Management of Natural Resources, Sustainable Development and Ecological Hazards C. A. Brebbia,Enzo Tiezzi,M. E. Conti,2006-11-09 The state of our planet continues to deteriorate at an alarming rate We have arrived at a situation where we need to determine urgent solutions before we reach a point of irreversible deterioration Much has been written in different contexts about reaching sustainability but the concept itself needs to be defined in the framework of all different disciplines in order to arrive at optimal solutions Hence this book is essentially trans disciplinary in order to find appropriate sustainable solutions involving collaboration across a wide range of disciplines Publishing papers from the First International Conference on Management of Natural Resources Sustainable Development and Ecological Hazards the book features articles encompassing topic areas

such as Water Resources Air Soil Ecology Health Risk Energy Planning and Development Political and Social Issues The Re Encounter New Technologies Learning from Nature Safety **Design and Nature III** C. Sustainability Assessment

Bob Gibson,Selma Hassan,James Tansey,2013-06-17 Sustainability assessment is now emerging as a more transparent comprehensive integrated and far sighted approach to decision making Its basic demand is that all significant undertakings must make a positive contribution to sustainability To apply this test decision makers need criteria based on the core requirements of sustainability and the particularities of the context As well they need appropriately designed public processes guidance on the weighing of alternatives trade offs and compromises a supportive policy framework suitable tools and inspiring examples Drawing from transdisciplinary theory and practical case experience the book addresses these matters and many of the surrounding controversies While sustainability assessment must always be adjusted to particular circumstances the generic approach set out in this book is applicable virtually anywhere
