United States Participation in the UN United States. President,1986     **U.S. Participation in the UN** United States.

President,1986     **Institutions, Economic Performance and Sustainable Development** Biman C. Prasad,Clement Allan Tisdell,2006 Fiji has distinct institutional features that make it an ideal case for examining and discussing the consequences of institutional arrangements particularly the nature of property rights for national economic performance development

prospects and the state of the environment which in turn reflects a nation's ability to achieve sustainable development. Furthermore, the nature of institutional arrangements in Fiji can be used to illustrate aspects of both the new and the old institutional economics. Apart from the fact that Fiji provides considerable scope for the exploration of institutional economics and its applications, Fiji is a comparatively important island nation in the south west Pacific that is an important member of the Pacific Island Forum grouping of 14 island nations. The recent development of Fiji has been much influenced by its social history, particularly by its institutional structures established or codified during British colonial rule. Its present racial composition is largely a product of British colonisation of Indians brought to Fiji by the British to produce sugar cane as a contribution to the economic development of the former British Empire. In many respects, the type of global imperialism that was well established during the nineteenth century was a forerunner to modern economic globalisation which involves a mixture of free trading blocs and multilateralism. The current population mixture of Fiji, consisting of about equal numbers of Indian Fijians and Indigenous Fijians, has its roots in Fiji's colonial history. Furthermore, the codified systems of property rights which largely excludes Indian Fijians from the ownership of land was established by the British. It has been a major source of ethnic tension and of social and political conflict in Fiji. We show that this system of property rights has had important negative consequences for economic growth in Fiji, for the economic performance of its industries and for the conservation of its natural resources, natural resources which may not be equitable and which also does not appear to be efficient administratively. This adds to social and political tension in Fiji.

The Changing Nature of Corporate Social Responsibility Renginee Pillay, 2015-02-20. Corporate Social Responsibility (CSR) has increasingly been promoted as an important mechanism for furthering economic and social development goals in developing countries. In such an optimistic climate, questions arise as to whether CSR can bear the weight of the increasing expectations being heaped on its shoulders. This book examines the changing nature of corporate social responsibility as it has been conceived over the past eighty years. It considers the historical and socio-legal developments of the idea of CSR and the various conceptions of the corporation which underlie different realisations of CSR. The book explores the model of CSR deployed in the developing world as well as the links between CSR and development. Renginee Pillay uses Mauritius as a case study demonstrating how CSR and corporate governance issues have come to the fore of political, financial and legal landscapes. Drawing on empirical research, the book examines how the first legislation of its kind has been implemented in Mauritius and analyses its impact on development. In its work to evaluate the contribution CSR can make to development, this book will be of great use and interest to students and researchers of business and company law, business ethics and development studies.

Sustainable Governance in the BRICS* Bertelsmann Stiftung, 2013-11-01 The emergent powers of Brazil Russia India China and South Africa BRICS are drawing attention as they change the political and economic map of the 21st century But does each country have the institutional framework needed to advance its path of development and to effectively address needed reforms with sustainable solutions With the support of an international network of experts the Bertelsmann Stiftung has conducted an indicator based inventory of the state and performance of governance in each BRICS country Focusing on success factors and policy challenges this study draws upon the analytic tool of the Sustainable Governance Indicators SGI allowing for a cross national analysis of the need for reform in core policy areas such as economic and social affairs environmental policies and innovation strategies At the same time the capacities of each country's system of governance are explored in each BRICS state explores the extent to which problems are identified and strategic solutions implemented in each of the five political systems By looking at both reform needs and reform capacities this study points to considerable differences in the prospects for development in each country prospects which in some cases fall short of the expected growth and progress      **US Department of State Dispatch** , 1992
