Economics of Atmospheric Pollution Ekko Ierland, Kazimierz Gorka, 1996-10-21 Selected papers presented at the NATO Advanced Research Workshop The Economics of Atmospheric Pollution Theories Applied Models and Implications for International Policy Making held in Wageningen The Netherlands November 16 18 1994 **Controlling Industrial Pollution** Robert W. Crandall, 1983 Discusses the effectiveness of government regulations designed to reduce air pollution and recommends changes in air pollution policies and laws **The Economic Consequences of Outdoor Air Pollution** OECD, 2016-06-09 This report provides a comprehensive assessment of the economic consequences of outdoor air pollution in the coming decades focusing on the impacts on mortality morbidity and changes in crop yields as caused by high concentrations of pollutants **The Economics of Air Pollution in China** Jun Ma, 2016-11-29 Suffocating smog regularly envelops Chinese metropolises from Beijing to Shanghai clouding the future prospect of China's growth sustainability Air pollutants do not discriminate between the rich and the poor the politician and the average Joe They put everyone's health and economic prosperity at risk creating future costs that are difficult to calculate Yet many people including some in China are concerned that addressing environmental challenges will jeopardize economic growth In The Economics of Air Pollution in China leading Chinese economist Ma Jun makes the case that the trade off between growth and environment is not inevitable In his ambitious proposal to tackle severe air pollution and drastically reduce the level of so called PM 2.5 particles microscopic pollutants that lodge deeply in lungs Ma Jun argues that in targeting pollution China has a real opportunity to undertake significant structural economic reforms that would support long term growth Rooted in rigorous analyses and evidence based projections Ma Jun's big bang proposal aims to mitigate pollution and facilitate a transition to a greener and more sustainable growth model The Economics of Environmental Policy A. Myrick Freeman, Robert H. Haveman, Allen V. Kneese, 1984 The Economics of Airborne Emissions Douglas R. Mackintosh, 1973 **The Economics of Government Regulation** Wang Junhao, 2021-07-06 Regulation is a public policy approach closely related to calculations of the equilibrium of supply and demand and to cost benefit analyses Governments combine a variety of incentives and restrictions on behavior including laws and regulations in order to guide enterprises and smaller entities within the economy toward pursuing policies in the public interest This book offers an in depth and systematic review of the economic theory of regulation with particular emphasis on the Chinese context The basic concepts cover economic and social regulation regulatory process regulation under asymmetric information and capture theory Drawing on a broad range of cases from across the telecommunications electric power and water sectors since the founding of the People's Republic of China in 1949 the author explores economic regulation in China with reference to natural monopoly investment price level and price structure entry and competition In addition he discusses theories of externalities and asymmetric information which are analyzed in the light of China's environmental and product quality regulation The author argues that the Chinese government has deregulated its economy

to a large extent in the past and proposes that the Chinese government will enforce more social regulation in the future. Students and scholars of government regulation economics and industrial organization will find this volume to be an essential guide.

Environmental Economics: The Essentials Tom Tietenberg, Lynne Lewis, 2019-08-01. Environmental Economics: The Essentials offers a policy oriented approach to the increasingly influential field of environmental economics that is based upon a solid foundation of economic theory and empirical research. Students will not only leave the course with a firm understanding of environmental economics but they will also be exposed to a number of case studies showing how underlying economic principles provided the foundation for specific environmental and resource policies. This key text highlights what insights can be derived from the actual experience. Key features include: Extensive coverage of the major issues including climate change, air and water pollution, sustainable development and environmental justice; Introductions to the theory and method of environmental economics including externalities, experimental and behavioral economics, benefit cost analysis and methods for valuing the services provided by the environment; Boxed Examples and Debates throughout the text which highlight global examples and major talking points; The text is fully supported with end of chapter summaries, discussion questions and self test exercises in the book as well as with multiple choice questions, simulations, references, slides and an instructor's manual on the Companion Website. This text is adapted from the best selling Environmental and Natural Resource Economics 11th edition by the same authors.

Economic Instruments for Air Pollution Control Ger Klaassen, Finn R. Førsund, 2012-12-06. Economic theory and empirical models suggest that economic instruments should help us to meet environmental goals at lower cost. Practical experience however shows that the cost savings of emission trading are smaller than expected and charges usually have had small incentive impacts. This book gives the first comprehensive review of economic theory, simulation models and practical experience with the use of economic instruments. The book focuses on air pollution control. Part I examines theoretical aspects and simulation modeling in a national context. Part II surveys the practical experience in a variety of countries. Part III explores international issues such as joint implementation. Because of its unique blend of theoretical and empirical research, the book will prove interesting for both economists and those interested in environmental policy.
