Ecosystem Concept In Natural Resource:

The Ecosystem Concept in Natural Resource Management George Van Dyne, 2012-12-02 The Ecosystem Concept in Natural Resource Management focuses on the ecosystem concept and its application to natural resource management. It presents examples of research concepts on natural resource phenomena and discusses ecosystem implications for natural resource management. It also covers range, forest, watershed, fisheries, and wildlife resource science and management. Organized into four sections encompassing 10 chapters, this volume begins with an overview of the meaning, origin, and importance of ecosystem concepts before proceeding with a discussion of field research projects that address the ecosystem concept and the ways in which the concept has been or can be useful in both research and management in natural resource sciences. More specifically, it explores major developments in the field of ecology in relation to natural resource management with examples from forest ecology. It also introduces the reader to procedures for studying grassland ecosystems, the watershed ecosystem concept, and studies of nutrient cycles, ecosystem concepts in forestry, ecosystem models in watershed management, and the implementation of the ecosystem concept in training in the natural resource sciences. This book is a valuable resource for scientists, educators, technicians, and training resource managers as well as students in resource management courses.

The Ecosystem Concept in Natural Resource Management George M. Van Dyne, 2013 *Application of Threshold Concepts in Natural Resource Decision Making* Glenn R. Guntenspergen, 2014-02-07 Natural resource managers face a complex decision-making environment characterized by the potential occurrence of rapid and abrupt ecological change. These abrupt changes are poorly accommodated by traditional natural resource planning and decision-making processes. As recognition of threshold processes has increased, contemporary models of ecological systems have been modified to better represent a broader range of ecological system dynamics. Key conceptual advances associated with the ideas of non-linear responses, the existence of multiple ecological stable states, and critical thresholds are more likely the rule than the exception in ecological systems. Once an ecological threshold is crossed, the ecosystem in question is not likely to return to its previous state. There are many examples, and a general consensus that climatic disruptions will drive now stable systems across ecological thresholds. This book provides professional resource managers with a broad general decision framework that illustrates the utility of including ecological threshold concepts in natural resource management. It gives an entry into the literature in this rapidly evolving concept with descriptions and discussion of the promising statistical approaches for threshold detection and demonstrations of the utility of the threshold framework via a series of case studies.

Managing Natural Resources for Development in Africa Washington Odongo Ochoa, P. C. Sanginga, Isaac Bekalo, 2010 The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international

research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals and reference materials in NRM is based on experiences from outside Africa. *Managing Natural Resources for Development in Africa: A Resource Book* provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM with special reference to Eastern and Southern Africa against the backdrop of prevailing local, national, regional and global social, economic and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities and the presentation of different tools, principles, approaches, case studies and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers and NRM practitioners. The book is designed to help the reader grasp in depth NRM perspectives and presents innovative guidance for research design and problem solving including review questions, learning activities and recommended further reading. The book was developed through a writeshop process by a multi-disciplinary team of lecturers from the University of Nairobi, Egerton University, Kenyatta University, the University of Zimbabwe, the University of Malawi, Makerere University and the University of Dar es Salaam. In addition, selected NRM experts from regional and international research organizations including the World Agroforestry Center (ICRAF), the Africa Forest Forum (RUFORUM), IIRR and the International Development Research Centre (IDRC) participated in the writeshop and contributed material to the book.

Ciriacy-Wantrup, James Jerome Parsons, **Researching Institutions in Natural Resource Governance** Fiona Nunan, 2024-12-06. This book presents an overview of different data collection methods and approaches that have been used to identify and analyse institutions associated with natural resource governance. Institutions as rules of the game are fundamental to the management, governance and use of renewable natural resources such as

fisheries forests and water Yet researching institutions particularly informal institutions can be challenging as they can be difficult to identify investigate and understand This volume tackles this challenge head on The innovative collection brings together contributions from different disciplines and traditions reporting and reflecting on a range of qualitative and quantitative research methods and experiences The book begins by reviewing definitions and typologies of institutions and introduces different approaches to researching institutions in natural resource governance namely the Bloomington School associated with Elinor Ostrom and Critical Institutionalism Following this each chapter provides an overview and example of application of research approaches and methods including mixed methods institutional grammar fuzzy cognitive mapping network analysis assemblage and ethnography The concluding chapter identifies key insights into institutions and lessons on researching institutions From these the chapter provides a set of observations on researching institutions in natural resource governance with the aim of providing guidance for new and experienced researchers The volume provides an essential introduction for students and researchers into the range of methods and approaches and their practical application that can be used to research institutions associated with natural resource governance Natural Resources Management: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2016-09-08 The perseverance of our natural environment has become a critical objective of environmental scientists business owners and citizens alike Because we depend on natural resources to survive uncovering methods for preserving and maintaining these resources has become a focal point to ensure a high quality of life for future generations Natural Resources Management Concepts Methodologies Tools and Applications emphasizes the importance of land soil water foliage and wildlife conservation efforts and management Focusing on sustainability solutions and methods for preserving the natural environment this critical multi volume research work is a comprehensive resource for environmental conservationists policymakers researchers and graduate level students interested in identifying key research in the field of natural resource preservation and management

Natural Resource Accounting for the National Forests : a Conceptual Framework Zhi Xu,1994 **Natural Resources And People** Kenneth A. Dahlberg,2019-03-08 In this book the authors provides an up to date assessment of research on human interactions with natural resource systems They pay attention to the interaction between theory and practice by including case studies and detailed examples involving specific natural resource systems **Conflicts in Natural Resources Management** Joanna Endter-Wada,R. J. Lilieholm,1995 **Ecosystem Concepts for Sustainable Bivalve Mariculture** National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on Best Practices for Shellfish Mariculture and the Effects of Commercial Activities in Drakes Estero, Pt. Reyes National Seashore, California,2010-03-18 U S mariculture production of bivalve molluscs those cultivated in the marine environment has roughly doubled over the last 25 years Although mariculture operations may expand the production of seafood without additional exploitation of wild populations they still depend upon and affect natural ecosystems and ecosystem services Every additional

animal has an incremental effect arising from food extraction and waste excretion Increasing domestic seafood production in the United States in an environmentally and socially responsible way will likely require the use of policy tools such as best management practices BMPs and performance standards BMPs represent one approach to protecting against undesirable consequences of mariculture An alternative approach to voluntary or mandatory BMPs is the establishment of performance standards for mariculture Variability in environmental conditions makes it difficult to develop BMPs that are sufficiently flexible and adaptable to protect ecosystem integrity across a broad range of locations and conditions An alternative that measures performance in sustaining key indicators of ecosystem state and function may be more effective Because BMPs address mariculture methods rather than monitoring actual ecosystem responses they do not guarantee that detrimental ecosystem impacts will be controlled or that unacceptable impact will be avoided Ecosystem Concepts for Sustainable Bivalve Mariculture finds that while performance standards can be applied for some broad ecosystem indicators BMPs may be more appropriate for addressing parameters that change from site to site such as the species being cultured different culture methods and various environmental conditions This book takes an in depth look at the environmental social and economic issues to present recommendations for sustainable bivalve mariculture
