Africa and international organization Y. El-Ayouty, H.C. Brooks, 2012-12-06 As an emerging Continent with a rich past dynamic present and promising future Africa has an important role to play in the development of international organization Well before Africa Year 1960 when several African States attained their independence and their rightful place in the community of nations the various movements for unity and co operation strove towards the creation of regional international organization Now more than ever before nearly two scores of African States members of the United Nations the Organization of African Unity and several other sub regional organizations and arrangements look upon international organization as an important means for safeguarding their independence enhancing African identity forging collaborative bonds amongst themselves and with the outside world and raising the standard of living for their populations

It should also be noted that the age of science and technology which is and should be based on international co operation stimulates fur ther Africa s desire to strengthen and work through international inter governmental organizations As Africa faces the 1970 s confronting the core problems of colonial ism and apartheid in its southern parts she looks upon the United Nations and the Organization of African Unity as the main vehicles for thought and action For these considerations the present book resulting from the St **The National Union Catalogs, 1963-** ,1964 Current Publications in Legal and Related Fields ,1971 Human Security Studies: Theories, Methods And Themes Sorpong Peou,2014-03-31 Human Security Studies Theories Methods and Themes examines the concept of human security from different theoretical and methodological perspectives and shows how they help shed light on the different themes of global intervention Liberal perspectives represented by global legalism and developmentalism share the optimism that human security can be ensured and enhanced through strengthening global governance Realists remain skeptical about this liberal vision While also critical of the liberal promise critical theorists and feminists offer radical perspectives on human security All these perspectives help explain the challenges of military intervention for human protection micro disarmament international criminal justice smart sanctions human rights and democracy promotion and human development **Canadian Bibliography of International Law** Christian L. Centre was established to further in depth research in the area of international law The topic for 2000 was Economic Sanctions in International Law The contents of this volume include Bilan de recherches de la section de langue française du Centre d'étude et de recherche de l'Académie par L A Silianos professeur à l'Université d'Athènes The Present State of Research carried out by the English speaking Section of the Centre for Studies and Research by Mrs L Picchio Forlati Professor of the University of Venice Annex List of Participants and Subjects Treated The Centre for Studies and Research in International Law and International Relations of The Hague Academy of International Law **Sanctions in EU Competition Law** Michael Frese, 2014-12-01 In the early decades of European integration the enforcement of EU competition law was highly centralised Virtually all enforcement actions under Articles 101 and 102 TFEU were initiated by the European Commission More recently the enforcement of EU competition law has become less centralised many would say even decentralised In 2004 essentially in an effort to increase enforcement capacity in the wake of EU enlargement the involvement of Member State competition authorities was significantly reinforced by national authorities being given power to pursue infringements of EU competition law largely on the basis of their domestic enforcement regimes This combination of decentralisation and enforcement autonomy raises questions about the relationship between EU law and national law as well as about the costs of enforcement This new book links these questions by analysing how competences in the area of sanctions are distributed between EU and national law and how this influences the costs of enforcement The author's conclusions which highlight the economic implications of the choices made by competition authorities courts and legislators will be of use to all the above in further developing EU competition policy The PhD thesis on which this book is based was declared runner up in the 2013 Concurrences Awards **The British Library general catalogue of printed books to 1975** British Library, Jim Emmett, 1981
