Behavioural Responses to a Changing World Bob B. M. Wong, Ulrika Candolin, 2025-04-23 For many animals behavioural adjustments represent the first response to human modified conditions By improving reproduction and survival such adjustments can play the lead in maintaining viable populations in the face of rapid environmental change Behavioural responses however can also be maladaptive and reduce individual fitness particularly if favourable reaction norms have not yet evolved because animals are encountering conditions that they have never experienced before Clearly behaviour matters But how can we capitalise on our understanding of animal behaviour to improve conservation and management outcomes Behavioural Responses to a Changing World Challenges and Applications a companion volume to the first edition published in 2012 examines wildlife behavioural responses to human induced environmental change through a translational lens Despite considerable and growing interest in research on the topic the predictive value and practical application of what has been learned remains underappreciated and underutilized in the context of developing real world solutions To redress this the current book builds upon the foundations of the original volume but with a more applied perspective that focuses on highlighting how different forms of environmental challenges from climate change to urbanisation influence animal behaviour and how we can effectively harness knowledge of animal behaviour to effect practical solutions to predicting and mitigating the weighty impacts of a radically changed and changing world [COVID-19 Pandemic, Crisis Responses and the Changing World](#) Simon X.B. more complex fraught with increasing possibilities for conflict over national rivalries economic competition and cultural and ideological fault lines This clear eyed text offers a structured and theoretically grounded way to think about the forces that animate change and the alternative futures they may create Donald Kelley views both contemporary reality and the future we face through the perspective of four different paradigms that shape our way of thinking about the world The nation state paradigm built on the assumption that the traditional Westphalian nation state remains the key building block of the present and the future which leads us to predict the future in terms of the nature and alignment of nation states The economic paradigm built on the assumption that economic factors are increasingly important which leads us to see the future in terms of factors such as interdependence globalization and trade as well as the growing opposition to these developments and the prioritization of national economic needs The identity and culture paradigm built on the distinct identities and cultures of nations and regions which leads us to view the future in terms of conflicting culture based communities transcending formal national or economic interests The ideology paradigm based on a post cold war reemergence of ideological conflict within and among nations which leads us to view a world based on ideology based conflict From these paradigms and their interactions Kelley builds a series of possible alternative futures of the international system His framework provides a unique way of looking at how and why the world is changing and the many different futures some peaceful and productive some warlike and destructive and others simply dysfunctional in which we might live
