Findings in the Economics of Aging David A. Wise, 2010-04-15 The baby boom generation's entry into old age has led to an unprecedented increase in the elderly population The social and economic effects of this shift are significant and in *Research Findings in the Economics of Aging* a group of leading researchers takes an eclectic view of the subject Among the broad topics discussed are work and retirement behavior disability and their relationship to the structure of retirement and disability policies While choices about when to retire are made by individuals these decisions are influenced by a set of incentives including retirement benefits and health care and this volume includes cross national analyses of the effects of such programs on these decisions Furthermore the volume also offers in depth analysis of the effects of retirement plans employer contributions and housing prices on retirement It explores well established relationships among economic circumstances health and mortality as well as the effects of poverty and lower levels of economic development on health and life satisfaction By combining micro and macro evidence this volume continues a tradition of expanding the research agenda

on the economics of aging **Perspectives on the Economics of Aging** David A. Wise, 2004-07-10 Contributors to this volume investigate several important issues including the accumulation of wealth and the relationship between health and financial prosperity the changes in savings behaviour and investment priorities and the effects of legislative changes in the 1980s and the booming stock market of the 1990s *Explorations in the Economics of Aging* David A. Wise, 2011-05 This is the thirteenth in a series of NBER volumes on the Economics of Aging Introduction **The Economics of Individual and Population Aging** Robert L. Clark, Joseph J. Spengler, 1980-04-30 This study aims to identify and describe the principle economic issues associated with individual and population ageing In addition the study surveys and assess the existing knowledge including research by scholars of many countries and different fields in the social sciences of the economic and social problems associated with ageing Although the study covers a wide range of issues it focuses primarily on the economic complexities of individual ageing and the macro economic problems that arise from age structure changes in the population The authors giving examples from many countries trace the development of concern for population ageing and examine theoretical concepts and changing demographic conditions Cross national econometric studies are cited along with time series and cross sectional research on individual countries In assessing the state of the literature on the economic problems of ageing the authors have attempted to indicate fruitful avenues for further research **Developments in the Economics of Aging** David A. Wise, 2009-08-01 The number of Americans eligible to receive Social Security benefits will increase from forty five million to nearly eighty million in the next twenty years Retirement systems must therefore adapt to meet the demands of the largest aging population in our nation s history In *Developments in the Economics of Aging* David A Wise and a distinguished group of analysts examine the economic issues that will confront policy makers as they seek to design policies to protect the economic and physical health of these older Americans The volume looks at such topics as factors influencing work and retirement decisions at older ages changes in life satisfaction associated with retirement and the shift in responsibility for managing retirement assets from professional money managers of traditional pension plans to individual account holders of 401 k s *Developments in the Economics of Aging* also addresses the complicated relationship between health and economic status including why health behaviors vary across populations and how socioeconomic measures correlate with health outcomes **Aging in the United States and Japan** Yukio Noguchi, David A. Wise, 2008-04-15 Japanese and American economists assess the present economic status of the elderly in the United States and Japan and consider the impact of an aging population on the economies of the two countries With essays on labor force participation and retirement housing equity and the economic status of the elderly budget implications of an aging population and financing social security and health care in the 1990s this volume covers a broad spectrum of issues related to the economics of aging Among the book s findings are that workers are retiring at an increasingly earlier age in both countries and that as the populations age baby boomers in the United States will face diminishing financial resources as the ratio of retirees to

workers sharply increases The result of a joint venture between the National Bureau of Economic Research and the Japan Center for Economic Research this book complements *Housing Markets in the United States and Japan 1994* by integrating research on housing markets with economic issues of the aged in the United States and Japan *Insights in the Economics of Aging* David A. Wise, 2017-03-20 The fraction of the population over age sixty five in many developed countries is projected to rise in some cases sharply in coming decades This has drawn growing interest to research on the health and economic circumstances of individuals as they age Many individuals are retiring from paid work yet they are living longer than ever Their well being is shaped by their past decisions such as their saving behavior as well as by current and future economic conditions health status medical innovations and a rapidly evolving landscape of policy incentives and supports The contributions to *Insights in the Economics of Aging* uncover how financial physical and emotional well being are integrally related The authors consider the interactions between financial circumstances in later life such as household savings and home ownership physical circumstances such as health and disability and emotional well being including happiness and mental health
