Economics Of The Transformation Period With Lenins Critical Remarks:

Economics of the Transformation Period Nikolai Ivanovich Bukharin, 1971 *Lenin's Terror* James Ryan, 2012 This book explores the development of Lenin's thinking on violence throughout his career from the last years of the Tsarist regime in Russia through to the 1920s and the New Economic Policy and provides an important assessment of the significance of ideological factors for understanding Soviet state violence as directed by the Bolshevik leadership during its first years in power. It highlights the impact of the First World War in particular its place in Bolshevik discourse as a source of legitimating Soviet state violence after 1917 and explains the evolution of Bolshevik dictatorship over the half decade during which Lenin led the revolutionary state. It examines the militant nature of the Leninist worldview, Lenin's conception of the revolutionary state, the evolution of his understanding of dictatorship of the proletariat and his version of just war. The book argues that ideology can be considered primarily important for understanding the violent and dictatorial nature of the early Soviet state at least when focused on the party elite but it is also clear that ideology cannot be understood in a contextual vacuum. The oppressive nature of Tsarist rule, the bloodiness of the First World War and the vulnerability of the early Soviet state as it struggled to survive against foreign and domestic opponents were of crucial significance. The book sets Lenin's thinking on violence within the wider context of a violent world.

Lenin and the Logic of Hegemony Alan Shandro, 2014-07-10 In *Lenin and the Logic of Hegemony* by means of a careful textual and contextual analysis of the writings of Lenin and his Marxist contemporaries Alan Shandro traces the contours of the anti-metaphysical event identified by Gramsci in Lenin's political practice and theory, the emergence of the philosophical fact of hegemony. In so doing he effectively disputes conventional caricatures of Lenin's role as a political actor and thinker and unearths the underlying parameters of the concept of hegemony in the class struggle. He thereby clarifies the conceptual status of this pervasive but now increasingly elusive notion and the logic of theory and practice at work in it.

Theories of Surplus and Transfer (Routledge Revivals) Helen Heslop, 2014-10-10 First published in 1990 this is an analysis of the history of western economics from Petty to Supply Side through the prism of the controversies over productive labour and its product. It treats the early economists' productive/unproductive dichotomies as shorthands for many other sets of distinctions relevant for boundaries, value and welfare. Central to the debates is the question of whether the economy is said to generate a surplus. Economists and politicians with views on these matters include the Physiocrats, Smith and Ricardo, Marx and his Soviet and western admirers, the marginalists, Keynes, Polanyi, Becker and Reagan. The book maps the shifting emphases that economists and social thinkers have placed on markets and mode of production generally. This reissue will be useful to students of economic thought, welfare theory and policy, growth economics and economic systems.

Reification Timothy Bewes, 2020-05-05 Of all the concepts which have emerged to describe the effects of capitalism on the human world, none is more graphic or easily grasped than reification, the process by which men and women are turned into objects, things. Arising out of Marx's account of commodity fetishism, the

concept of reification offers an unrivalled tool with which to explain the real consequences of the power of capital on consciousness itself. Symptoms of reification are proliferating around us from the branding of goods and services to racial and sexual stereotypes, all forms of religious faith, the growth of nationalism and recent concepts like spin and globalization. At such a time the term ought to enjoy greater critical currency than ever. Recent thinkers however have expressed deep reservations about the concept and the term has become marginalized in the humanities and social sciences. Eschewing this trend, Timothy Bewes opens up a new formulation of the concept, claiming that in the highly reflective age of late capitalism reification is best understood as a form of social and cultural anxiety; further that such an understanding returns the concept to its origins in the work of Georg Lukács. Drawing upon writers including Kierkegaard, Herman Melville, Proust and Flannery O'Connor, he outlines a theory of reification which promises to unite politics with truth, art with experience and philosophy with real life.

100 Years of Permanent Revolution Bill Dunn, Hugo Radice, 2006-05-20. One hundred years on from their first appearance in Leon Trotsky's *Results and Prospects*, this is a critical re-evaluation of two key Marxist theories: uneven and combined development and permanent revolution. It brings together a formidable array of Marxist intellectuals from across the world, including Daniel Bensaid, Michael LeWey, Hillel Ticktin and Patrick Bond. Marx saw societies progressing through distinct historical stages: feudal, bourgeois and communist. Trotsky advanced this model by considering how countries at different stages of development influence each other. Developed countries colonise less developed countries and exploit their people and resources. Elsewhere, even as many were kept in poverty, the influence of foreign capital and state-led industrialisation produced novel economic forms and prospects for political alliances and change. The contributors show how 100 years on from its original publication, Trotsky's theories are hugely useful for understanding today's globalised economy dominated by US imperialism.

Discovering Imperialism Richard B. Day, Daniel Gaido, 2011-11-25. This volume assembles the main documents of the international debate on imperialism that took place in the Second International during the period 1898-1916. It assesses the contributions of the individual participants, placing them in the context of contemporary political debates.

Profiting Without Producing Costas Lapavistas, 2014-01-14. Financialization is one of the most innovative concepts to emerge in the field of political economy during the last three decades, although there is no agreement on what exactly it is. *Profiting Without Producing* puts forth a distinctive view, defining financialization in terms of the fundamental conduct of non-financial enterprises, banks and households. Its most prominent feature is the rise of financial

profit in part extracted from households through financial expropriation Financialized capitalism is also prone to crises none greater than the gigantic turmoil that began in 2007 Using abundant empirical data the book establishes the causes of the crisis and discusses the options broadly available for controlling finance Authority, Power and Policy in the USSR T. From Marx to Mises David Ramsay Steele, 2013-12-15 In 1920 Ludwig von Mises proclaimed that all attempts to establish socialism would come to grief for reasons of informational efficiency At first socialists and economists took Mises's argument seriously but by the end of the Second World War a consensus prevailed that Mises had been discredited More recently that consensus has been rapidly reversed it is now widely agreed that Mises was right Yet the momentous implications of the Mises argument for economics politics culture and philosophy remain largely unexplored From Marx to Mises is a clear penetrating exposition of the economic calculation debate and a scrutiny of some of the broader issues it raises *Catalog of Copyright Entries.
