Economics The Culture Of A Controversial Science:

Economics Melvin W. Reder, 1999-01-15 Since the 1930s economists have increasingly emphasized the scientific quantitative side of their field which has directed research to topics that can be elaborated through mathematical models Economist Melvin Reder argues that this ongoing historical shift has been the result of pressure from two directions from society's demand that expert advice be based on scientific findings and from economists themselves who have wanted to view their own profession as a science Economics The Culture of a Controversial Science describes the profession of economics as it has developed in response to these challenges **Economics, Culture and Development** Eiman O.

Reinert, 2019-02-15 The Visionary Realism of German Economics forms a collection of Erik S Reinert's essays bringing the more realistic German economic tradition into focus as an alternative to Anglo Saxon neoclassical mainstream economics Together the essays form a holistic theory explaining why economic development by its very nature is a very uneven process Herein lie the important policy implications of the volume The Oxford Handbook of Economic Geography Gordon L.

The Boundaries of Technique Andrew Yuengert, 2004-01-01 In this engaging and thought provoking new work Andrew Yuengert uses the moral philosophy of Thomas Aquinas to offer a fresh perspective on the sharp distinctions currently drawn between economics and ethics In contrast to modern philosophical approaches which focus on the contrast between is and ought statements a Thomistic analysis begins with the actions of economic researchers This approach reconciles two popular extreme positions economics as ethical at every turn and economics as morally neutral Exploring recent controversies over the role of ethics in economics The Boundaries of Technique encourages scholars and students to discover and debate the ways in which economics is insulated from ethics and the ways in which it is dependent upon it Ultimately by bringing readers to a deeper awareness of the intrinsic involvement of the individual and the responsibility of moral choice Yuengert makes an invaluable contribution to the study and practice of economics

The Other Canon of Economics, Volume 2 Erik Reinert, 2024-02-13 Other Canon

Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s development strategies that Reinert argues should be seen as industrial strategies

Liberalism against Liberalism Javier Aranzadi, 2006-04-18 The defence of the market and economic freedom have been the main objectives of the investigations by liberal thinkers such as Milton Friedman Gary Becker F Hayek and L Von Mises Bearing in mind that the first two economists are the maximum exponents of the Chicago School and the last two of the Austrian School it is often concluded that the theories of both schools are similar This book demonstrates that in reality there is no convergence or complementariness to be found between both schools of thought The anthropological categories contributed by Mises allow us to understand all human phenomena from the view of the man who acts In this view economics is part of a philosophical system whose core is the creative capacity of people Becker s work on the other hand is concentrated on the generalization of the homo economicus as the basis for explaining all human behaviour He generalizes the maximizing principle to explain all human reality and extends the scope of the application of a so called scientific and technical view of the world In this key volume an important read for those in the fields of economic theory and political economy Javier Aranzadi argues in essence that the tradition of Hayek and Mises encourages a humanistic liberalism whereas the Chicago School proposes only a technical humanism

40 Years of Research on Rent Seeking 2 Roger D. Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades

They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included
