**Soviet Russia (1935)** F. A Hayek, Boris Brutzkus, 2018-12-20 The ideas set forth in these pages matured in the authors mind during the early years of constructive communism in Petrograd The communist government intoxicated by its successes in the counter revolution had promised to deal promptly with all economic problems now that its hands were free to do so It was at this moment of its greatest triumphs that the author put forward his contention that the system of Marxian communism as then conceived was intrinsically unsound and must inevitably break down National Economic Planning,

Frisch,2012-12-06 It is probably true as the editor of these essays and studies by Ragnar Frisch points out that the majority of economists are not well aware of the contributions made to their discipline by Frisch This certainly does not apply however to econometricians In fact Frisch was one of the founding fathers of the Econometric Society and for the first decade of its existence its recognized leader in Europe The annual European meetings were inspired by his enthusiasm his unprecedented didactic talents and his amazingly diversified contributions It is also clear that those members of the Swedish Academy of Sciences who selected candidates for the Nobel Memorial Prize in Economic Science were fully aware of Ragnar Frisch s pathbreaking work when they decided to award him that famous Prize

While much of Frisch's earlier work has been published in his later years of activity he hardly took the time to shape the results of his work in an optimal way for wider circulation. Although an impressively lucid writer he evidently gave priority to solutions of some of the planning problems he was involved in rather than to formulating them in the characteristically crystal clear and well structured expositions of earlier years. I very much welcome therefore Dr Long's initiative to make available to a wider public within the profession some of the few texts Frisch himself produced probably under pressure from his immediate friends and colleagues.

**The Market-Planned Economy of Yugoslavia** Svetozar Pejovich, 1966

**Democratic Economic Planning** Robin Hahnel, 2021-05-31

Democratic Economic Planning presents a concrete proposal for how to organize, carry out and integrate comprehensive annual economic planning, investment planning and long run development planning so as to maximize popular participation, distribute the burdens and benefits of economic activity fairly, achieve environmental sustainability and use scarce productive resources efficiently. The participatory planning procedures proposed provide workers in self managed councils and consumers in neighbourhood councils with autonomy over their own activities while ensuring that they use scarce productive resources in socially responsible ways without subjecting them to competitive market forces. Certain mathematical and economic skills are required to fully understand and evaluate the planning procedures discussed and evaluated in technical sections in a number of chapters. These sections are necessary to advance the theory of democratic planning and should be of primary interest to readers who have those skills. However the book is written so that the main argument can be followed without fully digesting the more technical sections. Democratic Economic Planning is written for dreamers who are disenchanted with the economics of competition and greed, want to know how a system of equitable cooperation can be organized and also for sceptics who demand hard proof that an economy without markets and private enterprise is possible.
