**Economic Development, Population Policy, and Demographic Transition in the Republic of Korea** Robert Repetto, Tai Hwan Kwon, Son-Ung Kim, Dae Young Kim, John E. Sloboda, 2020-03-17 Since the early 1960s the Korean experience represents a fairly extreme example of 1 development strategy the open export led labor intensive model Since the onset of rapid economic growth in the early 1960s triggered by a set of liberalizing economic policy reforms manufactured exports have expanded at an average annual rate of over 25% and have provided much of the impetus for the growth of industry and industrial employment Expanded domestic markets for intermediates and capital equipment have brought substantial import substituting industrial growth and a relative abundance of domestic and international finance Another aspect of Korea's experience which makes it a valuable case study is the fact that the country entered this period of development with an exceptionally equally distributed stock of human and physical wealth The Korean case represents close to an extreme in 2 dimensions rapid open export led labor intensive growth combined with markedly egalitarian initial social and economic structures For the student of demographic transition Korea's experience is noteworthy because of the rapidity of change The crude birthrate declined 40% between 1960-75 The mechanisms and socioeconomic determinants of this transition are questions of substantial interest to those concerned with population problems Kwon illuminates the historical antecedents to this period of rapid demographic change It was the drastic upheaval of Korean society during the wartime period that set the stage for fertility transition The dislocations and destruction of the Korean War completed the process The war greatly weakened the family structure of Korean society and put an end to early marriage In addition to affecting family values and birth control practice in Korea it directly interfered with family formation and fertility Repetto explores the channels of influence through which the economic development of Korea affected the demographic transition Kim demonstrates that the policies with the most pronounced effect of population growth and distribution have been implicit and indirect Kim and Sloboda sheds light on the economic forces behind migration through the analysis of new data on the economic characteristics of migrants

Young Kim John E Sloboda and Peter J Donaldson      **The Demographic Dividend** David Bloom, David Canning, Jaypee Sevilla, 2003-02-13 There is long standing debate on how population growth affects national economies A new report from Population Matters examines the history of this debate and synthesizes current research on the topic The authors led by Harvard economist David Bloom conclude that population age structure more than size or growth per se affects economic development and that reducing high fertility can create opportunities for economic growth if the right kinds of educational health and labor market policies are in place The report also examines specific regions of the world and how their differing policy environments have affected the relationship between population change and economic development      Demographic Developments in China China Development Research Foundation, 2014-06-05 This book assesses current developments in China's demography and discusses the changes which should be implemented to bring policy into line with the current demographic situation It argues that population planning which was introduced in the early years of the People's Republic alongside economic planning including the one child policy is no longer appropriate It considers the results of the 2010 census which showed the very significant shifts that are occurring including a declining rate of population growth ongoing growth of the number of people in the floating population an increasingly imbalanced sex ratio among newborn children and ongoing ageing of the population Besides discussing population planning policy the book also examines how policies in the fields of education health gender relations child development in rural areas and policies for the elderly and families should be adjusted to accommodate demographic developments      Demography: Analysis and Synthesis, Four Volume Set Graziella Caselli, Jacques Vallin, Guillaume Wunsch, 2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks Demography Analysis and Synthesis offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of Demography Analysis and Synthesis have explored and developed This extended examination of demographic tools not only seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship

Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations

**Demographic Change and Economic Development** Alois Wenig, Klaus F. Zimmermann, 2012-12-06 In recent years population economics has become increasingly popular in both economic and policy analysis For the inquiry into the long term development of an economy the interaction between demographic change and economic activity cannot be neglected without omitting major aspects of the problems This volume helps to further developments in theoretical and applied demographical economics covering the issues of demographic change and economic development The interaction between demographic change and economic development in the long run is one central issue One conjecture is that it is mainly the relative population pressure which controls the pace of economic development However econometric evidence presented in the book does not support this hypothesis Other papers deal with the relationships between fertility and business cycle fluctuations the timing of births the efficiency in intergenerational transfers the role of open economies for the population issue historical perspectives of demographic change in Hungary and an outline of recent developments of applied modelling using input output models programming models or econometric techniques

**The Demographic Transition and Development in Africa** Charles Teller, Assefa Hailemariam, 2011-03-04 The heated Malthusian Bosrupian debates still rage over consequences of high population growth rapid urbanization dense rural populations and young age structures in the face of drought poverty food insecurity environmental degradation climate change instability and the global economic crisis However while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub Saharan Africa are commonplace they are often misleading and belie the socio cultural change that is occurring among a vanguard of more educated youth Even within Ethiopia the second largest country at the Crossroads of Africa and the Middle East different narratives emerge from analysis of longitudinal micro level analysis as to how demographic change and responses are occurring some more rapidly than others The book compares Ethiopia with other Africa countries and demonstrates the uniqueness of an African type demographic transition a combination of poverty related negative factors unemployment disease food insecurity along with positive education health and higher age of marriage trends that are pushing this ruggedly rural and land locked population to accelerate the demographic transition and stay on track to meet most of the MDGs This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition trying to unravel some of the complexities in this vulnerable Horn of Africa country A slowly declining population growth rates with rapidly

declining child mortality very high chronic under nutrition already low urban fertility but still very high rural fertility and high population resource pressure along with rapidly growing small urban places      *Epidemiology and Demography in Public Health* Japhet Killewo, Kristian Heggenhougen, Stella R.
