Masahisa Fujita, Nobuaki Hamaguchi, Yoshihiro Kameyama, 2021-10-17 The central theme of this book is national land and infrastructure design in the age of the declining population and the recovery from the Great East Japan Earthquake in the affected regions in Japan. Based on the theory of spatial economics and evidence from Japanese history, the authors show that the growing economy with a population increase develops into a multi-cored and complex structure. In the population decline phase, however, such construction will be destabilized because of agglomeration economies in the central core. Then a catastrophic shock that strikes may provoke the decline of the lower rank size provincial cities and their eventual disappearance if they compete only in lower prices of staple products. Not only is the practice bad for the residents, it also leads to lower national welfare resulting from the loss of diversity and overcrowded big cities. The authors argue that small local towns can recover and will be sustained if they will endeavor in innovative production by making good use of local natural resources and social capital. Under the ongoing declining population in Japan, an undesirable concentration in Tokyo will proceed further with increasing social cost and risk. The recent novel coronavirus pandemic has highlighted that concern.

Development Economics for Developing Economies Ephraim Matanda, Hlupeko Dube, Munyaradzi Mawere, Misheck Diza, 2024-11-17 This book offers a fresh perspective on development economics specifically tailored to the unique challenges and opportunities facing developing economies. Drawing on the historical experiences of now developed nations, it explores how emerging economies, particularly in Africa, can finance their development, reduce reliance on external aid, modernise infrastructure, and alleviate poverty. The book emphasizes the crucial interplay between development economics and finance, advocating for a synergistic approach to achieve efficient and effective growth. Recognising the increasingly multidisciplinary nature of modern research, it champions a hybrid approach that merges economic and financial perspectives, fostering a more comprehensive understanding of development challenges. This book's unique contribution lies in its integrated presentation of development economics and finance within a single cohesive framework. By bridging these two critical fields, it provides valuable insights into contemporary research trends and their practical applications across diverse disciplines and global contexts. More than just a textbook, it serves as a catalyst for debate on multidisciplinary approaches to development, equipping students and practitioners with the knowledge and tools to navigate the complexities of economic growth in the developing world.

Development Sandrine Cazes,Sher Verick,2013 In developing countries labour markets play a central role in determining

 navigating a range of complex issues and debates surrounding the linkages between development processes and labour
 market outcomes This volume consists of three main thematic parts Part I provides a broad overview of key issues including
 characterising the employment challenge in developing countries and the link between economic growth distribution poverty
 and employment Drawing on the literature and country examples Part II analyses the specific topics of wages migration and
