chapter provides a detailed political history during transition up to late 2004 Dirk Bezemer contributes an analysis of the collapse in early 1997 of the economy and society brought about by Ponzi schemes He links the lack of productivity growth and the growth of a virtual financial sector to policy practice focusing on macro stability and state abstinence from interfering in sectoral issues policies which are still common in many transition and developing economies Albania has implemented tight monetary policy stabilised the exchange rate implemented prudent fiscal policies and achieved a significant reduction in domestic borrowing all contributing to the decline of the overall deficit Based on his expertise as an IMF analyst Treichel discusses Albania's macroeconomic prospects Nevila Konica documents the large Albanian emigration flows during transition leading to an estimated ten percent of the population working outside Albanian territory Based on her large primary survey data set she explores personal attributes that characterise emigrants as well as the extent of the brain drain She finds that remittances from emigration have been vitally important to Albania's economy by contributing to household incomes and reducing domestic unemployment Klarita Gerxhani delves deeper into the nature of the informal economy and presents key insights from her original academic research based on fieldwork in Tirana In her study of the street vending sector she traces its emergence to clear push and pull factors emigration issue in the broader context of labour market developments They analyse the large regional differences in unemployment rate the large share of long term unemployment and the persistently higher than average unemployment rate and falling participation rate for women They also conclude that emigration reduced the pressure of unemployment in the labour market and on the government's budget and contributed to financing imports consumption and investments through remittances Gloria La Cava uses her research experience as World Bank Senior Social Scientist specialising in the region to address jointly with co author Rafaella Nanetti the changing socio economic conditions that Albanians face They focus on the nature of people's vulnerability resulting from a loss of social support during the transformation years and on social programs addressing new needs World Bank analyst Malcolm Childress discusses the unfinished business of land and property reform in Albania emergence of a dynamic land market and the sustained supply response which was expected Urban property privatisation has fostered a construction boom in Tirana and along the coast and the creation of large areas of informal settlement on the outskirts of Tirana and Durres Childress provides an insightful discussion of possible consequences In the final chapter on agriculture Pasquale Pazienza highlight key problems of land fragmentation and under investment particularly in the irrigation system illuminating the current situation with the post war history of agricultural and land reforms He explores the determinants of productivity in a production function framework taking a long term view and draws out implication for what is still the largest sector in Albania's economy

The Rise Of The New Economic Powers And The Changing Global Landscape Haico Ebbers,2022-12-19 This book explores the catching up process of a group of large emerging markets the New Economic Powers This process is extremely robust and should be considered as the defining trend of our age resulting in a pivotal change in world economics and politics The outcome is that the West cannot dominate the world as it did in the previous 200 years Today s world is pluralistic and the larger emerging markets are becoming increasingly influential That is the new reality which at times caused and will cause further discomfort and uncertainty in the West In the eight chapters the viewpoints on globalization of nine New Economic Powers are discussed Each chapter is an essential element in understanding the process of globalization and the role the New Economic Powers play in it Essentially their views are guided by a fundamental different look about the role of the market and the government in society compared to what we see in the West The New Economic Powers understand the power of the market to create prosperity but at the same time emphasize the need for government interference This delicate balance is particularly visible with respect to their international trade and investment policies which bring them in conflict with Western countries and multilateral institutions such as the WTO and the IMF The book helps the reader to understand the fundamental choices made by policymakers in the New Economic Powers
