

Economic Value of Weather and Climate Forecasts

The background of the cover features a weather map with black isobars overlaid on a satellite image of clouds. The isobars are labeled with values such as 1024, 1018, and 1008. A low-pressure system is indicated by a 'Z' inside a circle, with a '1018' label nearby. The clouds are shown in various shades of blue and white, creating a textured, atmospheric effect.

The Oxford Handbook of Economic Forecasting Michael P. Clements, David F. Hendry, 2011-06-29 This Handbook provides up to date coverage of both new and well established fields in the sphere of economic forecasting The chapters are written by world experts in their respective fields and provide authoritative yet accessible accounts of the key concepts subject matter and techniques in a number of diverse but related areas It covers the ways in which the availability of ever more plentiful data and computational power have been used in forecasting in terms of the frequency of observations the number of variables and the use of multiple data vintages Greater data availability has been coupled with developments in statistical theory and economic analysis to allow more elaborate and complicated models to be entertained the volume provides explanations and critiques of these developments These include factor models DSGE models restricted vector autoregressions and non linear models as well as models for handling data observed at mixed frequencies high frequency data multiple data vintages methods for forecasting when there are structural breaks and how breaks might be forecast Also covered are areas which are less commonly associated with economic forecasting such as climate change health economics long horizon growth forecasting and political elections Econometric forecasting has important contributions to make in these areas along with how their developments inform the mainstream

Statistical Methods in the Atmospheric Sciences

Daniel S. Wilks, 2011-05-20 This revised and expanded text explains the latest statistical methods that are being used to describe analyze test and forecast atmospheric data It features numerous worked examples illustrations equations and exercises with separate solutions The book will help advanced students and professionals understand and communicate what their data sets have to say and make sense of the scientific literature in meteorology climatology and related disciplines

Handbook on climate information for farming communities - What farmers need and what is available Food and Agriculture Organization of the United Nations, 2019-05-31 The content of this guide is twofold to describe the most important weather and agroclimatic products that are available by the National Meteorological Service NMS and to identify the most important needs of farmers concerning climate information Special consideration will be given to the local knowledge used by rural farmers too often neglected but a key factor to their ability to cope with climate variability and change An additional objective of this guide is to improve communication among the NMS staff in particular meteorologists and agrometeorologists and to encourage Agro Pastoral Field School APFS trainers and facilitators to be more aware of their respective availability Furthermore one of the most important aims is the exchange of agroclimatic information that corresponds to the needs of all concerned thus facilitating the assessment of the existing climatic risks in farming activities The integration of the Response Farming in Rainfed Agriculture RF approach into Farmer Field School FFS is feasibly an effective way to reconcile NMS products with the needs of farmers RF is a method used for identifying and quantifying rainfall variability at a local level to assess the climatic risks of farming communities The Climate Responsive Farming

Management CRFM approach is an enhanced version of RF that uses modern and digital technologies such as specific computer software automatic weather stations real time telecommunication and smartphone applications This approach can be implemented at a minimum cost at the farming level The integration of the Response Farming in Rainfed Agriculture RF approach into FFS is feasibly an effective way to reconcile NMS products with the needs of farmers RF is a method used for identifying and quantifying rainfall variability at a local level to assess the climatic risks of farming communities The Climate Responsive Farming Management CRFM approach is an enhanced version of RF that uses modern and digital technologies such as specific computer software automatic weather stations real time telecommunication and smartphone applications This approach can be implemented at a minimum cost at the farming level

Economic Value of Weather and Climate Forecasts Richard W. Katz (ed), Allan H. Murphy, 1997-06-13 Weather and climate extremes can significantly impact the economics of a region This book examines how weather and climate forecasts can be used to mitigate the impact of the weather on the economy Interdisciplinary in scope it explores the meteorological economic psychological and statistical aspects to weather prediction The contributors encompass forecasts over a wide range of temporal scales from weather over the next few hours to the climate months or seasons ahead and address the impact of these forecasts on human behaviour Economic Value of Weather and Climate Forecasts seeks to determine the economic benefits of existing weather forecasting systems and the incremental benefits of improving these systems and will be an interesting and essential reference for economists statisticians and meteorologists *Earth System Monitor*, 2001

GEOValue Jamie B. Kruse, Joep Crompvoets, Francoise Pearlman, 2017-11-15 Quantifying the social and economic value that geospatial information contributes to modern society is a complex task To construct reliable and consistent valuation measures requires an understanding of the sequence of processes that starts with data acquisition and leads to decision makers choices that impact society GEOValue explores each step in this complex value chain from the viewpoint of domain experts spanning disciplines that range from the technical side of data acquisition and management to the social sciences that provide the framework to assess the benefit to society The book is intended to provide foundational understanding of the techniques and complexities of each step in the process As such it is intended to be assessable to a reader without prior training in data acquisition systems information systems or valuation methods In addition a number of case studies are provided that demonstrate the use of geospatial information as a critical input for evaluation of policy pertaining to a wide range of application areas such as agricultural and environmental policy natural catastrophes e government and transportation systems

Societal Impact of Spaceflight Steven J. Dick, Roger D. Launius, 2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects

of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions
