increased economic activity by indigenous peoples in many countries have been viewed to be significantly on the rise. Indigenous People and Economic Development reveals some of the characteristics of this economic activity coloured by the unique regard and philosophy of life that indigenous people around the world have. The successes, difficulties and obstacles to economic development, their solutions and innovative practices in business, all of these elements based on research findings are discussed in this book and offer an inside view of the dynamics of the indigenous societies which are evolving in a globalised and highly interconnected contemporary world. *Inalienable Properties* Jamie Baxter, 2020-05-31. As many Indigenous communities return to self governance and self determination they are taking their own approaches to property rights and community development. Based on case studies in four Indigenous communities the Westbank, Membertou, Nisga'a and James Bay Cree nations, Jamie Baxter traces how local leaders have set the course for land rights and development during formative periods of legal and economic upheaval. Drawing on new research about institutional change in organizational settings, Baxter explores when and how community leaders have sustained inalienable land rights without turning to either persuasion or coercive force, the two levers of power normally associated with political leadership. *Inalienable Properties* challenges the view that liberalized land markets are the inevitable result of legal and economic change. It shows how inalienability can result from intentional choices and is linked to structures of decision making that have long lasting consequences for communities.
