Economic Performance in the Middle East and North Africa Serdar Sayan, 2009-05-07 The economies of the Middle East and North Africa MENA region are in dire need of substantial institutional reform to improve their growth performance so as to create enough jobs for millions of entrants into their respective job markets and to fight poverty and income inequality This is necessary not only to reduce the risk of social unrest and domestic regional conflicts but also to assure stability of energy supply to the rest of the world and to hamper the violence originating from the region

So the region's convergence to global standards of governance quality is desirable for increased prosperity and stability both in the region and outside. This volume contributes to the recently burgeoning political economy literature on institutions by putting together well-written chapters that empirically study the relationship between economic performance and institutional characteristics in MENA economies to point out some of the areas where institutional reform is particularly needed and possible tools to use for such reform. Perhaps one common lesson that can be derived from all chapters in the volume is that both the region itself and the global economy will benefit from a MENA region that is better integrated to the rest.

Kadir

Yildirim,2016-09-26 Represents an important advancement in developing the strand of literature that considers how economic conditions affect Islamist movements Middle Eastern Studies A Kadir Yildirim and other scholars have used the term Muslim Democrat to describe moderate Islamist political parties suggesting a parallel with Christian Democratic parties in Europe These parties MDPs are marked by their adherence to a secular political regime normative commitment to the rules of a democratic political system and the democratic political representation of a religious identity In this book Yildirim draws on extensive field research in Turkey Egypt and Morocco to examine this phenomenon and assess the interaction of economic and political factors in the development of MDPs Distinguishing between competitive economic liberalization and

crony liberalization he argues that MDPs are more likely to emerge and succeed in the context of the former He summarizes that the broader implication is that the economic liberalization models adopted by governments in the region in the wake of the Arab Spring have significant implications for the future direction of party systems and democratic reform
