Food Chains Identify the flow of energy in a food chain Distinguish between a food chain and a food web Understand the role of organisms within a food chain web Understand the importance of maintaining balance within a food chain web Predators and Prey Define predator and prey Match animals to their roles as either predator or prey or both Understand the importance of having predators and prey in balance within an ecosystem How Plants Make Food Understand that plants make food from air water sunlight and nutrients from the soil and that the process is called photosynthesis Living vs Non Living Compare living objects to non living objects Describe the characteristics of each group and classify objects into either group Biotic and Abiotic Factors Understand the meaning of biotic and abiotic Identify and compare biotic and abiotic factors within an ecosystem *Food Chains* Carol S.
