Planning, Public Policy and Property Markets David Adams, Craig Watkins, Michael White, 2008-04-15 The focus of this book is on how public policy and especially the planning system both shapes and reflects the essential characteristics of land and property markets It challenges the common misconceptions that property markets operate in isolation from public policy and that planning permission is the only significant form of state intervention in the market Planning Public Policy Property Markets contends that effective state market relations in land and property are critical to a prosperous economy and a robust democracy especially at a time when development aims to be sustainable and environmental protection needs to be matched by urban and rural regeneration The book thus reflects an increased realisation among academics and practitioners of the importance of theoretical integration and joined up policy making Its rounded perspective addresses a significant weakness in the academic literature and will encourage broader debate and a more pluralist agenda for property research Prominent contributors present important new research on different market sectors and policy arenas including regeneration and renewal housing growth housing planning transport and economic competitiveness while the editors specifically draw out more general lessons on the dynamic nature of the state property market relationship in a modern economy This book will encourage all those involved in property research who strive for theoretical and practical connectivity to demonstrate that just as property market operations cannot be analysed without understanding state processes policy decisions cannot be taken without an appreciation of how the market operates **The Economics of Urban Property Markets** Paschalis

Arvanitidis, 2014-08-13 This book examines the relationship between the property market and urban economy The stimulus for this work was provided by the seemingly ever accelerating process of urban economic change and the noticeable failure of existing studies to adequately explore the pivotal role that the property market plays in this process Drawing on institutional economics the central argument of the book is that the property market as an institution is a mediator through which urban economic potential can be realised and served In developing this argument the book provides a critical realist ontological framework that advances understanding of the institutional structure of the economy and the complex interrelation between the institutional environment and human agency as well as a holistic theoretical framework of urban

economic change where appropriate emphasis is placed on the specific mechanisms processes and dynamics through which the built environment is provided Arvanitidis also explores an institutional conceptualisation of property market efficiency defined in terms of the ability of the market institution to adapt its structure and to provide outcomes that the economy requires To inform empirical research on the developed concepts the book also offers a generic analytical approach specifying appropriate research methods and techniques for investigation along with a specific research design providing an operational framework that translates developed theory into empirical practice The book's primary contribution therefore lies in its delineation of a holistic research programme to conceptualise the property market as an institution and to explore its role within the urban economy
