Society and the Environment Michael S Carolan, 2020-03-10 Without focusing entirely on what is wrong with the world around us the third edition of *Society and the Environment* centers its discussion on realistic solutions to the problems that persist and examines current controversies within a socio organizational context After introducing pragmatic environmentalism Carolan discusses the complex pressures and variables that exist where ecology and society collide such as population growth and the concurrent increase in demands for food and energy and transportation and its outsized influence on urban and community patterns With further attention given to the social phenomena and structural dynamics driving today's environmental problems the book concludes with an important reflection on truly sustainable solutions and what constitutes meaningful social change Each chapter in this interdisciplinary text follows a three part structure beginning with an overview of what is wrong and why This leads into a discussion on each issue's wide ranging implications and finally a balanced consideration of realistic solutions Featuring updated and expanded examples discussion points and coverage of recent developments including the US withdrawing from the Paris Agreement booming national economies and wealth distribution growing global interest in environmental justice with particular focus on the links between injustice and race and inequality climate change and renewable energy this new edition remains an essential companion for courses on environmental sociology and sustainability

Society and the Environment Michael Carolan, 2018-05-15 *Society and the Environment* examines today's environmental controversies within a socio organizational context After outlining the contours of pragmatic environmentalism Carolan considers the pressures that exist where ecology and society collide such as population growth and its associated increased demands for food and energy He also investigates how various ecological issues such as climate change are affecting our very own personal health Finally he drills into the social structural dynamics including political economy and the international legal system that create ongoing momentum for environmental ills This interdisciplinary text features a three part structure in each chapter that covers fast facts about the issue at hand examines its wide ranging implications and offers balanced consideration of possible real world solutions New to this edition are Movement Matters boxes which showcase grassroots movements that have affected legislation Discussion questions and key terms enhance the text's usefulness making *Society and the Environment* the perfect learning tool for courses on environmental sociology

Review ,1905 *Blogs, Wikipedia, Second Life, and Beyond* Axel Bruns, 2008 Explores our developing participatory online culture establishing the core principles which drive the rise of collaborative content creation in environments from open source through blogs and Wikipedia to Second Life Argues that what is emerging is no longer just a new form of content

production but a new process for the continuous creation and extension of knowledge and art by collaborative communities produsage *Reimagining Sustainability in Precarious Times* Karen Malone, Son Truong, Tonia Gray, 2017-01-17 This book reflects the considerable appeal of the Anthropocene and the way it stimulates new discussions and ideas for reimagining sustainability and its place in education in these precarious times The authors explore these new imaginings for sustainability using varying theoretical perspectives in order to consider innovative ways of engaging with concepts that are now influencing the field of sustainability and education Through their theoretical analysis research and field work the authors explore novel approaches to designing sustainability and sustainability education These approaches although diverse in focus all highlight the complex interdependencies of the human and more than human world and by unpacking binaries such as human nature nature culture subject object and de centring the human expose the complexities of an entangled human nature relation that are shaping our understanding of sustainability These messy relations challenge the well versed mantras of anthropocentric exceptionalism in sustainability and sustainability education and offer new questions rather than answers for researchers educators and practitioners to explore As working with new theoretical lenses is not always easy this book also highlights the authors methods for approaching these ideas and imaginings **Advances in Intelligent Data Analysis**

V Michael Berthold, 2003-08-21 This book constitutes the refereed proceedings of the 5th International Conference on Intelligent Data Analysis IDA 2003 held in Berlin Germany in August 2003 The 56 revised papers presented were carefully reviewed and selected from 180 submissions The papers are organized in topical sections on machine learning probability and topology classification and pattern recognition clustering applications modeling and data processing Building Sustainability with the Arts David Curtis, 2017-11-06 Environmental art or ecoart is a burgeoning field and includes a wide variety of practices some of which are exemplified in this collection from sculptures or installations made from discarded rubbish to intimate ephemeral artworks placed in the natural environment or from theatrical presentations incorporated into environmental education programs to socially critical paintings In some cases the artworks aim to create indignation in the viewer sometimes to educate sometimes to create a feeling of empathy for the natural environment or sometimes they are built into community building projects This timely book examines various roles of the arts in building ecological sustainability A wide range of practitioners is represented including visual and performing artists scientists social researchers environmental educators and research students They are all united in this text in their belief that the arts are vital in the building of sustainability in the way that they are practiced but also the connections they make to ecology science and indigenous culture FCC Record United States. Data Analysis V Michael R. Berthold, Hans-Joachim Lenz, Elizabeth Bradley, Rudolf Kruse, Christian Borgelt, 2011-03-16 We are glad to present the proceedings of the 5th biennial conference in the Intelligent Data Analysis series The conference took place in Berlin Germany August 28 30 2003 IDA has by now clearly grown up Started as a small si symposium of a larger

