Economics And Power An Inquiry Into Human Relations And Markets:

Economics and Power Randall Bartlett, 1989-09-29 When a marketplace is considered in isolation the implicit conclusion is that markets are a sufficient defence against the exercise of power But market transactions do not occur in isolation they are defined by rules property rights prior events and social values This book widens the focus of traditional economic analysis to examine the ways in which people may affect each other within and around markets to give rise to real power Using conventional neoclassical assumptions about human behaviour the book begins by developing a workable concept of power allowing for its presence in a variety of forms and degrees It examines the conditions under which power would necessarily be absent from market transactions and those under which it would be possible It considers the decision processes of potential exercisers and subjects of power to determine when the exercise and success of power would be rational

Economics and Power Giulio Palermo, 2016-06-03 In the economic debate power is defined and studied mainly as an interpersonal relation occurring out of perfect competition This is a consequence of the combination of methodological individualism and the assumption of competition as a natural and everlasting coordinating mechanism operating without any sort of coercion This methodology however is not adequate to analyze the forms of social coercion that characterize capitalism *Economics and Power* criticizes the main theories of power developed in economic literature analyzing ultraliberal contractualism to radical political economics and ultimately suggesting a Marxist conception of power and coercion in capitalism Palermo's ontological argument is rooted in the philosophy of critical realism This unique volume presents his main finding as being that the essential coercive mechanism of capitalism is competition Capitalist power is not caused by a lack of competition but by the central role it plays in this mode of production Following this the chapters reconstruct a Marxian conception of power where it is analyzed as a social relation and argues that perfect competition does in fact exist under the disguise of capitalist power This book criticizes the construct of power and the underlying ideas surrounding perfect competition This book is of interest to those who study political economy as well as economic theory and philosophy

Encyclopedia of Business Ethics and Society Robert W. Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of business in society

The Philippines James K. Boyce, 1993-07-01 This book analyzes the Philippine economy from the 1960s to the 1980s During this period the benefits of economic growth conspicuously failed to trickle down Despite rising per capita income broad sectors of the Filipino population experienced deepening poverty Professor Boyce traces this outcome to the country's economic and political structure and focuses on three elements of the government's development strategy the green revolution in rice agriculture the primacy accorded to export agriculture and forestry and massive external borrowing James Boyce is the author of *Agrarian Impasse in Bengal* and co author of *A Quiet Violence View from a Bangladesh Village*

efficiency and power Promotes interdisciplinary dialogue among theories of institutions Capital, Interrupted Vinay K. Gidwani, The central Gujarat region of western India is home to the entrepreneurial landowning Patel caste who have leveraged their rural dominance to become a powerful global diaspora of merchants industrialists and professionals Investigating the Patels intriguing ascent Vinay Gidwani analyzes its broad implications for the nature of labor and capital worldwide With the Patels as his central case Gidwani interrogates established concepts of value development and the relationship between capital and history Capitalism he argues is not a frame of economic organization based on the smooth consistent operation of a series of laws but rather an assemblage of contingent and interrupted logics stitched together into the appearance of a deus ex machina Following this line of thinking Gidwani points to ways in which political economy might be freed of its lingering Eurocentrism raises questions about the adequacy of postcolonial studies critique of Marx and capitalism and opens the possibility of situating capitalism as a geographically uneven social formation in which different normative or value creating practices are imperfectly sutured together in ways that can equally impair and enable profit and accumulation Both theoretically astute and empirically informed Capital Interrupted unsettles encrusted understandings of staple concepts within the human sciences such as hegemony governmentality caste and agency and ultimately does nothing less than rethink the very constitution of capitalism Vinay Gidwani is associate professor of geography and global studies at the University of Minnesota The Crisis of America's Cities Randall Bartlett, 2015-05-20 An original work on American cities and the ongoing urban crisis Using the metaphor of the socially constructed organization of space Bartlett takes a broad view of the evolution of urban America from its historical roots to the present he then examines the way in which current policies have responded to and affected the organization of space covering housing transportation government and other urban problems He concludes with a look to the future of American cities how they will impact and be impacted on by changing commercial and labor markets by the problems of poverty and cultural change In an epilogue he explores possible ways to overcome the social dilemmas while recognizing the difficulty of this undertaking A thoroughly unique perspective to the study of cities this book is about how space is used in America and how it changes as the logic of location evolves historically Starting with the assumption that cities are fundamentally unnatural phenomena it unravels the interactions of technological advances that have made them possible and policies that have given them shape Handbook on Corruption in Higher Education Elena Denisova-Schmidt, Philip G. Altbach, Hans de Wit, 2025-09-10 This insightful Handbook provides an overview of corruption within the context of higher education Through a variety of international case studies theoretical frameworks and methodologies it examines the underlying issues involved in corruption as well as the damaging impact on scholarly cultures and the academic enterprise The Philosophy and Economics of Market Socialism N. Scott Arnold, 1994-08-18 N Scott Arnold argues that the most defensible version of a market socialist economic system would be unable to realize widely held socialist ideals and values In particular it would be responsible for widespread and systematic

