Economics Of Radio Frequency Allocation:

The Economics of Radio Frequency Allocation Organisation for Economic Co-operation and Development, 1993 The Economics of Radio Frequency Allocation ,1993 **Management of the Radio Frequency Spectrum** Australia. Bureau of Transport and Communications Economics, 1990 Radio Spectrum Management Haim Mazar (Madjar),2016-07-11 This book presents the fundamentals of wireless communications and services explaining in detail what RF spectrum management is why it is important which are the authorities regulating the use of spectrum and how is it managed and enforced at the international regional and national levels. The book offers insights to the engineering regulatory economic legal management policy making aspects involved Real world case studies are presented to depict the various approaches in different countries and valuable lessons are drawn The topics are addressed by engineers advocates and economists employed by national and international spectrum regulators. The book is a tool that will allow the international regional and national regulators to better manage the RF spectrum and will help operators and suppliers of wireless communications to better understand their regulators Australian national bibliography, 1961 Taylor, Catherine Middleton, 2020-05-21 Our digital world is increasingly mobile All mobile communication rests upon access to one invisible essential element the radio spectrum In Frequencies Gregory Taylor and Catherine Middleton bring together diverse national perspectives to explore the current and future state of spectrum governance worldwide Spectrum is a foundational component of our contemporary communication infrastructure. The stakes are massive mobile network operators have invested billions of dollars via national spectrum auctions to claim exclusive use of prime spectrum bands Despite this windfall for national governments many people around the globe remain disconnected from mobile service yet international policy comparisons that can help us understand these disparities and differences are rare Frequencies offers illuminating case studies from around the world including Finland Mexico New Zealand India and Canada as well as forward thinking approaches to our use of radio frequencies that encourage greater public benefit and technological advancement The contributors to Frequencies represent a wide array of disciplinary backgrounds united by the common goal of maximizing the value and access to the public good that is the radio spectrum Spectrum policy affects everyone whether while listening to the radio making an emergency phone call or scrolling through social media updates Frequencies seeks to broaden the discussion about our management of this primary resource necessary for how the world shares information
