of prisoner's dilemma in contributions that delay deployments and create significant financial problems. Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential. This book believes that regional organizations can ease the UN's financial responsibility by managing conflicts in their regions. But to be most effective they must involve the UN in their interventions. This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness. It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high ranking team of international specialists in peacekeeping issues. This research should be of interest to students and researchers looking at international and political economics as well as international relations, defence security and peace studies. **Frontiers of Peace**

The Marketing of War in the Age of Neo-Militarism Kostas Gouliamos, Christos

Kassimeris, 2013-05-13 The post 9/11 era and the overall impact of international terrorism have generated much debate regarding the role of military apparatus in modern society. This book assesses the inherent meaning of the militarization from a critical interdisciplinary perspective. Against the background of democracy and capitalism, The Marketing of War in the Age of Neo-Militarism challenges prevailing accounts of the military industrial complex as it explores significant interrelated themes denoting the accelerating process of militarization of society. Designed to address pressing socio-political phenomena, this book is the first of its genre contesting conventional wisdom about the perceived link between war and the military industrial complex. It is unique not merely because of its approach but also for its thorough analysis of deeply affected social institutions and processes such as education, popular culture, geopolitics, military expenditure, space and the environment. Contributing authors advance the discussion by exposing factual information demonstrating the nature and scope of society's militarization. Their analysis is also broadened to encompass key concepts and diverse aspects of the subject matter that provoke a lively debate. The book offers compelling arguments that will be indispensable to scholars, students, professionals and policy and decision makers with an interest in social and political sciences as well as in other related fields. **Global**

Challenges: Peace and War Yih-Jye Hwang, Lucie Cerna, 2013-07-04 What is the idea of peace? Is peace merely the absence of war or can it also mean something else? Is peace a condition of emancipation, the status quo or is it a system of hegemonic stability? How can peace be acquired whatever it may mean? And above all, what is the relationship between peace and war? This textbook aims to offer a comprehensive and up to date introduction to studies of peace and war from both theoretical and empirical perspectives. Rather than providing students the answer of what the idea of peace means, this volume is designed to make and assist students to contemplate how peace can be thought by investigating its opposite war broadly.

defined *Routledge Handbook of Peacebuilding* Roger Mac Ginty, 2013-02-15 This new Routledge Handbook offers a comprehensive state of the art overview of the meanings and uses of the term peacebuilding and presents cutting edge debates on the practices conducted in the name of peacebuilding The term peacebuilding has had remarkable staying power Other terms such as conflict resolution have waned in popularity while the acceptance and use of the term peacebuilding has grown to the extent that it is the hegemonic and over arching term for many forms of mediation reconciliation and strategies to induce peace Despite this however it is rarely defined and often used to mean different things to different audiences Routledge Handbook of Peacebuilding aims to be a one stop comprehensive resource on the literature and practices of contemporary peacebuilding The book is organised into six key sections Section 1 Reading peacebuilding Section 2 Approaches and cross cutting themes Section 3 Disciplinary approaches to peacebuilding Section 4 Violence and security Section 5 Everyday living and peacebuilding Section 6 The infrastructure of peacebuilding This new Handbook will be essential reading for students of peacebuilding mediation and post conflict reconstruction and of great interest to students of statebuilding intervention civil wars conflict resolution war and conflict studies and IR in general *War, Peace and the Military* Franz Kernic, 2023-03-17 This book is a comprehensive analysis of the various social science approaches to explaining and interpreting war peace and the military Its central aim is to trace and reconstruct those basic assumptions constructed and thought processes undertaken by modern social sciences in their research and conceptualization of military violence and the use of force In addition to such reconstruction the aim is also to enquire into the preconditions of such thought This study therefore eschews the development of an explicit strategy in the sense of a research strategy but instead is much more concerned with thinking about its subject matter by means of re thinking and reflecting upon different theoretical approaches and problems The investigation includes a critical reexamination of the tradition of military sociological research from the beginning of modern sociology to late twentieth century theoretical approaches regarding the security focused and or war driven aspects of modern society *Making War and Building Peace* Michael W. Doyle, Nicholas Sambanis, 2011-04-22 Making War and Building Peace examines how well United Nations peacekeeping missions work after civil war Statistically analyzing all civil wars since 1945 the book compares peace processes that had UN involvement to those that didn't Michael Doyle and Nicholas Sambanis argue that each mission must be designed to fit the conflict with the right authority and adequate resources UN missions can be effective by supporting new actors committed to the peace building governing institutions and monitoring and policing implementation of peace settlements But the UN is not good at intervening in ongoing wars If the conflict is controlled by spoilers or if the parties are not ready to make peace the UN cannot play an effective enforcement role It can however offer its technical expertise in multidimensional peacekeeping operations that follow enforcement missions undertaken by states or regional organizations such as NATO Finding that UN missions are most effective in the first few years after the end of war and that economic development is the best way to

decrease the risk of new fighting in the long run the authors also argue that the UN's role in launching development projects after civil war should be expanded

War, Peace, and Alliance in Demosthenes' Athens Peter Hunt, 2010-01-28 Every Athenian alliance every declaration of war and every peace treaty was instituted by a decision of the assembly where citizens voted after listening to speeches that presented varied and often opposing arguments about the best course of action The fifteen preserved assembly speeches of the mid fourth century BC thus provide an unparalleled body of evidence for the way that Athenians thought and felt about interstate relations to understand this body of oratory is to understand how the Athenians of that period made decisions about war and peace This book provides a comprehensive treatment of this subject It deploys insights from a range of fields from anthropology to international relations theory in order not only to describe Athenian thinking but also to explain it Athenian thinking turns out to have been complex sophisticated and surprisingly familiar both in its virtues and its flaws
