Empirische Dimension Altorientalischer Forschungen Gebhard J. Selz, Klaus Wagensonner, 2011 This volume's 23 contributions from senior and younger researchers working with the Ancient Near Eastern heritage are based on the hypothesis of a general empiric attitude of Ancient Mesopotamian scholarship The articles try to elucidate these underlying principles making use of various sorts of modern theories and methods The book covers a broader range of topics astronomy politics agriculture and irrigation linguistics architecture medicine and others

Sargonic Akkadian Rebecca Hasselbach, 2005 Since the second edition of I J Gelb's *Old Akkadian Writing and Grammar* in 1961 which is still the standard grammar of Old Akkadian to this day a significant number of new texts from the Old Akkadian period has been discovered and important improvements have been made regarding the analysis of Old Akkadian and Early Semitic grammar particularly phonology and writing The present volume seeks to update our understanding of the syllabically written textual material from the Sargonic period 2350-2100 BCE which contains most of our evidence for the Akkadian used at this period It consists of a detailed investigation of the Sargonic Akkadian syllabary phonology and morphology with specific focus on geographical and dialectal variations that are noticeable in this text corpus but which have not yet been examined thoroughly The grammatical investigation further compares specific linguistic features of this period with the two later Akkadian dialects Babylonian and Assyrian in order to establish the position of the individual sub groups of Sargonic Akkadian within the dialect geography of Akkadian

Diversity and Standardization Eva Cancik-Kirschbaum, Jörg Klinger, Gerfrid G. W. Müller, 2014-02-18 The ancient Near East is a construct defined by present day scientific investigations a construct whose temporal and spatial boundaries are fuzzy constantly shifting under the weight of new empirical data and increasingly sophisticated analytical methods Its objects of investigation even those that have resided in museum collections for generations are in flux as the profound cultural geographical ethnic and social diversity of the ancient Near East threatens to drown out any points of commonality Yet it is these points of commonality that draw us inevitably to questions of Diversity and Standardization as categories for cross cultural and trans historical analysis As we look across the variegated horizons of antiquity do these categories have any real analytical power For instance the introduction of a new system of measurement

or bookkeeping technique or even the imposition of a standardized repertoire of pottery forms on a more or less subject population are all examples of the real power of processes of standardization to stabilize territorial political entities. The problem must be posed for the ancient Near East at an even more fundamental level: however, what role do concepts, methods of standardization and more generally sign systems play in the reconfiguration and reconstitution of cultural, political, religious, scientific and social spaces? This volume results from a symposium under the aegis of the TOPOI Research Cluster, a transdisciplinary research center devoted to the investigation of the interdependencies between space and knowledge in the ancient world that brought together leading archaeologists, philologists, historians and linguists in order to investigate concrete historical examples that speak to questions of Diversity and Standardization in the ancient Near East.

The Sumerians Paul Collins, 2021-03-22. The Sumerians are widely believed to have created the world's earliest civilization on the fertile floodplains of southern Iraq from about 3500 to 2000 BCE. They have been credited with the invention of nothing less than cities, writing and the wheel and therefore hold an ancient mirror to our own urban, literate world. But is this picture correct? Paul Collins reveals how the idea of a Sumerian people was assembled from the archaeological and textual evidence uncovered in Iraq and Syria over the last one hundred fifty years. Reconstructed through the biases of those who unearthed them, the Sumerians were never simply lost and found but reinvented a number of times both in antiquity and in the more recent past.

Sumerian Grammar Dietz Otto Edzard, 2003-08-01. It seems safe to say that this *Sumerian Grammar* by Professor D. O. Edzard will become the new classic reference in the field. It is an up-to-date, reliable guide to the language of the Sumerians, the inventors of cuneiform writing in the late 4th millennium B.C. and thus essential contributors to the high cultural standard of the whole of Mesopotamia and beyond. Following traditional lines, the Grammar describes general characteristics, origins, linguistic environment, phonetics and phonology, morphology, syntax and phraseology. Due attention is given to the symbiosis with Semitic Akkadian, with which Sumerian was to form a veritable linguistic area. With lucid explanations of all technical linguistic theory, each transliteration carries its English translation.

Establishing Value Vitali Bartash, 2019-06-04. This book explores the reasons for which weights and scales were used to measure goods in Early Mesopotamia ca. 3200–2000 BCE. The vast corpus of cuneiform records from this period sheds light on the various mechanisms behind the development of this cultural

innovation Weighing became the means of articulating the value of both imported and locally produced goods within a socioeconomic system that had reached an unprecedented level of complexity This study provides a comprehensive analysis of this cultural and economic phenomenon which simultaneously reflected and shaped the relationships between individuals and groups in Mesopotamia throughout the third millennium BCE **The Cambridge Ancient History** ,1970
