Moving Beyond Self-Interest Stephanie L. Brown, R. Michael Brown, Louis A. Penner, 2012 *Moving Beyond Self Interest* is an interdisciplinary volume that discusses cutting edge developments in the science of caring for and helping others In Part I contributors raise foundational issues related to human caregiving They present new theories and data to show how natural selection might have shaped a genuinely altruistic drive to benefit others how this drive intersects with the attachment and caregiving systems and how it emerges from a broader social engagement system made possible by symbiotic regulation of autonomic physiological states In Part II contributors propose a new neurophysiological model of the human caregiving system and present arguments and evidence to show how mammalian neural circuitry that supports parenting might be recruited to direct human cooperation and competition human empathy and parental and romantic love Part III is devoted to the psychology of human caregiving Some contributors in this section show how an evolutionary perspective helps us better understand parental investment in and empathic concern for children at risk for or suffering from various health behavioral and cognitive problems Other contributors identify circumstances that differentially predict caregiver benefits and costs and raise the question of whether extreme levels of compassion are actually pathological The section concludes with a discussion of semantic and conceptual obstacles to the scientific investigation of caregiving Part IV focuses on possible interfaces between new models of caregiving motivation and economics political science and social policy development In this section contributors show how the new

theory and research discussed in this volume can inform our understanding of economic utility policies for delivering social services such as health care and education and hypotheses concerning the origins and development of human society including some of its more problematic features of nationalism conflict and war The chapters in this volume help readers appreciate the human capacity for engaging in altruistic acts on both a small and large scale **Handbook of Prejudice, Stereotyping, and Discrimination** Todd D. Individualism and the Rise of Egosystems Matteo Pietropaoli, 2023-03-15 This book is a socio philosophical journey across several aspects of our society s focus on individual freedom taking cues from some of the most prominent thinkers of

our time The author posits that the human quest for freedom mostly dominated by the Western culture but by no means confined to the West has reached its ultimate paradox of making contemporary humans fundamentally unable to act as ecosystems thus cooperate and collaborate They have become egosystems completely centred on the attainment of their own individual satisfaction The author sees this as the culmination of a rightful quest for self affirmation which has been a key driver of progress across human history and by no means a negative one But the paradox is that such a human centred notion of freedom and individual accomplishment results in a much reduced ability to operate in sync with others at the time when mankind would need more cooperation collaboration and selflessness to address the key challenges it faces from climate change to inequalities Through the examination of the broad and interdisciplinary themes typical of social philosophy and the most recent cultural studies in direct confrontation with the thought of authors such as Lipovetsky and Bauman Lasch and Beck Ehrenberg and Han this book examines shifts in cultural norms at the possible end of a millenary civilization
