficultly observable domain of culture sometimes even is entangled in contradictions like with the high masculinity femininity index for Italy. This is why the author rather oriented by the need belief value attitude continuum described by Culatta and thus developed his chapters on EU accession and