exploitation The charge of exploitation which is really a charge of injustice has typically been made against capitalist systems by socialists This book argues that it is market socialism the only remaining viable form of socialism that is systematically exploitative

Media Audiences John L. Sullivan, 2019-07-24 Whether we are watching TV surfing the Internet listening to our iPods or reading a novel we all engage with media as an audience Despite the widespread use of this term in our popular culture the meaning of the audience is complex and it has undergone significant historical shifts as new forms of mediated communication have developed from print telegraphy and radio to film television and the Internet John L Sullivan s second edition of *Media Audiences Effects Users Institutions and Power* explores the concept of media audiences from four broad perspectives as victims of mass media as market constructions commodities as users of media and as producers subcultures of mass media The goal is for students to be able to think critically about the role and status of media audiences in contemporary society reflecting on their relative power in relation to institutional media producers

Security and Privacy Joseph Savirimuthu, 2016-12-05 During the last decade in particular the levels of critical engagement with the challenges posed for privacy by the new technologies have been on the rise Many scholars have continued to explore the big themes in a manner which typifies the complex interplay between privacy identity security and surveillance This level of engagement is both welcome and timely particularly in a climate of growing public mistrust of State surveillance activities and business predisposition to monetize information relating to the online activities of users This volume is informed by the range of discussions currently conducted at scholarly and policy levels The essays illustrate the value of viewing privacy concerns not only in terms of the means by which information is communicated but also in terms of the political processes that are inevitably engaged and the institutional regulatory and cultural contexts within which meanings regarding identity and security are constituted

Towards A New Social Order? Real Democracy, Sustainability & Peace Patrick Holz, 2018-05-15 This contribution argues that a long established social order has been in place since the first stratified societies in the Near Middle East which unavoidably comes with substantial economic political and environmental repercussions Part I of the book dissects the various facets of this order which is termed the social dominance paradigm while in Part II a fundamentally different order the peace paradigm is introduced The latter rests on real democracy in the Athenian sense sustainability and peace As such both paradigms function as vehicles for further analysis and research while the peace paradigm also provides a rough plan for the implementation of transformational change Typically political economic social and environmental research seeks to increase specialized knowledge Here however the overall intent is to utilize interdisciplinary evidence and connect the dots between a number defining features within seemingly modern societies The argument is that these are in fact not modern at all but follow an ancient template of power control and coordination concentrated in the hands of the few Potentially this contribution can function as a trans disciplinary methodological framework as well as an information hub for researchers in the fields of political and social sciences history

anthropology evolutionary biology organization and peace studies Practitioners who are interested in fundamental social change may also find the issues raised to be of interest As such this book provides a generalist evidence based discussion of a multi disciplinary nature that may pique the interest of both experts and amateurs alike

