is substantial interest in competition and regulation as yet there has been relatively little investigation of these issues in developing economies This book redresses the balance and will be a valuable resource for researchers academics teachers and students interested in development economics and development studies It will also be of great relevance for practitioners and policymakers working in the fields of competition policy and regulatory reform

Bös,2012-12-06      Political Participation and Government Regulation Sam Peltzman,1998-11-15 Sam Peltzman is one of the world s leading economists and the essays in this collection are central to the modern canon in political economy These ten articles and an original introduction respond to two broad questions How does government work How do voters and their elected representatives make decisions Given the media s portrayal of the cynical political atmosphere in America Peltzman s responses are rather surprising the electorate really does make well informed decisions and elected officials actually do tend to vote according to their constituents interests These conclusions bear the stamp of the Chicago approach to political economy which applies microeconomic principles to political phenomena an approach that has had considerable success explaining why certain government policies have not achieved their intended effects This collection reflects Peltzman s long career studying the interface between the private economy and the public sector It will be essential to anyone who wishes to study government activity and voting behavior from an economic perspective      **Pricing and Price Regulation** D.
