Economic And Medical Evaluation Of Health Care Technologies:

Economic and Medical Evaluation of Health Care Technologies A. J. Culyer, B. Horisberger, 2012-12-06 All too frequently the largest effective barrier to interdisciplinary communication is jargon The symposium whose proceedings appear in the following pages sought of course to eliminate unnecessary and obscurantist jargon but it sought also to do something far more ambitious to confront the intellectual issues that are attached to the use of the word evaluation in medicine and health services To this end a carefully selected group of experts in medicine epidemiology and health economics was invited to present papers They were selected for their reputations either as conceptualizers or as empirical evaluators or the rarest breed of expert as both The context was to be empirical Three procedures were selected that had been subject to evaluation but that posed rather different types of problem The first was the treatment of renal failure by dialysis of various kinds This has a relatively long history of evaluation with a large literature and particularly raises broad policy issues within the health services of Western societies as to the size of programmes to be provided the type location and mix of treatments the selection of patients to receive treatment and the measurement of the success of various strategies The second was the treatment of duodenal ulcer by a new species of drug the histamine H₂ receptor antagonists specifically cimetidine

Standards for the Socioeconomic Evaluation of Health Care Services Bryan R. Luce, Anne Elixhauser, 2012-12-06 Over the past decades health care delivery once characterized by clearly defined relationships between medical professionals regulators and industry has become much more complex Traditional roles and relationships are changing and new decision makers are entering the scene They bring into the discussion the need for cost containment and the changing perceptions of the public with regard to the risks and benefits of health care outcomes As benefits of medical care are increasingly questioned and as scepticism and fear of advanced technologies are demonstrated by a growing body of people decision making must move beyond medical concerns to encompass economic political and sociological considerations This evolution has also affected the pharmaceutical industry Public perception of responsibility for product safety is no longer limited to regulators and physicians Manufacturers previously unencumbered by social policies governmental preoccupations or public expectations are now held accountable for product safety As a certain amount of risk acceptance is however a prerequisite for the further development of health care goods it has to be carefully balanced against society's demand for safety To weigh risks against benefits to define acceptable risk and to exclude what no longer falls within this category remain perpetual challenges Accordingly health care outcomes have to be assessed not only from a clinical point of view but also from an economic and societal perspective The assessment of drug risks and benefits has become an important political issue world wide

Decision Modelling for Health Economic Evaluation Andrew Briggs, Mark Sculpher, Karl Claxton, 2006-08-18 In financially constrained health systems across the world increasing emphasis is being placed on the ability to demonstrate that health care interventions are not only effective but also cost effective This book deals with decision modelling techniques that can be used to estimate the value for money of various interventions including medical devices surgical procedures diagnostic technologies and pharmaceuticals Particular emphasis is placed on the importance of the appropriate representation of uncertainty in the evaluative process and the implication this uncertainty has for decision making and the need for future research This highly practical guide takes the reader through the key principles and approaches of modelling techniques It begins with the basics of constructing different forms of the model the population of the model with input parameter estimates analysis of the results and progression to the holistic view of models as a valuable tool for informing future research exercises Case studies and exercises are supported with online templates and solutions This book will help analysts understand the contribution of decision analytic modelling to the evaluation of health care programmes ABOUT THE SERIES Economic evaluation of health interventions is a growing specialist field and this series of practical handbooks will tackle in

depth topics superficially addressed in more general health economics books Each volume will include illustrative material case histories and worked examples to encourage the reader to apply the methods discussed with supporting material provided online This series is aimed at health economists in academia the pharmaceutical industry and the health sector those on advanced health economics courses and health researchers in associated fields

The Influence of Economic Evaluation Studies on Health Care Decision-making J. Matthias Schulenburg, 2000 Despite the growing activity in the field of health economics very little is known about the influence of economic evaluation studies on health care decision making in the EU member states Several investigations about the impact of health economic studies on decision making have been done but most of them did not involve decision makers themselves In this work the results of the EUROMET survey are reported and discussed To allow an international perspective different types of decision makers in nine European countries were surveyed Besides the extent of knowledge about economic evaluation the actual and potential use of study results as well as barriers and incentives for the use of economic evaluation studies had been investigated

Evidence-based Decisions and Economics Ian Shemilt, Miranda Mugford, Luke Vale, Kevin Marsh, Cam Donaldson, 2011-09-22 The need for evidence based decisions that take account of both effectiveness and economics is greater now than ever Using case studies and illustrative examples throughout the authors describe how the activities and outputs of evidence synthesis systematic review economic analysis and decision making interact within and across different spheres of health and social policy and practice Expanding on the first edition the book now covers approaches to evidence synthesis that combine economics and systematic review methods in the applied fields of social welfare education and criminal justice as well as health care Written by economists and health services researchers closely involved in developing evidence based policy and practice it showcases current state of the art methodology and will be an invaluable read for all policy makers and practitioners using evidence to inform decisions analysts conducting research to support decisions and students discovering the need for evidence based decisions to incorporate economic perspectives and evidence

