Economic Growth in Middle-Income Countries Manuel Agosin,2023-10-31 This book develops a theoretical framework unlike the conventional neoclassical paradigm for the analysis of growth and deploys analytical data to understand the main policy issues affecting developing countries with particular attention to countries which after having a spurt of growth have been unable to maintain the momentum of their economies One of the guiding ideas of the book is that

each one of these countries has its own middle income trap The book focuses the discussion on growth and development around the specific characteristics of these countries and the constraints they face to achieve rapid growth The book offers the building blocks for an integrated approach to development economics from the perspective of developing economies themselves It looks at real life constraints to growth and development such as institutions access to financing macroeconomic policies the role of foreign direct investment the pros and cons of trade and financial opening to the rest of the world education and health issues sustainable development in a world experiencing global warming productive development policies income distribution and poverty Further it offers simple growth models that go beyond the conventional neoclassical model to help the reader understand the unique challenges facing developing countries While recognizing that growth is necessary to achieve development the book argues that there are other variables that can be just as important to wellbeing and pays close attention to issues such as health education and political freedom The book summarizes the issues that are crucial for countries to be able to accelerate their growth rates and to achieve development and makes a theoretical contribution to the study of economic development particularly growth models appropriate to middle income countries Thus it will be a useful guide for researchers and academics in the field of development economics and other social sciences dealing with developing countries

Control of Cardiovascular Diseases in Developing Countries Institute of Medicine, Committee on Research, Development, and Institutional Strengthening for Control of Cardiovascular Diseases in Developing Countries, 1998-09-29

Cardiovascular diseases CVD are increasing in epidemic proportions in developing countries CVD already accounts for almost 10 percent of the developing world's burden of disease and is likely to become the developing world's leading cause of death There is reason for hope however given that huge potential exists for applying R D to control this emerging epidemic both in creating powerful new interventions such as vaccines and dietary supplements and in guiding behavior In addition a considerable body of evidence suggests that current risk factor prevention programs and low cost case management of CVD offer feasible cost effective ways to reduce CVD mortality and disability in developing country populations Large scale CVD control efforts are lacking however and thus governments and individuals are left to make choices about health and health care services without the benefit of appropriate knowledge This report was designed to promote a policy dialogue on CVD based on informed knowledge of R D opportunities that offer effective affordable and widely applicable responses in developing countries The report examines

- a the emerging burden of CVD in developing countries
- b the future worldwide burden of CVD
- c current prevention and treatment of CVD in developing countries
- d R D to support CVD control
- e opportunities and priorities for R D and the need for institutional arrangements for collaboration in facing the epidemic

Economic Development of Caricom Winston H. Griffith, 2021-10-12 It has been suggested that if CARICOM nations wish to accelerate their development they should embrace laissez faire economic policies However laissez faire economic policies have reinforced the very economic and social structures that have contributed to their low level of development furthermore laissez faire economic policies ignore social

attitudes that can greatly influence a nation's development. Moreover, low skilled labor intensive production processes which once propelled growth in CARICOM nations will no longer perform a similar role because production processes are becoming more and more knowledge skills intensive and nations wishing to attract foreign manufacturing investment or high tech services may not be able to do so without an adequate pool of the necessary knowledge skills. CARICOM nations must therefore try to accumulate a pool of knowledge skills that can help their economies become internationally competitive.

The essential role institutions play in understanding economic development has long been recognised and has been closely studied across the social sciences but some of the most high profile work has been done by economists many of whom are included in this collection covering a wide range of topics including the relationship between institutions and growth, educational systems, the role of the media and the intersection between traditional systems of patronage and political institutions. Each chapter covers the frontier research in its area and points to new areas of research and is the product of extensive workshopping and editing. The list of contributors is stellar: Steven Durlauf, Thorsten Beck, Bob Allen and includes a diverse mix of Western and non-Western male and female scholars.