conference in 1995 in Baden Baden Germany it quickly attracted more interest both submission and attendance wise and moved from London 1997 to Amsterdam 1999 and two years ago to Lisbon Submission rates along with the ever improving quality of papers have enabled the organizers to assemble increasingly consistent and high quality programs This year we were again overwhelmed by yet another record breaking submission rate of 180 papers At the Program Chairs meeting we were based on roughly 500 reviews in the lucky position of carefully selecting 17 papers for oral and 42 for poster presentation Poster presenters were given the opportunity to summarize their papers in 3 minute spotlight presentations The oral spotlight and poster presentations were then scheduled in a single track 2 5 day conference program summarized in this book In accordance with the goal of IDA to bring together researchers from diverse disciplines we achieved a nice balance of presentations from the more theoretical side both statistics and computer science as well as more application oriented areas that illustrate how these techniques can be used in practice Work presented in these proceedings ranges from theoretical contributions dealing for example with data cleaning and compression all the way to papers addressing practical problems in the areas of text classification and sales rate predictions A considerable number of papers also center around the currently so popular applications in bioinformatics

Global Environmental Governance, Technology and Politics Victor Galaz, 2014-04-25 We live on an increasingly human dominated planet Our impact on the Earth has become so huge that researchers now suggest that it merits its own geological epoch the Anthropocene the age of humans Combining theory development and case studies

Nature Policies and Landscape Policies Roberto Gambino, Attilia Peano, 2014-11-11 The book focuses on the relationship between nature conservation policies and landscape policies This is a relevant subject due to the current need of reviving nature conservation policies which are today affected by a general effectiveness deficiency To this end landscape policies can play a crucial role bridging nature and culture fostering more integrated approaches to nature conservation and stimulating the active participation of local communities The book gathers reflections researches and experiences developed on an international level on this subject by experts coming from different international contexts Europe U S A various disciplinary backgrounds geographers planners biologists historians jurists economists etc and several institutional bodies Universities administrative bodies international organizations such as IUCN EUROPARC Federation UNESCO etc The overall reflections gathered in the book which is divided in three main sections regulations and institutional frameworks policies actions and tools combine to suggest innovative visions about the relationships between nature policies and landscape policies **Metaphysics and Cognitive Science** Alvin I. Goldman, Brian P. McLaughlin, 2019-03-27 This volume illustrates

how the methodology of metaphysics can be enriched with the help of cognitive science Few philosophers nowadays would dispute the relevance of cognitive science to the metaphysics of mind but this volume mainly concerns the relevance of metaphysics to phenomena that are not themselves mental The volume is thus a departure from standard analytical metaphysics Among the issues to which results from cognitive science are brought to bear are the metaphysics of time of morality of meaning of modality of objects and of natural kinds as well as whether God exists A number of chapters address the enterprise of metaphysics in general In traditional analytical metaphysics intuitions play a prominent role in the construction of and assessment of theories Cognitive science can be brought to bear on the issue of the reliability of intuitions Some chapters point out how results from cognitive science can be deployed to debunk certain intuitions and some point out how results can be deployed to help vindicate certain intuitions Many metaphysicians have taken to heart the moral

that physics should be taken into account in addressing certain metaphysical issues The overarching point of the volume is that in many instances beyond the nature of the mind itself cognitive science should also be consulted *The Palgrave International Handbook of Women and Outdoor Learning* Tonia Gray, Denise Mitten, 2018-05-12 This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments OLEs Women choose to participate actively in outdoors careers many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive rewarding excellence regardless of age gender socioeconomic status disability or ethnicity However both research and collective experiences in OLEs suggest that many women feel invisible relegated marginalized and undervalued In response to this marginalization this Handbook celebrates the richness of knowledge and practices of women practitioners in OLEs Women scholars and practitioners from numerous fields such as experiential outdoor education adventure education adventure therapy and gender studies explore the implications of their research and practice using poignant examples within their own disciplines These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present Social inequalities still abound in OLEs and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive Global in perspective and capacious in content this one stop volume is an indispensable reference resource for a diverse range of academics including students and researchers in the fields of education psychology sociology gender studies geography and environment studies as well as the many outdoors fields **Energy: Wind** Donald Marples, Molly Sherlock, 2010-05-11 Since early recorded history people have been harnessing the energy of the wind In the United States in the late 19th century settlers began using windmills to pump water for farms and ranches and later to generate electricity for homes and industry Industrialism led to a gradual decline in the use of windmills The steam engine replaced European water pumping windmills and in the 1930s the Rural Electrification Administration's programs brought inexpensive electric power to most rural areas in the United States However industrialization also sparked the development of larger windmills wind turbines to generate electricity *LATIN 2002: Theoretical Informatics* Sergio Rajsbaum, 2003-07-31 This book constitutes the refereed proceedings of the 5th International Symposium Latin American Theoretical Informatics LATIN 2002 held in Cancun Mexico in April 2002 The 44 revised full papers presented together with a tutorial and 7 abstracts of invited contributions were carefully reviewed and selected from a total of 104 submissions The papers presented are devoted to a broad range of topics from theoretical computer science and mathematical foundations with a certain focus on algorithmics and computations related to discrete structures
