

The Effects Of Globalization On Local Cultures And Economies

For example, traditional arts and crafts may be mass-produced for the tourist market, leading to the loss of authenticity and meaning associated with these cultural practices. This can also result in the exploitation of local cultural resources and knowledge, as global corporations capitalize on local cultural practices for profit, often without adequately compensating local communities.

Economies And Cultures:

Economies And Cultures Richard R Wilk,1996-10-07 This text is the first synthesis of modern economic anthropology for advanced undergraduates and beginning graduate students Tracing the history of the dialogue between anthropology and economics Wi *Cultures of Economy, Economics of Culture* T. J. Jackson Lears,Jens van Scherpenberg,2004 Papers presented at an international conference of the Bavarian American Academy 2002 **Economics, Culture and Social Theory** William A. Jackson,2009 the book is excellent in setting out and explaining a fundamental critique of economics one moreover that has been missed by most other current critics of the field Making this case is an achievement Hopefully it will have a greater impact than its author probably expects Journal of Cultural Economics Economics evolved by perfecting the taking of culture out of its reductionist and virtual world But culture has recently been reintroduced both as a sphere of application for an otherwise unchanging methodology and as a weak form of acknowledging that the economic alone is inadequate as the basis even for explaining the economy This volume is an essential critical starting point for understanding the changing relationship between economics and culture and in offering a more satisfactory and stable union between the two Ben Fine University of London UK Economics Culture and Social Theory examines how culture has been neglected in economic theorising and considers how economics could benefit by incorporating ideas from social and cultural theory Orthodox economics has prompted a long line of cultural criticism that goes back to the origins of economic theory and extends to recent debates surrounding postmodernism William A Jackson discusses the cultural critique of economics identifies the main arguments and assesses their implications Among the topics covered are relativism and realism idealism and materialism agency and structure hermeneutics semiotics and cultural evolution Drawing from varied literatures notably social and cultural theory the book stresses the importance of culture for economic behaviour and looks at the prospects for a renewed and culturally informed economics The book will be invaluable to heterodox economists and to anyone interested in the links between culture and the economy It takes an interdisciplinary approach arguing against the isolation of economics and will therefore hold wide appeal for social scientists working in related fields as well as for economists specialising in cultural economics and economic methodology **The Cultural Economy of Cities** Allen J Scott,2000-08-11 Culture is big business It is at the root of many urban regeneration schemes throughout the world yet the economy of culture is under theorized and under developed In this wide ranging and penetrating volume the economic logic and structure of the modern cultural industries is explained The connection between cultural production and urban industrial concentration is demonstrated and the book shows why global cities are the homelands of the modern cultural industries This book covers many sectors of cultural economy from craft industries such as clothing and furniture to modern media industries such as cinema and music recording The role of the global city as a source of creative and innovative energy is examined in detail with particular attention paid to Paris and Los Angeles Corporate Culture as a Formula for Company Success in the

Digital Economy Ashot Khachaturyan, 2025-02-21 Corporate culture plays a key role in the success of any organization influencing not only the internal atmosphere but also the external perception of the company. It forms the basis on which relations between employees and management are built, determines the management style and approach to solving work tasks. The importance of creating and maintaining a healthy corporate culture cannot be overestimated as it directly affects employee motivation, labor productivity and the overall success of the company. Corporate culture is always a priori unique for each company. This model of optimal interaction between all employees can take years to build; it all depends on the interest of the management. Its main task is to create a comfortable environment for result orientation. A close knit team of like minded people united by a common corporate culture is able to show true professionalism and work miracles to achieve their goals. In the digital economy there are fundamentally new requirements for corporate culture institutions. The digital economy is not only a large scale technological breakthrough but also the corresponding creation of a new culture values and behavioral norms. The target model of digital human capital competencies assumes the presence of cognitive skills, self development, organization management skills, achievement of results, solving non standard tasks, adaptability, social and behavioral skills, communication, interpersonal skills, intercultural interaction and digital skills, systems building, information management. The digitalization of the economy requires radical changes in both the personality and skills of the employee. The situation is aggravated by the fact that the new generation is constantly faced with emerging and disappearing professions and technological innovations shorten the life span of any profession. The need to participate in the global digital economy requires training not only programmers and engineers but also fundamentally new types of specialists. At the same time the use of digital technologies will lead to a reduction in employment in many professions and in the future even to their complete disappearance.

Cultural Economy and Television in Jamaica and Ghana Deborah Hickling

Gordon, 2020-11-25 This book proposes contemporary decolonization as an approach to developing cultural economies in the Global South. It presents the account of the transformation of television in Jamaica and Ghana to audiovisual subsectors from cultural institutions to cultural industries and then subsectors of emerging cultural economies as representative case studies. Global changes are presented within five organizing phenomena: philosophical, ideological and economic change and their impact on governance and the operational transformation of the television sectors of Jamaica and Ghana. This book represents the first critical examination and comparison of cultural and creative industries (CCI) and economy concepts in the Caribbean and Africa. It is an original contribution to the development of strategies that influence processes, structures and policies related to the cultural economy concept and those required to improve television industries. This process of describing culturally specific characteristics of CCI is designed to be applicable to the CCI of developing countries including those in Africa and the Caribbean where interpretations and implementation suited for advanced industrial nations have been insufficiently questioned and challenged.

Cultural Economy Paul du Gay, Michael Pryke, 2002-01-31 Phrases such as corporate culture market culture and the knowledge economy have now become familiar clarion calls in the world of work They are calls that have echoed through organizations and markets Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution In particular the once clean divide that placed the economy dealt with mainly by economists on one side and culture addressed chiefly by those in anthropology sociology and the other cultural sciences on the other can no longer hold This volume presents the work of an international group of academics from a range of disciplines including sociology media and cultural studies social anthropology and geography all of whom are involved not only in thinking culture into the economy but thinking culture and economy together