Measuring and Valuing Health Benefits for Economic Evaluation John Brazier, Julie Ratcliffe, Joshua Salomon, Aki Tsuchiya, 2016-11-24 There are not enough resources in health care systems around the world to fund all technically feasible and potentially beneficial health care interventions Difficult choices have to be made and economic evaluation offers a systematic and transparent process for informing such choices A key component of economic evaluation is how to value the benefits of health care in a way that permits comparison between health care interventions such as through costs per quality adjusted life years QALY Measuring and Valuing Health Benefits for Economic Evaluation examines the measurement and valuation of health benefits reviews the explosion of theoretical and empirical work in the field and explores an area of research that continues to be a major source of debate It addresses the key questions in the field including the definition of health the techniques of valuation who should provide the values techniques for modelling health state values the appropriateness of tools in children and vulnerable

groups cross cultural issues and the problem of choosing the right instrument This new edition contains updated empirical examples and practical applications which help to clarify the readers understanding of real world contexts It features a glossary containing the common terms used by practitioners and has been updated to cover new measures of health and wellbeing such as ICECAP ASCOT and AQOL It takes into account new research into the social weighting of a QALY the rising use of ordinal valuation techniques use of the internet to collect data and the use of health state utility values in cost effectiveness models This is an ideal resource for anyone wishing to gain a specialised understanding of health benefit measurement in economic evaluation especially those working in the fields of health economics public sector economics pharmacoeconomics health services research public health and quality of life research

The Economics of Medical Technology Frans F.H. Rutten, Stanley J. Reiser, 2012-12-06 Technological development has created major possibilities for the treatment of disease and for the disabled The cost of new technologies has added considerably to health care cost inflation which still exceeds the growth rates of most national economies The share of national resources devoted to health care is still rising although at a lesser pace than in the seventies Therefore the use of medical technology confronts us with some of the major dilemmas in society today The routine and intensive use of technology has transformed the most basic interpersonal and social features of medicine It has altered the means through which patient and doctor communicate about illness as well as the content of this communication changed the doctor's relationship to medical colleagues by increasing his dependence on them altered the place and form of practice by creating advantages for the centralization of medical care in complex organizations and created for society new responsibilities and powers to influence the context and scope of medical practice

Health Care Technology and Its Assessment Henry David Banta, Bryan R. Luce, 1993 Since 1945 a broad array of health care technologies have come into use including antibiotics anti hypertensive drugs oral diuretics oral contraceptives psycho pharmaceuticals corticosteroids vaccines open heart surgery genetics screening automated clinical laboratories renal dialysis and cardiac pacemakers Unquestionably these technologies have brought benefits to millions However as costs of health care have risen rapidly governments have increasingly singled out expensive technology as the culprit The result has been changes in the methods of paying for health care in most countries to control cost rises This has led to a slowing of technological change in some countries and increasing necessities to choose in all countries This timely work describes how technology assessment critically evaluates the benefits costs and social implications of technology The book presents an international perspective on health care technology's development and diffusion and explains how health care technology can enlighten difficult choices faced by policy makers clinicians and patients

Applied Methods of Cost-effectiveness Analysis in Healthcare Alastair M. Gray, Philip M. Clarke, Jane L. Wolstenholme, Sarah Wordsworth, 2010-10-14 The third volume in the Handbooks in Health Economic Evaluation series this book provides the reader with a comprehensive set of instructions and examples of how to perform an economic evaluation of a health

intervention It focuses solely on cost effectiveness analysis in health care The book is developed out of the Advanced Methods of Cost Effectiveness Analysis course taught at the University of Oxford and the four main sections mirror the four principal components of the course Outcomes Costs Modelling using decision tress and Markov models and Presenting cost effectiveness results L ABOUT THE SERIES Series editors Alastair Gray and Andrew Briggs Economic evaluation of health intervention is a growing specialist field and this series of practical handbooks tackles in depth topics superficially addressed in more general economics books Each volume includes illustrative material case histories and worked examples to encourage the reader to apply the methods discussed with supporting material provided online The series is for health economists in academia the pharmaceutical industry and the health sector those on advanced health economics courses and health researchers in associated fields The Ideas and Influence of Alan Williams Anne Mason,Adrian Towse,2008 BE REASONABLE DO IT MY WAY The sign on Alan Williams desk revealed his sense of humour a man who invited and relished debate but always recognising that intellectual pursuits were a means to a practical end Perhaps best known for his work within cost benefit analysis Alan Williams was a man of principles who developed guiding values in healthcare economics that embraced and encouraged active intellectual engagement and progression He was concerned with the philosophical and ethical issues that underpin decision making and his courageous intellectual battles bore new ideas and revised ideology This compilation of papers and further discussions arising from the Alan Williams tribute conference provides an analysis of the evolution and current status of key concepts in the field It is highly recommended for health economics professionals and students **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),
