Economic Assessment Of Election Programmes Does It Make Sense:

Economic Assessment of Election Programmes Johan J. Graafland, Arie P. Ros, 2012-12-06 In the Netherlands the election programmes of the political parties are assessed for their economic impact by an independent economic bureau The result of this analysis is published just before the elections take place In this way the voter will be protected against political parties that try to win the elections by making popular but unfounded financial promises Economic Assessment of Election Programmes contains contributions of several distinguished economists and philosophers who consider the gains of this procedure to society Does the analysis by the Netherlands Bureau for Economic Policy Analysis CPB raise the democratic quality of the elections Can we really be confident in the tools of economics The last section of this volume states the opinion of representatives of the political parties This part also clarifies why political parties voluntarily participate in this process and how they perceive the role division between the political party and CPB *International and Interdisciplinary Insights into Evidence and Policy* Linda Hantrais, Ashley Lenihan, Susanne Macgregor, 2018-02-05 Contributors to this highly original book address the many questions raised by researchers and policymakers about the complex and often uneasy relationship between evidence and policy from an international and interdisciplinary perspective They explore both the institutions acting as evidence brokers and the different methods used to collect assess and use evidence in a variety of national and international settings by drawing on their experience of working in international contexts and in different disciplinary and policy environments and in some cases analysing their own involvement in the evidence based policy process The policy areas covered range from national and state level economic and social policies more generally to specific areas of intervention such as EU bio fuels targets the Active Ageing Index mental health and media the construction of second language learning policies microfinance and alcohol policy The authors highlight the strengths and weaknesses the use and abuse or successes and failures of different institutional and methodological approaches to evidence based policy They consider what elements of the lessons learned might be transferable across national and cultural boundaries and if so under what conditions This book was originally published as a special issue of Contemporary Social Science **Economics, Ethics and the Market** Johan J. Graafland, 2006-10-19 This text introduces readers to the relationship between economics and ethics and to the application of economic ethics in the evaluation of the market The insights it provides help to develop the reasoning and analytical skills needed to criticize economic analysis as well as to apply ethical concepts to moral issues in economic policy *The Politics of Scientific Advice* Justus Lentsch, Peter Weingart, 2011-06-02 Controversies over issues such as genetically engineered food foot and mouth disease and the failure of risk models in the global financial crisis have raised concerns about the quality of expert scientific advice The legitimacy of experts and of the political decision makers and policy makers whom they advise essentially depends on the quality of the advice But what does quality mean in this context and how can it be achieved This volume argues that the quality of scientific advice can be ensured by an appropriate

institutional design of advisory organisations Using examples from a wide range of international case studies including think tanks governmental research institutes agencies and academies the authors provide a systematic guide to the major problems and pitfalls encountered in scientific advice and the means by which organisations around the world have solved these problems **The Practice of Forward-looking Transport Policy Assessment Studies** Jan Anne Annema,2008

Managing Transaction Costs in the Era of Globalization F. A. G. den Butter,2012 This timely book presents practical applications of modern economic theories to trade transaction costs and institutions within both business and governmental realms Frank A G den Butter explains the importance and means of keeping transaction costs as low as possible He illustrates how this transaction management can contribute to making firms and nations more competitive by exploiting gains from the division of labour and international fragmentation of production and uses relevant case studies to illustrate how value is created by reducing transaction costs Policy recommendations for strengthening the competitive position of trading nations and reducing implementation costs of government policy are presented and management methods for creating value in organizing production on a global scale are prescribed A wide ranging audience encompassing economists in academia government and business managers in industry and government and students of economics business and globalization will find this book to be a crucial reference tool **Reinventing Society with Philosophy, Religion, and Science** Neil

Wollman,Carolyn J. Love,2023-02-06 What might a society that utilizes the valuable insights from the perspectives of philosophy religion and social science look like This volume examines these principles to improve our social institutions from education social welfare government and criminal justice to the economy The contributors apply their knowledge in a hands on practical way making this book accessible to teachers police officers social workers economists congressional legislators and undergraduates Professors and students across all these areas will find a real world application of their subjects Those who think big picture about society or have a general interest in philosophy religion or social science will find ideas here that will spark their imagination and perhaps action *Handbook of Intergenerational Justice* Joerg Chet Tremmel,2006-01-01

