Business Games for Management and Economics Learning by Playing presents board and video business games which combine teamwork with individual decisions based on computer models. Business games support integration of learning experience for different levels of education and between different disciplines: economics, management, technological, environmental and social studies. The work is based on experience in adaptation, design and conducting of field and board and video games played in college settings within standard schedules. Most of the games are played in Modeling and Simulation, Microeconomics, Logistics and Supply Chain Management courses. Game boards are 2 or 3 dimensional displays of subsystems, their components and phases of technological and business processes which allow customization of games of the same type for different missions in schools, universities and corporate training centers.
