#### **Household Savings in Selected Southern European Countries**

**Evidence from Cross-Country Micro-Level Data** Mr. Kamil Dybczak, Shiqing Hua, Mariusz Jarmuzek, Ruifeng Zhang, Yipei Zhang, 2023-07-21

The paper looks into the puzzle of low household savings in three Southern European SE3 countries Cyprus Greece and Portugal Building on the household saving drivers literature we employ cross country micro level data and investigate the key saving patterns examining their heterogeneity across households in SE3 countries relative to the EA average The results confirm the prominent role of income along with interest rate inflation fiscal balance and debt in shaping household savings in SE3 countries Quantile regressions employed to analyze saving behavior across the distribution of households suggest that households with lower savings tend to see their savings dip or dissavings rise more than proportionately with shocks to income interest rate inflation and government balance Our policy simulations across the distribution of households suggest that targeted rather than universal policy intervention could improve household savings especially of the most vulnerable ones
