Economic Integration The East African Experience By Hazlewood Arthur:

Economic Integration ,1959 *Economic Integration in Africa* Richard E. Mshomba,2017-10-12 In this work Richard E Mshomba offers an in depth analysis of economic integration in Africa with a focus on the East African Community EAC arguably the most ambitious of all the regional economic blocs currently in existence in Africa Economic Integration in Africa provides more than just an overview of regional economic blocs in Africa it also offers a rich historical discussion on the birth and death of the first EAC starting with the onset of colonialism in the 1890s and a systematic analysis of the birth growth and aspirations of the current EAC Those objectives include forming a monetary union and eventually an East African political federation This book also examines the African Union s aspirations for continent wide integration as envisioned by the Abuja Treaty Mshomba carefully argues that maturity of democracy and good governance in each country are prerequisites for the formation of a viable and sustainable East African federation and genuine continent wide integration

The East African Community Jean-Marc Trouille,Helen Trouille,Penine Uwimbabazi,2021-05-24 This book brings together African and European experts from a variety of disciplines to examine the origins and current state of the East African Community EAC Over the course of the book the authors analyse the rich tapestry of intraregional relations in East Africa the EAC s similarities with the European Union and the future challenges faced by the organisation Widely regarded as the most advanced and successful regional integration scheme in Africa the EAC is an intergovernmental organisation consisting of Burundi Kenya Rwanda Tanzania and Uganda and since 2016 South Sudan It is the oldest among Africa s regional economic communities and among the continent s most promising growth areas with a long history of integration punctuated by several false starts and traumas that have profoundly affected its body politics When initially set up the EAC model bore a striking resemblance to the process undergone by the European Union Now as the EAC continues to establish its own identity this book argues that whilst Europe s history may provide useful insights for EAC member states the EAC experience could in turn also offer lessons for the European Union Covering key dimensions such as integration co operation development trade and investments this book highlights the intricate and complex relationships between East African states and it will be of interest to researchers working on economic development international relations peace and security and African studies

Economic Integration Arthur Hazlewood,1975 International Economic Integration: Integration schemes Miroslav Jovanovic,1998 *Colonialism and Development* Michael A. Havinden,David Meredith,2002-06-01 British colonial rule of the tropics is the critical background to contemporary development issues This study of Britain s economic and political relationship with its tropical colonies provides detailed analyses of trade and policy The considerations of past successes and failures elucidate current opportunities and developments No other book covers this broad topic with such detail and clarity

Allocation of Industry in the Andean Common Market J. ter Wengel,2012-12-06 The objective of this text is to develop and implement a model for allocating the industries of the Sectorial Programs of Industrial

Development of the Andean Common Market In the Andean Common Market as in most other integration schemes among less developed countries the main expectations regarding the promotion of economic growth are based on the expectation of increased opportunities for import substituting industrialization The concern here is with the Andean Common Market in particular because it has been the economic integration scheme that has most explicitly recognized the objective of the less developed countries of taking advantage of the new opportunities for industrial ization created by the combination of the individual markets In the Andean Common Market the importance attached to the expectation of the gains from industrialization was expressed in the formulation of Sectorial Programs of Industrial Development Other integration schemes among less developed coun tries have not addressed the issue of import substituting industrialization in such detailed manner In the first section of this chapter the importance of the topic of allocating industries in integration schemes among less developed countries is discussed It is argued that the benefits to be derived from increased trade in the traditional products of the member countries are minimal Instead the member countries 1 2 ALLOCATION OF INDUSTRY IN THE ANDEAN COMMON MARKET expect the benefits from economic integration schemes to be derived from the utilization of the opportunities for industrialization created by such schemes

Regional Integration, Human Rights and Democratic Participation in Africa Karin Deichmann, 2020 The protection of human rights and popular participation on the first sight seem to contradict the often existing image of the African continent However with the foundation of the African Union in 2000 both aspects gain greater importance on regional level Besides that many subregional courts within the sphere of sub Sahara Africa partially started to develop human rights related jurisdiction In addition to that most regional economic communities nowadays provide for their own parliamentary structures The study aims to examine the several institutional structures and their competences on both regional and subregional level Besides that it provides for a profound analysis of the jurisdiction of the respective courts as well as the communications of the African Commission of Human and Peoples Rights Lastly the study focuses on the correlation between the extension of the institutions competences and the political will of the involved governments

Cooperation Among Nations Joseph M. Grieco, 1990 In *Cooperation among Nations* Joseph M Grieco offers a provocative answer to a fundamental question in world politics How does the anarchical nature of the international system inhibit the willingness of states to work together even when they share common interests Grieco examines the capacity of two leading contemporary theories modern political realism and the newest liberal institutionalism to explain national responses to the non tariff barrier codes negotiated during the Tokyo Round of international trade talks According to his interpretation of realist theory Grieco characterizes states as defensive positionals As such they often fail to cooperate because they fear that a joint endeavor while producing positive gains for all participants might also generate disparities in gains among the partners involved Grieco demonstrates that this realist concept of defensive state positionalism gives rise to a better understanding of the systemic constraints on international collaboration and of the impact

of anarchy on states than is offered by neoliberal institutionalism Drawing on previously unreported archival materials Grieco rigorously applies the two theories to an empirical analysis of the cooperative efforts of the United States and the European Community during the 1980s to regulate and reduce non tariff trade barriers through the General Agreement on Tariffs and Trade

Regionalism in Africa Daniel C Bach, 2015-12-22

Africa which was not long ago discarded as a hopeless and irrelevant region has become a new frontier for global trade investment and the conduct of international relations This book surveys the socio economic intellectual and security related dimensions of African regionalisms since the turn of the 20th century It argues that the continent deserves to be considered as a crucible for conceptualizing and contextualizing the ongoing influence of colonial policies the emergence of specific integration and security cultures the spread of cross border regionalisation processes at the expense of region building the interplay between territory space and trans state networks and the intrinsic ambivalence of global frontier narratives This is emphasized through the identification of distinctive threads of regionalism which by focusing on genealogies trajectories and ideals transcend the binary divide between old and new regionalisms In doing so the book opens new perspectives not only on Africa in international relations but also Africa's own international relations This text will be of key interest to students and scholars of African politics African history regionalism comparative regionalism and more broadly to international political economy international relations and global and regional governance
