His theme is both urgent and iconoclastic. There is an unusual clarity about the exposition and a drive that comes from passionate engagement combined with long experience reading and reflection. Keith Hart, Goldsmiths College, London. In Culture, Society and Economy Don Robotham examines the failure of recent social theory to grasp the problems of globalization and the emergence of corporate monopoly capital and sets out his own argument for a radical solution. He argues that the neglect of economics by both cultural studies and social theory has weakened the ability to develop viable alternatives to present-day capitalist globalization. With deep awareness of and reference to current events and contemporary trends, the author presents a detailed critique of cultural studies in particular. Stuart Hall and Paul Gilroy, Giddens' theory of risk society, Scott Lash and John Urry's economies of signs and space, Manuel Castells' theory of network society. The final chapters make a unique argument that the solution to the problems of globalization lies in more globalization rather than adopting an anti-globalization or localization position. Don Robotham proposes more effective centralized institutions for governing the world economy in other words world government. **Food, Science and Society** P.S. Belton, Teresa Belton, 2002-09-19 There is widespread concern amongst consumers about the safety and acceptability of food and there are clearly communication gaps between consumers, many food professionals and food industry. girls and women's magazines like *More* and *Sugar* to the dynamics of fashion production and consumption. *Religion, Reform and Modernity in the Eighteenth Century* Robert G. Ingram, 2007. A new interpretation of English history and religion in the eighteenth century. The eighteenth century has long divided critical opinion. Some contend that it witnessed the birth of the modern world while others counter that England remained an ancien régime confessional state. This book takes issue with both positions, arguing that the former overstate the newness of the age and largely misdiagnose the causes of change while the latter rightly point to the persistence of more traditional modes of thought and behaviour but downplay the era's fundamental uncertainty and misplace the reasons for and the timeline of its passage. The overwhelming catalyst for change is here seen to be war rather than long-term social and economic changes.

Archbishop Thomas Secker 1693-1768: the Cranmer or Laud of his age and the hitherto neglected church reforms he spearheaded form the particular focus of the book. This is the first full archival study of a crucial but frequently ignored figure.

ROBERT G INGRAM is Assistant Professor at the Department of History, Ohio University.