The contributors to this volume undertake to establish the foundations and definitions of intergenerational justice and to explore its capacity to guide us in policy and public opinion judgments we must make to face unprecedented issues We are changing the biosphere and using resources to an extent never contemplated in the history of ethics Deterioration of our oceans loss of topsoil insecurity about potable water supplies the ozone hole global warming and the question about how to handle high level nuclear waste which remains lethal perhaps 400 000 years from now are some examples whose consequences reach far beyond inherited principles and policies of responsibility to others This Handbook works to open a path for debate extension of our tradition and invention of new thinking on these issues Craig Walton University of Nevada Las Vegas US More than a Handbook this collection is a landmark work showing the way to a new ethics of intergenerational responsibility It raises in the most comprehensive way the overarching ethical questions of our time What are the rights of

future generations and How might present generations establish a philosophical foundation for its responsibilities to generations to come Peter Blaze Corcoran Center for Environmental and Sustainability Education Florida Gulf Coast University US This important book provides a rich menu of history current theory and future directions in constitutional law philosophy of rights and justice and the relations of economics and politics to time institutions and the common good It is enlivened by back and forth discussions among the authors including some disagreements as well as by applications to important contemporary issues such as climate change nuclear waste and public debt Theoretic considerations are nicely balanced with examples of the means adopted in a number of countries to establish a legal foundation for protection of the quality of life for future generations Neva Goodwin Tufts University US Do we owe the future anything If so what and why Our capacity to affect the lives of future generations is greater than ever before but what principles should regulate our relationship with people who don t yet exist This Handbook offers a comprehensive survey of the key debates and pathbreaking accounts of potential ways forward both ethical and institutional Andrew Dobson The Open University UK This Handbook provides a detailed overview of various issues related to intergenerational justice Comprising articles written by a distinguished group of scholars from the international scientific community the Handbook is divided into two main thematic sections foundations and definitions of intergenerational justice and institutionalization of intergenerational justice The first part clarifies basic terms and traces back the origins of the idea of intergenerational justice It also focuses on the problem of intergenerational buck passing in the ecological context for example in relation to nuclear waste and the greenhouse effect At the same time it also sheds light on the relationship between intergenerational justice and economics addressing issues such as public debt and financial sustainability The innovative second part of the volume highlights how posterity can be institutionally protected such as by inserting relevant clauses into national constitutions Reading this volume is the best way to gain an overall knowledge of intergenerational justice an extremely salient and topical issue of our time The Handbook is an important contribution to the literature and will be of great interest to academics and graduate students as well as readers interested in wider human rights issues *Journal of Economic Literature* ,2004 **Book Review Index**

Cumulation Dana Ferguson,2005-09 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year **Scientific Advice to Policy Making** Peter Weingart,Justus Lentsch,2009-06-17 Are there connections between the structures of political systems and types of scientific advice to policymaking This volume unites case studies from the Netherlands France the European Union and the USA that provide an overview of different

