*Intergovernmental Perspective*, 1993 Each issue concentrates on a different topic Partisan Politics, Divided Government, and the Economy Alberto Alesina, Howard Rosenthal, 1995-01-27 This book develops an integrated approach to understanding the American economy and national elections Economic policy is generally seen as the result of a compromise between the President and Congress Because Democrats and Republicans usually maintain polarized preferences on policy middle of the road voters seek to balance the President by reinforcing in Congress the party not holding the White House This balancing leads always to relatively moderate policies and frequently to divided government The authors first outline the rational partisan business cycle where Republican administrations begin with recession and Democratic administrations with expansions and next the midterm cycle where the President's party loses votes in the mid term congressional election The book argues that both cycles are the result of uncertainty about the outcome of presidential elections Other topics covered include retrospective voting on the economy coat tails and incumbency advantage A final chapter shows how the analysis sheds light on the economies and political processes of other industrial democracies The Political Economy of the Brazilian State, 1889-1930 Steven Topik, 1987-07-01 In this first overview of the Brazilian republican state based on

extensive primary source material Steven Topik demonstrates that well before the disruption of the export economy in 1929 the Brazilian state was one of the most interventionist in Latin America This study counters the previous general belief that before 1930 Brazil was dominated by an export oligarchy comprised of European and North American capitalists and that only later did the state become prominent in the country s economic development Topik examines the state s performance during the First Republic 1889 1930 in four sectors finance the coffee trade railroads and industry By looking at the controversies in these areas he explains how domestic interclass and international struggles shaped policy and notes the degree to which the state acted relatively independently of civil society Topik s primary concern is the actions of state officials and whether their decisions reflected the demands of the ruling class He shows that conflicting interests of fractions of the ruling class and foreign investors gradually led to far greater state participation than any of the participants originally desired and that the structure of the economy and of society not the intentions of the actors best explains the state s economic presence
