Costas Lapavistas, Pinar Cakiroglu, 2019-08-08 The Ottoman Empire went through rapid economic and social development in the late nineteenth and early twentieth centuries as it approached its end Profound changes took place in its European territories particularly and prominently in Macedonia In the decades before the First World War industrial capitalism began to emerge in Ottoman Macedonia and its impact was felt across society The port city of Salonica was at the epicentre of this transformation led by its Jewish community But the most remarkable site of development was found deep in provincial Macedonia where industrial capitalism sprang from domestic sources in spite of unfavourable conditions Ottoman Greek traders and industrialists from the region of Mount Vermion helped shape the economic trajectory of Turkey in Europe and competed successfully against Jewish capitalists from Salonica The story of Ottoman Macedonian capitalism was nearly forgotten in the century that followed the demise of the Empire This book pieces it together by unearthing Ottoman archival materials combined with Greek sources and field research It offers a fresh perspective on late Ottoman economic history and will be an invaluable resource for scholars of Ottoman Greek and Turkish history Published in Association with the British Institute at Ankara **A Military History of the Ottomans** Mesut Uyar Ph.D., Edward J. Erickson, 2009-09-23 The Ottoman

Army had a significant effect on the history of the modern world and particularly on that of the Middle East and Europe This study written by a Turkish and an American scholar is a revision and corrective to western accounts because it is based on Turkish interpretations rather than European interpretations of events As the world's dominant military machine from 1300 to the mid 1700s the Ottoman Army led the way in military institutions organizational structures technology and tactics In decline thereafter it nevertheless remained a considerable force to be counted in the balance of power through 1918 From its nomadic origins it underwent revolutions in military affairs as well as several transformations which enabled it to compete on favorable terms with the best of armies of the day This study tracks the growth of the Ottoman Army as a professional

institution from the perspective of the Ottomans themselves by using previously untapped Ottoman source materials. Additionally, the impact of important commanders and the role of politics as these affected the army are examined. The study concludes with the Ottoman legacy and its effect on the Republic and modern Turkish Army. This is a study survey that combines an introductory view of this subject with fresh and original reference level information. Divided into distinct periods, Uyar and Erickson open with a brief overview of the establishment of the Ottoman Empire and the military systems that shaped the early military patterns.

The Mediterranean Russell King, Lindsay Proudfoot, Bernard Smith, 2014-02-25. This book addresses contemporary geographical issues in the Mediterranean Basin from a perspective that recognizes the physical characteristics and cultural interactions which link the different Mediterranean states as a recognisable geographic entity. Sixteen chapters each deal with a major geographical issue currently facing the Mediterranean, each providing an invaluable summary of the extensive but widely dispersed literature relating to Mediterranean issues. Particular emphasis is placed on the interaction between society and environment in terms of environmental management, differential regional development and its associated political, demographic, cultural and economic tensions.

Ottoman Notables and Participatory Politics John Bragg, 2014-04-16. Focussing on events in the Anatolian town of Tokat during the final two decades of the great Ottoman legal and administrative reforms known as the Tanzimat (1839-76), this book applies elements of social networking theory to analyze and assess the establishment of local governments across the Middle East. The author's key finding is that the state's efforts to centralize authority succeeded only when and where locals acted as the primary agents of change. Independent notables such as the military and the wealthy demanded wealth and state offices in exchange for meeting out reform measures according to local idioms of power. Newly created administrative bodies also offered greater social mobility to a growing multiconfessional middle class in small towns like Tokat. The state was desperate to reform but opportunistic provincials were eager to have it only on their own terms. Challenging false assumptions about the limited scope of participatory politics in the Middle East during the nineteenth century, *Ottoman Notables and Participatory Politics* will be of interest to students and scholars of Political Economy, History and Middle East Studies.

Global Traffic B. Sebek, S. Deng, 2016-01-23. This remarkable collection investigates the relations between literature and the economy in the context of the unprecedented expansion of early modern England's long distance trade. Studying a range of genres and writers both familiar and lesser known, the essays offer a new history of globalization as a complex of unevenly developing cultural, discursive and economic phenomena. While focusing on how long distance trade contributed to England's economic growth and cultural transformation, the collection taps into scholarly interest in race, gender, travel and exploration, domesticity, mapping the state and emergent nationalism and proto colonialism in the early modern period.
