The Legal and Regulatory Aspects of Islamic Banking Abdul Karim Aldohni, 2012-05-23 During the last ten years the Islamic banking sector has grown rapidly at an international level as well as in individual jurisdictions including the UK Islamic finance differs quite substantially from conventional banking using very different mechanisms and operating according to a different theory as it is based on Islamic law Yet at the same time it is always subject to the law of the particular financial market in which it operates This book takes a much needed and comprehensive look at the legal and regulatory aspects which affect Islamic finance law and examines the current UK and international banking regulatory frameworks which impact on this sector The book examines the historical genesis of Islamic banking looking at how it has developed in Muslim countries before going on

to consider the development of Islamic banking in the UK and the legal position of Islamic banks within English law The book explores company contract and some elements of tax law and traces the impact it has had on the development of Islamic banking in the UK before going on to argue that the current legal and regulatory framework which affects the Islamic banking sector has on certain occasions had an unintended adverse impact on Islamic banking in the UK The book also provides an overview of the Malaysian experience in relation to some of the main legal and regulatory challenges in the context of Islamic banking and finance

What Is a Slave Society? Noel Lenski, Catherine M. Cameron, 2018-05-10 The practice of slavery has been common across a variety of cultures around the globe and throughout history Despite the multiplicity of slavery's manifestations many scholars have used a simple binary to categorize slave holding groups as either genuine slave societies or societies with slaves This dichotomy as originally proposed by ancient historian Moses Finley assumes that there were just five genuine slave societies in all of human history ancient Greece and Rome and the colonial Caribbean Brazil and the American South This book interrogates this bedrock of comparative slave studies and tests its worth Assembling

contributions from top specialists it demonstrates that the catalogue of five must be expanded and that the model may need to be replaced with a more flexible system that emphasizes the notion of intensification The issue is approached as a question allowing for debate between the seventeen contributors about how best to conceptualize the comparative study of human bondage

Arab Society in Revolt Cesare Merlini, Olivier Roy, 2013-06-20. For every pithy conceptualization of complex events, there are additional lenses through which to examine them. One of the several virtues of this book is precisely that it brings different perspectives to bear on the complexity, diversity, and uncertainty of recent and current events in the Arab world. The thirteen authors concentrate on the critical social forces shaping the region: demography, religion, gender, telecommunication, connectivity, and economic structures, and they are painstakingly analyzed and evaluated from the foreword by Strobe Talbott, president of the Brookings Institution. The Arab Spring will be remembered as a period of great change for the Arab states of North Africa and the eastern Mediterranean. Facing fundamental transitions in governance, these countries are also undergoing profound social, cultural, and religious changes. The European Union and the United States, caught unprepared by the uprisings, now must address the inescapable challenges of those changes. How will the West respond to these new realities, particularly in light of international economic uncertainty, EU ambivalence toward a cohesive foreign policy, and declining U.S. influence abroad? *Arab Society in Revolt* explains and interprets the societal transformations occurring in the Arab Muslim world, their ramifications for the West, and possible policy options for dealing with this new world. *Arab Society in Revolt* examines areas of change particularly relevant in the southern Mediterranean: demography and migration, Islamic revival and democracy, rapidly changing roles of women in Arab society, the Internet in Arab societies, commercial and social entrepreneurship as change factors, and the economics of Arab transitions. The book then looks at those cultural and religious, as well as political and economic factors that have influenced the Western response or lack of it to the Arab Spring, as well as the policy options that remain open.
