The Budgetary and Economic Effects of Oil Taxes Philip Webre,1986 Managing Britain's Marine and Coastal Environment Jonathan Potts,Hance D. Smith,2013-02-01 Britain's maritime tradition is well documented The management of its marine and coastal environment is therefore of tantamount importance and offers lessons for other nations across the world The beginning of the new millennium marks a major long term turning point in the historical development of Britain's maritime interest discernible by continued diversification and intensification in the uses of the sea unprecedented and often adverse environmental impacts engendered by these uses and the beginning of a major effort to establish a comprehensive management system which can deal with both multiple uses and environmental impacts This collection featuring an impressive list of contributors covers themes including maritime history environmental issues public policy tourism technology and resources as well as open sea development and management It is a useful addition for those interested in geography the environment maritime studies and also engineering Energy Economics in Britain Paul Tempest,2012-12-06 Paul Tempest Energy economics is in national policy a vital point of intersection where Government industry finance research and many other interests meet In Britain it is not a recognised profession or academic discipline in its own right Perhaps it is part of our national style and heritage that it never should be so compartmentalised Indeed energy economics is an interest which cannot easily be constrained within even national boundaries international energy markets impinge everywhere through external demand supply and price affecting profoundly every aspect of the economy THE BRITISH INSTITUTE OF ENERGY ECONOMICS Over the last few years an increasing need has been widely perceived for free and open discussion of the major energy and economic issues of the day Easy communication and the joint implementation of technological progress seem worldwide the safest route to resolving national and international problems Such co-operation and interchange also bring into the light national and local political myopia bureaucratic inertia academic dogma and the distortions of an imperfect market system *Economic Structure and Policy* T. S. Barker,2012-12-06 Since the first statement of the aims and methods of the Cambridge Growth Project which appeared in 1962 as the first number of our former series A Programme for Growth we have produced a volume on the state of the model and on projections derived from it at roughly five year intervals Exploring 1970 1965 Exploring 1972 1970 and now the present book A comparison of these publications shows the directions in which we have developed our model First we have been able to model more parts of the economy and to model them better and second by adopting a targets and instruments approach we have been able to tackle questions of policy As a consequence of the first of these improvements the model has become more closely knit and variables which were previously exogenous have become endogenous and as a consequence of the second the model has become less rigid and can be used to suggest policies for correcting some of the undesirable features that emerge from the projections The Structure of British Industry Peter Johnson,2002-09-11 as an up to date and intelligible account of large areas of British industry as you will find It will be a valuable handbook for a variety of users students and teachers its primary audience

businessmen or civil servants British Business *Scotland's Voice in International Affairs* Clive Archer, John Main, 1980 In October 1977 the Scottish Branch of the Royal Institute of International Affairs established a study group to consider the representation of Scottish interests abroad The members of the group were drawn from the Scottish universities as well as from business and banking in Scotland The study began with a series of discussion meetings at which the group as a whole was able to draw on the knowledge and experience of among others Mr Alick Buchanan Smith MP Mr Stanley Budd Head of the Edinburgh Office of the Commission of the European Communities Mr J Allan Stewart Scottish Secretary of the Confederation of British Industry Mr A S Halford MacLeod of the Scottish Council Development and Industry and senior officials of the Scottish Office Individual members of the group then undertook a programme of interviews with representatives of the fishing industry in particular Mr Gilbert Buchan and Mr David Aitchison of the Scottish Fishermen's Federation Mr James Lovie of the Scottish Fishermen's Organisation Ltd and Mr Robert Allan of the Scottish Section of the British Fishing Federation with representatives of the agriculture industry notably Mr Michael Burnett of the National Farmers Union of Scotland Mr Dermot Gunn of the Scottish Agricultural Organisation Society and Mr A F Roney Dougal of the Scottish Landowners Federation and with representatives of Scottish local authorities and the relevant departments of the Scottish Office *Oil and the British Economy* Stephen Hall, Fred Atkinson, 2016-03-02 The impact of North Sea oil and gas on the British economy is examined thoroughly in this book It explores why the early years of the 1980s when oil production had risen to the level of self sufficiency and beyond were years of recession and unemployment The book compares the record of British government policy with that of Norway the Netherlands Venezuela Australia and Japan Issues such as long term energy policy are also examined [Energy Abstracts for Policy Analysis](#) , 1988 *OECD Economic Surveys: United Kingdom 2004* OECD, 2004-01-19 OECD's 2004 review of the UK economy finds that performance has been impressive in recent years This edition also looks at product market competition and sustainable development in the UK

Redesigning Petroleum Taxation Emre Üşenmez, 2018-10-15 Since its inception some 40 years ago petroleum specific taxation in the UK has been subject to numerous modifications Often these modifications were brought into place not only to sufficiently incentivise the investors but also to capture a fair share for the government However it is evident from the frequency of changes that finding the right balance between these two aims is no easy matter Such a balance and the consequent fiscal stability is necessary for the long term relationship between the parties to endure to their mutual benefit Still it does not take much for one or other party to feel that they are out of balance As a consequence one party feels that the other party is taking an undue proportion of the value generated and that they are losing out Yet achieving that balance and fiscal stability is possible To understand this possibility this book first clarifies what is meant by sufficient incentivisation and fair share before developing a new fiscal system that manages this balance and stability Such clarification yields objective criteria against which to assess not only the existing regime but also the newly proposed regime This approach is further

complemented by the critical analysis of the fiscal legislative framework and the evaluation of the legal positions of specific contractual elements and mechanisms found within that framework This latter analysis is important in order to reduce the legal uncertainty such elements may create which can otherwise lead to further reactive amendments and revisions to the fiscal regime in the future **Fossil Energy Update** ,1976