Agricultural Markets from Theory to Practice Barbara Harriss-White,1999-04-12 In an era of globalization private markets are expected to dominate the distribution of goods worldwide Yet surprisingly little empirical work is conducted on them The sensitive and secret nature of trading information the complexity of real markets and the lack of official data other than that on price can all cause problems This book seeks to overcome these in examining arguably the most difficult markets of all agricultural markets under conditions of underdevelopment Case studies from nine countries covering all three underdeveloped continents offer a comprehensive overview of the lessons to be learnt from field experience

Encyclopedia of Political Economy: A-K Phillip Anthony O'Hara,1999 Based on developments in political economy since the 1960s this text is a compendium of the main principles concepts problems institutions schools and policies associated with political economy It is a comprehensive introduction to the field

Envisioning Media Power Brett Christophers,2009-04-16 Envisioning Media Power develops an original geographical perspective on the nature and exercise of power in the international television economy It uses theories of political economy as the basis for a comparative empirical examination of the UK and New Zealand television markets while closely considering these markets respective relationships with the US market and its globally influential media corporations In fleshing out this geographical perspective the book critically addresses the power to produce reproduce and extract profit from territorialized media markets To understand such powers the book examines processes of creation and dissemination of industry knowledge structures of industry governance and the locational characteristics of television s operational economy Through its rigorous and creative combination of conceptual insights with empirical substance Envisioning Media Power both illuminates the fabric of television s international space economy and ultimately offers a unique theoretic argument suggesting that power knowledge and geography are inseparable not only from one another but from the process of accumulation of media capital

Markets and Power Eric A. Schutz,2016-07-01 In what ways do the actions and economic behavior of today s multinational corporations resemble the functioning and processes of the old command economics of the Soviet Union By ignoring questions about power relations in markets mainstream neoclassically oriented economists conclude that there are no significant power structures operating in market systems to control allocation and distribution This book argues to the contrary that there are fundamental and systemic power structures monopoly access to information or finance employer power etc at work in market economies which affects their ability to achieve real competition in much the same way as state controlled command economies hinder business activities Thus for example the biggest firms at the hubs of financial networks wield a kind of shaping power upon large numbers of relatively autonomous firms not only upon those that belong to the networks but also on the many firms outside them that are

Asia's Flying Geese Walter F. Hatch, 2011-03-15 In *Asia's Flying Geese* Walter F Hatch tackles the puzzle of Japan's paradoxically slow change during the economic crisis it faced in the 1990s Why didn't the purportedly unstoppable pressures of globalization force a rapid and radical shift in Japan's business model In a book with lessons for the larger debate about globalization and its impact on national economies Hatch shows how Japanese political and economic elites delayed but could not in the end forestall the transformation of their distinctive brand of capitalism by trying to extend it to the rest of Asia For most of the 1990s the region grew rapidly as an increasingly integrated but hierarchical group of economies Japanese diplomats and economists came to call them flying geese The lead goose or most developed economy Japan supplied the capital technology and even developmental norms to second tier geese such as Singapore and South Korea which themselves traded with Thailand Malaysia and the Philippines and so on down the V shaped line to Indonesia and coastal China Japan's model of capitalism which Hatch calls relationalism was thus fortified even as it became increasingly outdated Japanese elites enjoyed enormous benefits from their leadership in the region as long as the flock found ready markets for their products in the West The decade following the collapse of Japan's real estate and stock markets would however see two developments that ultimately eroded the country's economic dominance The Asian economic crisis in the late 1990s destabilized many of the surrounding economies upon which Japan had in some measure depended and the People's Republic of China gained new prominence on the global scene as an economic dynamo These changes Hatch concludes have forced real transformation in Japan's corporate governance its domestic politics and in its ongoing relations with its neighbors

The Fundamental Institutions of Capitalism Ernesto Screpanti, 2001-07-19 This book presents a radical institutional approach to the analysis of capitalism The author discusses a wide range of topics and puts forward a number of arguments that expose common ground in both neoclassical and Marxist orthodoxies