institutional arrangements focusing on issues such as the independence and balance of advice Common to all is the question which forms of advice can increase the rationality of policymaking without loss of political legitimacy From the Contents Mark B Brown Federal Advisory Committees in the United States Paul den Hoed and Anne Greet Keizer The Scientific Council for Government Policy David Demortain Designing Regulatory Tools for Pharmaceutical and Food Safety in the European Union Laurent Geffroy Odile Piriou and B n dicte Zimmermann Scientific Expertise in Policy Making The Case of Work Policy in France Willem Halffman The Dutch Planning Bureaus *OECD Journal on Budgeting* ,2008 *Models and Methods for Economic Policy* Henk Don,Johan Peter Verbruggen,2006 *Journal of Institutional and Theoretical Economics* ,2003 *US Department of State Dispatch* ,1995 **In Time of War** Adam J. Berinsky,2009-10-15 From World War II to the war in Iraq periods of international conflict seem like unique moments in U S political history but when it comes to public opinion they are not To make this groundbreaking revelation In Time of War explodes conventional wisdom about American reactions to World War II as well as the more recent conflicts in Korea Vietnam the Gulf Afghanistan and Iraq Adam Berinsky argues that public response to these crises has been shaped less by their defining characteristics such as what they cost in lives and resources than by the same political interests and group affiliations that influence our ideas about domestic issues With the help of World War II era survey data that had gone virtually untouched for the past sixty years Berinsky begins by disproving the myth of the good war that Americans all fell in line to support after the Japanese bombed Pearl Harbor The attack he reveals did not significantly alter public opinion but merely punctuated interventionist sentiment that had already risen in response to the ways that political leaders at home had framed the fighting abroad Weaving his findings into the first general theory of the factors that shape American wartime opinion Berinsky also sheds new light on our reactions to other crises He shows for example that our attitudes toward restricted civil liberties during Vietnam and after 9 11 stemmed from the same kinds of judgments we make during times of peace With Iraq and Afghanistan now competing for attention with urgent issues within the United States In Time of War offers a timely reminder of the full extent to which foreign and domestic politics profoundly influence and ultimately illuminate each other **Handover of Power - Planned Economy** Andreas Seidl,2022-09-13 Planned Economy rethought Do you also sometimes worry that you or many others could be unemployed And do you also wish you were not left to fend for yourself in an emergency What can a caring welfare state look like without exploding costs This book tells us how the unemployed can work for each other in a Planned Economy to support themselves and start companies with like minded people how democratic and digital voting on consumption and working time can protect residents from deprivation and maximise leisure time how disposed goods are recycled and redundant workers are retrained to be able to switch back to the other economic forms After 20 years of work on this book series Andreas Seidl thus ventures a step towards founding a party In doing so he entertains his readers both intellectually and visionarily If this work can give you hope inspire you or move you to action it has fulfilled its purpose Available in German and English

Institutional Analysis and Economic Policy Marc R. Tool, Paul Dale Bush, 2012-12-06 The purpose of this volume is to demonstrate how contemporary institutional economic analysis can be applied to the resolution of economic problems All of the essays in this book challenge the conventional wisdom in the problem areas addressed They advocate policy positions that often run contrary to views widely held by academic economists and policy makers alike The general literature of institutional economics is unorthodox beginning with its methodological foundations and continuing through the kind of policy analysis found in these pages The orthodox tradition in economics is commonly characterized as neoclassical economics Neoclassical economics fosters the myth that only the market can efficiently allocate a society's economic resources and equitably distribute its income It provides the intellectual defense for in which free markets are championed over democratic capitalist ideology policy formation which it contends is neither efficient nor equitable For both professional economists and policy makers of a conservative political persuasion neoclassical economics writes the script for a morality play in which the market is the good guy and the government is the bad guy As such it undermines the belief that free societies can enhance economic welfare through the use of democratic processes in the formulation of economic policies

The Discourse of Financial Crisis and Austerity Darren Kelsey, Frank Mueller, Andrea Whittle, Majid KhosraviNik, 2018-12-07 This book demonstrates the importance of understanding how political rhetoric financial reporting and media coverage of austerity in transnational contexts is significant to the communicative social and economic environments in which we live It considers how aspects of moral storytelling language representation and ideology operate through societies in financial crisis and through governments that impose austerity programmes on public spending Whilst many of the debates covered here are concerned with UK economic policy and British social contexts the contributions also consider examples from other countries that reflect similar concerns on the ideological operations of austerity and financial discourse The multiple discursive contexts of austerity demonstrate the breadth of social concerns and conflicts that have developed in societies and institutions following the global economic crisis of 2008 Through its interdisciplinary focus on this topic this book provides an important contribution across multiple subject areas with shared interests in critical and analytical approaches to discourse power and language in social contexts reflecting the healthy collaborative scope of critical discourse studies as a field of research This book was originally published as a special issue of Critical Discourse Studies

Do Elections (Still) Matter? Emiliano Grossman, Isabelle Guinaudeau, 2021 This volume examines the question of whether election campaigns are relevant to policymaking shedding new light through a study of electoral priorities and the extent to which they are reflected in public policy
